Annual and Sustainability Report 2025 page 120-121

Scope 1 FLAG emissions decreased by 9% compared to 2024, reflecting our strong commitment to NDPE and sustainable land management. However, combined Scope 1 and 2 emissions rose by approximately 5%, predominantly due to increased electricity usage as more estates are now connected to the grid, as well as higher Scope 1 non-FLAG emissions from untreated palm oil mill effluent (POME). In 2025, we commissioned three new methane capture units, which are expected to reduce POME emissions from 2026 onward. Our Scope 3 emissions declined by 9% in 2025, reflecting fluctuations in raw material purchases. To address our Scope 3 emissions, the Company works closely with our key suppliers to promote sustainable practices.
