Re: **Explanation on the Changes of More than 20% in Total Assets and Total Liabilities Accounts in the Interim Consolidated Financial Statements of September 30th, 2026 of PT Alamtri Minerals Indonesia Tbk**

To whom it may concern:

Pursuant to Provision III.1.1.4 of the Decree of the Board of Directors of PT Bursa Efek Indonesia No. Kep-00087/BEI/12-2025 regarding Regulation Number I-E on the Obligation to Submit Information, hereby we would like to provide the explanation on the changes of more than 20% in total assets and total liabilities accounts in the Interim Consolidated Financial Statements of September 30th, 2026 of PT Alamtri Minerals Indonesia Tbk ("**the Company**"), compared with the Company's Consolidated Financial Statements of December 31st, 2025.

The Company's total assets increased by 43.38% from US$2.89 billion as of December 31st, 2025 to US$4.15 billion as of September 30th, 2026. This increase, among others, is reflected in the increase of the Company's fixed assets and inventories, in line with the progress of the Company's business activities conducted through its subsidiaries operating in the aluminium processing and metallurgical coal mining sectors.

In this regard, the Company's fixed assets increased by 34.85% from US$1.81 billion to US$2.43 billion, mainly attributable to the aluminium smelter construction project of the Company's subsidiary PT Kalimantan Aluminium Industry ("**KAI**"), comprising land, building, infrastructure, and supporting facilities. The Company's inventories increased by 443.18% from US$89.26 million to US$484.85 million, which was attributable to the increased metallurgical coal inventories of its subsidiaries PT Maruwai Coal and PT Lahai Coal, as well as the recognition of KAI's aluminium and aluminium raw material inventories. In addition, cash and cash equivalents increased by 56.50% from US$369.09 million to US$577.63 million, among others attributable to the increased operational output of the Company's subsidiaries and additional drawdown of bank loan facilities by KAI.

The Company's total liabilities increased by 86.73% from US$1.17 billion as of December 31st, 2025 to US$2.19 billion as of September 30th, 2026, which was mainly in line with the progress of its business activities and investments. Such increase was attributable to the increase in the Company's short-term bank loans from US$27.94 million to US$114.24 million as well as

the increase in its long-term bank loans from US$685.08 million to US$942.96 million, since there was additional drawdown of bank loan facilities by KAI to support the aluminium smelter.

In the management's perspective, such changes in total assets and total liabilities are part of the progress in the Company's business activities and investment plan execution. In supporting the requirements, the Company always pays serious attention to the management of its capital structure and liquidity by taking into account its investment needs and operational activities.

Additionally, the Company's total equity increased 13.75% from US$1.72 billion as of December 31st, 2025 to US$1.95 billion as of September 30th, 2026. The increase was mainly attributable to the retained earnings of the current year, after accounting for dividend distribution and other equity changes within the reporting period.

Thank you for your attention.

Yours sincerely,
PT ALAMTRI MINERALS INDONESIA TBK

Mahardika Putranto
Corporate Secretary
