ESSA Delivers Stellar 1st Quarter Results with Surge in Both Top Line and Bottom Line

Jakarta, April 29 2026 — **PT ESSA Industries Indonesia Tbk ("ESSA"),** a publicly listed company engaged in the Energy and Chemicals sector through its LPG (Liquefied Petroleum Gas) refinery and Ammonia plant, started 2026 on a strong footing - supported by a strong market and backed by its robust operational performance. The top line increased by 37% YoY, while the Gross Profit doubled and the Net Profit surged by 131%. This was primarily driven by increase in ammonia prices and higher ammonia dispatch on the back of increased production - reiterating ESSA's philosophy to prioritize asset reliability and efficiency to strengthen and leverage its competitive position within the global supply chain.

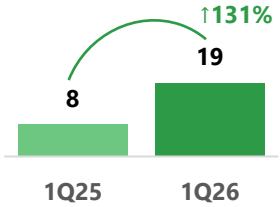

Revenue (USD Million)

EBITDA (USD Million)

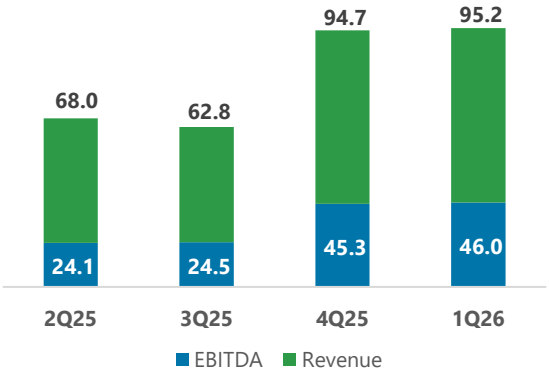

Net Profit* (USD Million)

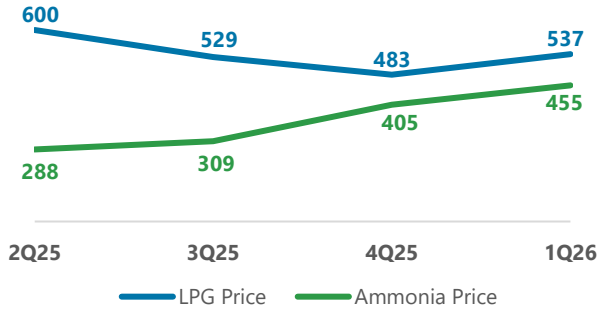

*Attributable to Shareholder of the Company

Both ammonia and LPG prices, which showed a gradual increase since last quarter of 2025, accelerated after the geopolitical tensions in the Middle East. While ammonia prices increased 34% YoY to USD 455/MT, LPG prices declined by 14% YoY, but showed a QoQ increase of 11% in Q1 2026 to USD 537/MT

Discipline in Operations and Maintenance

Amid geopolitical uncertainty, ESSA continues to steer its growth trajectory by leveraging strong operational capabilities and high plant reliability. Ammonia production increased by 16% YoY as the upstream gas supply disruption was fully resolved towards end of 2Q25, enabling the plant to reach a utilization rate of 121% in 1Q26 compared to 104% in 1Q25.

Kanishk Laroya – President Director & CEO of ESSA said "We have been able to maximize our production to capture the market upside. This is a testament to how we operate and maintain our plants to ensure a high utilization rate without compromising on the plant's safety and reliability. In May this year, our ammonia plant will be taking a scheduled Plant Turnaround for 35-40 days. This is a critical part of ESSA's maintenance cycle to ensure long-term asset safety, reliability and efficiency following the last comprehensive turnaround completed in 2021."

ESSA Catat Kinerja Solid di Kuartal I dengan Peningkatan Pendapatan dan Laba

Jakarta, 29 April 2026 — PT ESSA Industries Indonesia Tbk ("ESSA"), perusahaan tercatat yang bergerak di sektor Energi dan Kimia melalui kilang LPG (*Liquefied Petroleum Gas*) dan pabrik amoniak, mengawali Tahun 2026 dengan kinerja yang kuat, didukung kondisi pasar yang solid serta performa operasional yang tangguh. Pendapatan Perseroan meningkat 37% secara tahunan (YoY), sementara laba kotor meningkat berlipat ganda dan laba bersih melonjak 131%. Pencapaian ini terutama didorong oleh kenaikan harga amoniak serta peningkatan volume pengiriman amoniak dan peningkatan produksi. Hal ini menegaskan filosofi ESSA dalam memprioritaskan keandalan aset dan efisiensi operasional guna memperkuat serta mengoptimalkan posisi kompetitif Perseroan dalam rantai pasok global.

*Yang dapat diatribusikan kepada Pemegang Saham Perseroan

Harga amoniak dan LPG yang telah menunjukkan tren peningkatan sejak kuartal terakhir 2025, semakin menguat seiring meningkatnya ketegangan geopolitik di Kawasan Timur Tengah. Harga amoniak naik 34% secara tahunan (YoY) menjadi USD 455/MT. Sementara itu, harga LPG turun 14% YoY, namun meningkat 11% secara kuartalan (QoQ) pada Kuartal I 2026 menjadi USD 537/MT.

Disiplin Operasional dan Pemeliharaan

Di tengah ketidakpastian kondisi geopolitik, ESSA terus mengarahkan pertumbuhannya dengan memanfaatkan kapabilitas operasional yang kuat serta tingkat keandalan pabrik yang tinggi. Produksi amoniak meningkat 16% secara tahunan (YoY) karena gangguan pasokan gas hulu yang telah sepenuhnya teratasi pada akhir Kuartal II 2025, sehingga meningkatkan utilisasi pabrik sebesar 121% pada Kuartal I 2026 dibandingkan 104% pada Kuartal I 2025.

Kanishk Laroya – Presiden Direktur & CEO ESSA mengatakan "Kami dapat memaksimalkan produksi untuk menangkap momentum positif pasar. Hal ini mencerminkan bagaimana kami mengoperasikan dan melakukan pemeliharaan pabrik guna memastikan tingkat utilisasi yang tinggi tanpa mengorbankan aspek keselamatan dan keandalan pabrik. Pada bulan Mei tahun ini, pabrik amoniak kami akan menjalani *Plant Turnaround* terjadwal selama 35–40 hari. Kegiatan ini merupakan bagian penting dari siklus pemeliharaan ESSA untuk memastikan keselamatan, keandalan, dan efisiensi aset dalam jangka panjang, setelah *turnaround* komprehensif terakhir yang dilaksanakan pada Tahun 2021."
