Accelerating Regeneration Amid Challenges

2025 Laporan Tahunan
Annual Report

PT Teladan Prima Agro Tbk terus mempercepat langkah regeneratif dan transformasi berkelanjutan, di tengah tantangan eksternal dan dinamika industri yang kian kompleks. Tema ini menegaskan keteguhan TPA untuk tidak hanya mempertahankan kinerja, tetapi justru memperkuat fondasi regeneratif melalui dimulainya pembangunan *kernel crushing plant* (KCP) dan *biogas power plant* (BPP) kedua. Inisiatif tersebut memperkuat peluang ekonomi sirkular, mengurangi emisi, serta memperpanjang siklus pemanfaatan sumber daya. Transformasi ini turut dipacu oleh inovasi digital berkelanjutan berkelanjutan dengan terus melakukan pengembangan dalam *Teladan Productivity Technology Science* (TPTS), *Teladan Green Metrics* (TGM), dan berbagai *pilot project* yang meningkatkan efisiensi, akurasi pengambilan keputusan, dan penerapan prinsip keberlanjutan di seluruh operasional.

TPA juga memprioritaskan pengembangan sumber daya manusia sebagai fondasi regenerasi jangka panjang. Sepanjang 2025, penguatan Budaya TELADAN, program pelatihan berkelanjutan, dan Sekolah Latihan Pemanen (SELAPA) dirancang untuk meningkatkan kompetensi teknis maupun *soft skill* tenaga kerja. Inisiatif ini diperkaya melalui penyelenggaraan Final *Teladan Innovation & Improvement Awards* (TIIAs), yang menjadi wadah bagi karyawan untuk menghadirkan ide inovatif yang mendukung peningkatan produktivitas dan keberlanjutan.

Dengan seluruh langkah tersebut, TPA menegaskan komitmennya untuk mempercepat regenerasi di tengah tantangan, memaksimalkan nilai setiap sumber daya, meminimalkan dampak lingkungan, dan menjaga daya saing jangka panjang.

PT Teladan Prima Agro Tbk continues to accelerate its regenerative efforts and sustainable transformation amid increasing external challenges and growing industry complexity. This theme emphasizes TPA's steadfast commitment not merely to maintain performance, but to further strengthen its regenerative foundation through the commencement of construction of a second Kernel Crushing Plant (KCP) and Biogas Power Plant (BPP). These initiatives enhance circular economy opportunities, reduce emissions, and extend the resource utilization cycle. This transformation is further driven by continuous digital innovation through ongoing development under Teladan Productivity Technology Science (TPTS), Teladan Green Metrics (TGM), and various pilot projects that improve efficiency, decision-making accuracy, and the application of sustainability principles across operations.

TPA also prioritizes human capital development as the basis for long-term regeneration. Throughout 2025, the strengthening of the TELADAN Culture, continuous training programs, and the Sekolah Latihan Pemanen (SELAPA) are designed to improve both technical competencies and soft skills. These initiatives are further enriched through the Final Teladan Innovation & Improvement Awards (TIIAs), which serve as a platform for employees to present innovative ideas that support productivity enhancement and sustainability.

Through these efforts, TPA reaffirms its commitment to accelerating regeneration amid challenges, maximizing the value of every resource, minimizing environmental impact, and maintaining long-term competitiveness.

TLDN PRODUCTIVITY TECHNOLOGY SCIENCE

TLDN GREEN METRICS

Melalui ***Teladan Productivity Technology Science*** **(TPTS)** dan ***Teladan Green Metrics*** **(TGM)**, Perseroan mengoptimalkan digitalisasi operasional dan pemantauan ESG. Sepanjang tahun 2025, TPTS terus dikembangkan berbasis AI dan *machine learning* untuk meningkatkan kesiapsiagaan operasional melalui analisis pola iklim dan kesehatan tanaman, sementara TGM diperkuat dengan pengelolaan 51 *dataset* ESG serta integrasi *Early Warning System* (EWS) dan modul pengukuran emisi berbasis standar global guna mendukung pengambilan keputusan yang lebih akurat dan responsif.

Selain itu, riset dan pengembangan (R&D) menjadi pilar strategis dalam mewujudkan operasional perkebunan yang berkelanjutan, efisien, dan inovatif. Pada tahun 2025, fokus riset diarahkan pada dinamika perubahan iklim, khususnya **antisipasi kondisi *La Niña*** yang memengaruhi pola curah hujan dan produktivitas tanaman. Peningkatan curah hujan mendukung pertumbuhan vegetatif, namun juga meningkatkan risiko penyakit tanaman serta menurunkan efektivitas penyerbukan alami oleh kumbang ***elaeidobius camerunicus***. Sebagai respons, Perseroan menerapkan pengembangan penyerbukan buatan dan pengendalian hama secara preventif guna menjaga stabilitas produktivitas dan memperkuat ketahanan operasional terhadap fluktuasi iklim.

Through **Teladan Productivity Technology Science (TPTS)** and **Teladan Green Metrics (TGM)**, the Company optimizes operational digitalization and ESG monitoring. Throughout 2025, TPTS continued to be developed based on AI and machine learning to enhance operational readiness through climate pattern analysis and plant health monitoring, while TGM was strengthened through the management of 51 ESG datasets as well as the integration of an Early Warning System (EWS) and emission measurement modules based on global standards to support more accurate and responsive decision-making.

In addition, research and development (R&D) serves as a strategic pillar in realizing sustainable, efficient, and innovative plantation operations. In 2025, research efforts were focused on climate change dynamics, particularly in **anticipating La Niña** conditions that affect rainfall patterns and crop productivity. Increased rainfall supports vegetative growth, but also raises the risk of plant diseases and reduces the effectiveness of natural pollination by the **elaeidobius camerunicus** beetle. In response, the Company implemented the development of assisted pollination and preventive pest control to maintain productivity stability and strengthen operational resilience against climate fluctuations.

SDM dan Organisasi
HR and Organization

Pada tahun 2025, Perseroan menyelenggarakan *Teladan Innovation & Improvement Awards* (TIIAs) sebagai wadah bagi karyawan untuk melahirkan ide inovatif dan meningkatkan daya saing. Upaya ini memperkuat kompetensi sumber daya manusia (SDM) sekaligus menanamkan budaya keberlanjutan dan tata kelola yang baik di seluruh lini operasional.

In 2025, the Company held the Teladan Innovation & Improvement Awards (TIIAs) as a platform for employees to generate innovative ideas and enhance competitiveness. This initiative strengthens human resources (HR) competencies while instilling a culture of sustainability and good governance across all operational lines.

We would like to extend our praise gratitude to Almighty God for His blessings and grace, which have enabled the Company to navigate 2025 and maintained its performance with an increasingly solid growth trajectory amidst industry dynamics and evolving global challenges. The Board of Commissioners considers this reporting year as an important phase in the Company's transformation journey, during which its growth strategy has not only oriented toward achieving short-term performance targets, but also inclined toward strengthening foundations of a sustainable business. In the perspective of the Board of Commissioners, 2025 was a pivotal momentum in accelerating the transition toward a more regenerative palm oil industry, which is an industry that is not only resilient in facing challenges, but also capable of growing, adaptive to change, as well as able to create long-term value for all stakeholders.

Kondisi Ekonomi dan Industri

Dewan Komisaris mencermati bahwa sepanjang tahun 2025 perekonomian global masih berada dalam fase penyesuaian yang ditandai oleh perlambatan pertumbuhan, meningkatnya ketidakpastian kebijakan perdagangan, serta fragmentasi pasar global. Tekanan tersebut dipengaruhi oleh dinamika geopolitik, perubahan arah kebijakan fiskal dan moneter di sejumlah negara maju, serta pengetatan standar perdagangan. Di tengah kondisi tersebut, perekonomian nasional menunjukkan ketahanan yang relatif baik, ditopang oleh konsumsi domestik yang tetap kuat, inflasi yang terkendali dalam kisaran sasaran, serta kebijakan moneter yang akomodatif. Stabilitas makroekonomi ini memberikan fondasi yang cukup bagi sektor riil, termasuk industri agribisnis, untuk tetap menjaga kesinambungan usaha di tengah tekanan eksternal.

Economic and Industrial Conditions

The Board of Commissioners observes that throughout 2025, the global economy remained within its adjustment phase, characterized by slowing growth, increasing uncertainties in trade policies, and increasing markets fragmentation. These pressures were influenced by geopolitical dynamics, shifts in fiscal and monetary policies directions in several developed countries, as well as the trade standards tightening. Amidst these conditions, the national economy showed relatively solid resilience, backed by sustained domestic consumption, controlled inflation within target range, and accommodative monetary policy. This macroeconomic stability serves as a sufficient foundation for real sector, including agribusiness industry, to maintain business continuity amidst the external pressures.

Dalam konteks industri kelapa sawit, Dewan Komisaris menilai bahwa tahun 2025 diwarnai oleh tantangan struktural yang semakin kompleks, mulai dari harga CPO global, risiko variabilitas iklim, hingga penguatan regulasi keberlanjutan internasional, seperti prinsip *No Deforestation, No Peat, No Exploitation* (NDPE) dan ketentuan *European Union Deforestation Regulation* (EUDR) yang menuntut peningkatan ketertelusuran rantai pasok. Namun demikian, arah kebijakan domestik, khususnya keberlanjutan program mandatori biodiesel serta penguatan permintaan dalam negeri, menjadi penopang utama stabilitas industri kelapa sawit nasional. Di saat yang sama, dorongan terhadap hilirisasi, pemanfaatan limbah, energi terbarukan, dan ekonomi sirkuler membuka peluang bagi pelaku industri untuk meningkatkan nilai tambah dan ketahanan usaha.

Within palm oil industry context, the Board of Commissioners views 2025 was marked by increasingly complex structural challenges, from global CPO price, climate variability risks, to the strengthening of international sustainability regulations, such as No Deforestation, No Peat, No Exploitation (NDPE) principles and European Union Deforestation Regulation (EUDR) provisions, that require enhanced supply chain traceability. However, domestic policy direction, particularly the continuation of mandatory biodiesel program and strengthening of domestic demand, are the main supports of the stability of national palm oil industry. Meanwhile, the push for downstreaming, waste utilization, renewable energy, and circular economy opened up opportunities for industry players to enhance value creation and business resilience.

Dewan Komisaris berpandangan bahwa strategi Perseroan yang berfokus pada penguatan nilai tambah melalui hilirisasi serta ekspansi kapasitas produksi tanpa pembukaan lahan baru merupakan respons yang tepat terhadap dinamika ekonomi dan industri tahun 2025. Pendekatan tersebut dinilai mampu meredam dampak volatilitas global sekaligus memperkuat daya saing jangka panjang. Dengan tetap mengedepankan tata kelola perusahaan yang baik, manajemen risiko yang disiplin, dan integrasi prinsip keberlanjutan dalam strategi usaha, Dewan Komisaris optimis bahwa Perseroan berada pada posisi yang solid untuk melanjutkan pertumbuhan secara berkelanjutan di tengah lanskap ekonomi dan industri yang terus berubah.

The Board of Commissioners considers that the Company's strategy to focus on strengthening value-added through both downstreaming and production capacity expansion without opening new land, are the appropriate response to the 2025 economic and industry dynamics. This approach is considered capable of mitigating the impact of global volatility while reinforcing long-term competitiveness. By continuing to uphold good corporate governance, disciplined risk management, and integration of sustainability principles into its business strategy, the Board of Commissioners remains optimistic that the Company has a solid footing to sustain its growth amidst the evolving economic and industry landscape.

Kondisi Ekonomi Global dan Indonesia

Perekonomian global pada tahun 2025 berada dalam fase transisi yang penuh ketidakpastian seiring dengan pergeseran kebijakan perdagangan, meningkatnya fragmentasi ekonomi global, serta penyesuaian kebijakan fiskal dan moneter di berbagai negara. Faktor-faktor tersebut tetap menjadi sumber risiko bagi prospek ekonomi global, meskipun di sisi lain aktivitas ekonomi global menunjukkan ketahanan yang relatif baik. Pertumbuhan ekonomi global pada tahun 2025 diperkirakan mencapai sekitar 3,3%, relatif stabil dibandingkan tahun sebelumnya, mencerminkan keseimbangan antara melemahnya permintaan di sejumlah negara dan dukungan dari kebijakan ekonomi yang masih akomodatif serta meningkatnya investasi, khususnya di sektor teknologi.

Global and Indonesian Economic Conditions

In 2025, the global economy was in a transitional phase filled with heightened uncertainties amid shifting trade policies, increasing global economic fragmentation, also adjustments in fiscal and monetary policies in various countries. These factors remained as risk sources of global economic prospect, although on the other hand, global economic activity showed relatively solid resilience. Global economic growth in 2025 was estimated to be around 3.3%, relatively stable compared to the previous year, reflecting a balance between weakening demand in several countries and support from still-accommodative economic policies, as well as increased investment, particularly in the technology sector.

"**Perseroan mencatatkan kinerja operasional dan finansial yang melampaui target pada 2025, didorong peningkatan produktivitas kebun, efisiensi biaya, serta penguatan hilirisasi dan ekonomi sirkular sebagai bagian strategi regeneratif yang dipercepat. Di tengah dinamika tersebut, tekanan inflasi global menunjukkan tren moderasi. Inflasi dunia pada tahun 2025 diperkirakan menurun menjadi sekitar 4,1%, dari 5,8% pada tahun 2024, seiring normalisasi harga komoditas dan meredanya tekanan sisi penawaran. Meski demikian, perkembangan inflasi antar kawasan masih bervariasi. Inflasi di Amerika Serikat masih berada di atas sasaran dan diperkirakan kembali ke target secara bertahap, sementara banyak negara di kawasan Asia dan ekonomi berkembang mencatat inflasi yang relatif lebih terkendali, didukung oleh stabilitas harga pangan dan energi.

Amid these dynamics, global inflation pressures showed a moderation trend. World inflation in 2025 was estimated to drop to around 4.1%, from 5.8% in 2024, following the normalization of commodity prices and easing pressure from supply-side. However, inflation developments still varied among regions. Inflation in the United States remained above the target and was expected to gradually return to target levels, while many countries in Asia and emerging economies recorded relatively more controlled inflation, backed by stable food and energy prices.

Perdagangan global pada tahun 2025 tetap tumbuh, meskipun dengan laju yang lebih moderat dibandingkan periode pemulihan pasca pandemi. Volume perdagangan dunia diperkirakan meningkat sekitar 4,1% pada 2025, didorong oleh kuatnya perdagangan produk berbasis teknologi yang sebagian mengimbangi perlambatan di sektor lainnya. Namun demikian, fragmentasi perdagangan global, penyesuaian rantai pasok, serta ketidakpastian kebijakan perdagangan masih membatasi akselerasi perdagangan internasional secara lebih luas.

Global trade will continue to grow in 2025, although at more moderate pace compared to the post-pandemic recovery period. World trade volumes were estimated to increase by around 4.1% in 2025, driven by strong trade in technology-based products, partially offset the slowdown in other sectors. Nevertheless, global trade fragmentation, supply chain adjustments, and trade policy uncertainty continued to limit broader acceleration in international trade.

Dari tinjauan domestik, perekonomian nasional sepanjang tahun 2025 menunjukkan ketahanan yang solid, terutama ditopang oleh terjaganya konsumsi rumah tangga sebagai kontributor utama pertumbuhan ekonomi dan didukung oleh keberlanjutan belanja sosial Pemerintah. Pada tahun 2025, pertumbuhan ekonomi Indonesia diperkirakan berada dalam kisaran 4,7%-5,5%, dan diproyeksikan meningkat lebih lanjut pada tahun 2026. Dari sisi stabilitas harga, inflasi nasional tetap terjaga dan berada dalam sasaran yang ditetapkan. Hingga November 2025, inflasi Indeks Harga Konsumen (IHK) tercatat sebesar 2,72% (yoy), masih berada dalam kisaran sasaran inflasi tahun 2025 sebesar 2,5±1%, mencerminkan terjaganya daya beli masyarakat serta stabilitas makroekonomi yang baik.

In terms of domestic perspective, our national economy throughout 2025 demonstrated solid resilience, primarily backed by sustained household consumption as the main contributor to economic growth and reinforced by continued government social spending. In 2025, Indonesia's economic growth was estimated to be within 4.7%–5.5% range and was projected to accelerate further in 2026. In terms of price stability, national inflation remained in control and within the established target range. As of November 2025, Consumer Price Index (CPI) inflation was recorded at 2.72% (yoy), well within 2025 inflation target range of 2.5±1%, reflecting maintained public purchasing power, as well as good macroeconomic stability.

Sejalan dengan kondisi tersebut, Bank Indonesia terus memperkuat bauran kebijakan moneter yang akomodatif guna mendorong pertumbuhan ekonomi dengan tetap menjaga stabilitas. Sepanjang tahun 2025, Bank Indonesia telah menurunkan *BI-Rate* sebanyak 5 kali dengan total penurunan sebesar 125 basis poin hingga mencapai 4,75% pada Desember 2025, yang merupakan level terendah sejak tahun 2022. Kebijakan ini ditempuh untuk menjaga stabilitas nilai tukar, mengendalikan inflasi, serta memperkuat momentum pertumbuhan ekonomi nasional.

In line with these conditions, Bank Indonesia continued to strengthen its accommodative monetary policy mix to fully supported economic growth while maintaining stability. Throughout 2025, Bank Indonesia have reduced BI-Rate five times, with a cumulative reduction of 125 basis points to 4.75% as of December 2025, marking the lowest level since 2022. This policy was taken to maintain exchange rate stability, controlling inflation, and reinforce the momentum of national economic growth.

Tinjauan Industri Agribisnis

Industri agribisnis, khususnya kelapa sawit, pada tahun 2025 bergerak dalam lanskap yang dibentuk oleh dinamika makroekonomi global dan domestik yang saling terkait. Fluktuasi harga komoditas serta risiko perubahan iklim, termasuk potensi *El Niño* dan *La Niña*, masih menjadi faktor yang memengaruhi kinerja industri dan menuntut pengelolaan yang semakin adaptif. Namun demikian, ketahanan permintaan domestik tetap menjadi penopang utama industri, terutama melalui kebijakan strategis pemerintah. Penerapan mandatori biodiesel B40 secara nasional pada tahun 2025 telah mengubah struktur permintaan dengan penyerapan biodiesel diperkirakan mencapai sekitar 15,6 juta kiloliter atau setara dengan kurang lebih 14 juta ton minyak sawit mentah. Sejalan dengan itu, produksi kelapa sawit nasional pada 2025 diproyeksikan tumbuh mendekati 10% ke kisaran 56–57 juta ton. Dari proyeksi tersebut, GAPKI melaporkan produksi minyak sawit mentah nasional tahun 2025 mencapai 48,1 juta ton atau naik 9,85% lebih tinggi dari produksi 2024 sebesar 43,78 juta ton. Dukungan tambahan juga datang dari kenaikan harga jual rata-rata minyak sawit mentah, inti sawit, dan minyak inti sawit mentah pada paruh akhir tahun, yang memperkuat fundamental industri secara keseluruhan.

Di sisi lain, Direksi mencermati bahwa perkembangan regulasi internasional, khususnya di Uni Eropa, menjadi faktor eksternal yang berpotensi memengaruhi perkembangan industri kelapa sawit Indonesia. Uni Eropa saat ini berada di garis terdepan dalam penerapan regulasi lingkungan, antara lain melalui *Renewable Energy Directive* (RED II/III) yang secara bertahap mengurangi peran biodiesel berbasis sawit dalam bauran energi terbarukan Eropa menuju *phase-out* penuh pada tahun 2030, serta *European Union Deforestation Regulation* (EUDR) yang mewajibkan seluruh komoditas sawit yang masuk ke pasar Uni Eropa bebas dari deforestasi pasca 2020, disertai kewajiban ketertelusuran hingga titik koordinat lahan. Bagi eksportir Indonesia, ketentuan tersebut menuntut penguatan sistem *traceability* dan geolokasi, kepastian legalitas dan status tutupan lahan di sepanjang rantai pasok, serta kesiapan menghadapi peningkatan biaya kepatuhan (*compliance cost*).

Kebijakan Strategis Perseroan dalam Menghadapi Tantangan Usaha

Direksi menyadari bahwa dinamika industri kelapa sawit dihadapkan pada berbagai tantangan yang bersifat struktural maupun operasional. Variabilitas

Agribusiness Industry Overview

In 2025, the agribusiness industry, particularly palm oil, operated within a landscape shaped by interconnected global and domestic macroeconomic dynamics. Fluctuating commodity price and climate change risks, including the potential occurrence of El Niño and La Niña, remained as factors influencing industry performance and demanding more adaptive management approaches. Nevertheless, resilient domestic demand still serve as key pillar supporting the industry, particularly through strategic government policies. The nationwide implementation of B40 biodiesel mandate in 2025 have reshaped the demand structure, with biodiesel absorption estimated at around 15.6 million kiloliters or equal to around 14 million tons of crude palm oil. Accordingly, national palm oil production in 2025 was projected to grow nearing 10% to 56–57 million tons range. Based on these projections, GAPKI reported national crude palm oil production in 2025 reached 48.1 million tons, 9.85% increase compared to 43.78 million tons in 2024. Additional support also came from higher average selling prices of crude palm oil, palm kernel, and crude palm kernel oil in the second half of the year, strengthened overall industry fundamentals.

On the other hand, the Board of Directors is aware that developments in international regulations, particularly in the European Union, become the external factors that may affect the development of Indonesian palm oil industry. European Union is currently at the forefront of implementing environmental regulations, including the Renewable Energy Directive (RED II/III), which gradually reduces the role of palm oil-based biodiesel in Europe's renewable energy mix toward a full phase-out by 2030, and European Union Deforestation Regulation (EUDR), that requires all palm oil commodities entering European market to be free from post-2020 deforestation, plus mandatory supply chain traceability down to land level coordinates. For Indonesian exporters, these requirements demand strengthened traceability and geolocation systems, assurance of land legality and land cover status throughout the supply chain, and preparedness to face increased compliance costs.

Company Strategic Policy in Dealing with the Business Challenges

The Board of Directors recognizes that the dynamics of the palm oil industry are shaped by a range of structural and operational challenges. Weather

cuaca dan anomali iklim, termasuk perubahan pola curah hujan, berpotensi memengaruhi produktivitas kebun dan stabilitas produksi. Di sisi lain, tekanan biaya operasional, seperti kenaikan harga pupuk, bahan bakar, serta biaya yang terkait dengan rantai pasok, menuntut pengelolaan biaya yang semakin disiplin dan efisien. Selain faktor domestik, perkembangan regulasi internasional juga menjadi perhatian, khususnya kebijakan Uni Eropa. Ketentuan tersebut berimplikasi pada meningkatnya tuntutan kepatuhan dan biaya pemenuhan standar bagi pelaku usaha.

Menjawab tantangan tersebut, Perseroan menetapkan kebijakan strategis yang berfokus pada penguatan daya tahan usaha dan penciptaan nilai jangka panjang. Perseroan memperkuat penerapan ekonomi sirkuler melalui pembangunan KCP dan BPP kedua, guna meningkatkan nilai tambah produk sekaligus memperbaiki efisiensi energi. Pemanfaatan limbah produksi menjadi pupuk kompos terus dioptimalkan untuk mengurangi ketergantungan terhadap pupuk kimia dan mendukung perbaikan kesuburan tanah secara berkelanjutan. Dari sisi operasional, Perseroan meningkatkan optimalisasi penerapan TPTS dan TGM sebagai bagian dari digitalisasi kebun dan penguatan pengambilan keputusan berbasis data. Selain itu, Perseroan melakukan perluasan kapasitas melalui akuisisi lahan tanpa membuka lahan baru, sehingga pertumbuhan usaha tetap sejalan dengan prinsip perlindungan lingkungan. Seiring dengan itu, Perseroan memperkuat fokus pada pasar domestik dan pengembangan produk turunan bernilai tambah untuk mengurangi ketergantungan pada pasar ekspor serta meredam dampak volatilitas harga global. Melalui kebijakan strategis tersebut, Perseroan optimis dapat menjaga kesinambungan usaha sekaligus meningkatkan daya saing di tengah perubahan lanskap industri yang semakin kompleks.

Renewable Energy

The Company, through its Subsidiary PT Daya Lestari (DL), strengthened its commitment to renewable energy development by utilizing shell and fiber waste from oil palm mesocarp to produce biomass energy. Tinjauan Ekonomi dan Industri
Economic and Industry Review

Tinjauan Ekonomi

Pada tahun 2025, perekonomian global berada dalam fase transisi dengan prospek jangka pendek yang relatif membaik, namun masih diwarnai ketidakpastian yang tinggi. Fragmentasi ekonomi global, ketegangan geopolitik, serta penyesuaian kebijakan perdagangan dan moneter di berbagai negara terus memengaruhi dinamika ekonomi dunia. Dengan perkembangan tersebut, pertumbuhan ekonomi global pada tahun 2025 diprakirakan mencapai sekitar 3,2%, sementara tekanan inflasi global cenderung mereda seiring normalisasi harga komoditas dan kebijakan moneter yang lebih berhati-hati, meskipun volatilitas pasar keuangan global masih tetap perlu diwaspadai.

Di tengah kondisi global tersebut, perekonomian Indonesia sepanjang tahun 2025 tetap menunjukkan ketahanan yang kuat. Pertumbuhan ekonomi nasional diprakirakan berada dalam kisaran 4,7%-5,5%, terutama didukung oleh konsumsi rumah tangga yang terjaga, belanja pemerintah, serta meningkatnya keyakinan masyarakat terhadap kondisi penghasilan dan ketersediaan lapangan kerja. Inflasi nasional tetap terkendali dalam kisaran sasaran 2,5±1%, mencerminkan terjaganya stabilitas harga dan daya beli masyarakat, sementara ketahanan eksternal ekonomi Indonesia tetap solid dengan stabilitas nilai tukar Rupiah dan kinerja Neraca Pembayaran Indonesia yang membaik.

Sejalan dengan itu, Bank Indonesia terus memperkuat bauran kebijakan moneter, makroprudensial, dan sistem pembayaran yang akomodatif serta bersinergi dengan kebijakan fiskal Pemerintah. Pada Desember 2025, Bank Indonesia mempertahankan *BI-Rate* sebesar 4,75%, dengan tujuan menjaga stabilitas makroekonomi sekaligus meningkatkan efektivitas transmisi pelonggaran kebijakan moneter untuk mendorong pertumbuhan ekonomi. Ke depan, sinergi kebijakan antara Bank Indonesia dan Pemerintah diharapkan terus diperkuat untuk menopang ketahanan ekonomi nasional serta mendorong pertumbuhan ekonomi yang lebih tinggi dan berkelanjutan, sejalan dengan visi Indonesia Emas 2045.

Economic Review

In 2025, the global economy was in a transition phase with relatively improving short-term prospects, although it remained marked by high levels of uncertainty. Global economic fragmentation, geopolitical tensions, as well as adjustments in trade and monetary policies across various countries continued to influence global economic dynamics. In this context, global economic growth in 2025 was projected to reach approximately 3.2%, while global inflationary pressures tended to ease in line with the normalization of commodity prices and more cautious monetary policies, although volatility in global financial markets still required close attention.

Amid these global conditions, Indonesia's economy throughout 2025 continued to demonstrate strong resilience. National economic growth was projected to be in the range of 4.7%–5.5%, primarily supported by sustained household consumption, government spending, and increasing public confidence in income conditions and job availability. National inflation remained well controlled within the target range of 2.5±1%, reflecting maintained price stability and purchasing power, while Indonesia's external economic resilience remained solid, supported by Rupiah exchange rate stability and improved performance of the Balance of Payments.

In line with these developments, Bank Indonesia continued to strengthen its accommodative mix of monetary, macroprudential, and payment system policies, in synergy with the Government's fiscal policy. In December 2025, Bank Indonesia maintained the BI-Rate at 4.75%, with the objective of safeguarding macroeconomic stability while enhancing the effectiveness of monetary policy easing transmission to support economic growth. Going forward, policy synergy between Bank Indonesia and the Government is expected to be further strengthened to support national economic resilience and promote higher and more sustainable economic growth, in line with the Indonesia Emas 2045 vision.

Tinjauan Industri

Sepanjang tahun 2025, industri kelapa sawit global menunjukkan kinerja yang relatif solid di tengah dinamika ekonomi dunia, ketidakpastian geopolitik, serta meningkatnya tuntutan terhadap praktik keberlanjutan. Permintaan global terhadap minyak sawit tetap kuat, terutama dari sektor pangan, oleokimia, dan energi terbarukan, seiring meningkatnya kebutuhan minyak nabati dunia. Di sisi lain, produksi global cenderung terbatas, khususnya dari 2 negara produsen utama, Indonesia dan Malaysia, sehingga menciptakan kondisi pasar yang relatif ketat akibat ketidakseimbangan antara pasokan dan permintaan.

Di Indonesia, industri kelapa sawit nasional mencatatkan kinerja yang positif meskipun masih menghadapi tantangan struktural. Hingga September 2025, produksi *crude palm oil* (CPO) nasional telah melampaui 43 juta ton atau tumbuh sekitar 11% dibandingkan periode yang sama tahun sebelumnya, mencerminkan pemulihan produksi dan peningkatan efektivitas pengelolaan perkebunan. Namun demikian, laju produksi masih relatif terbatas akibat faktor usia tanaman, kondisi cuaca, serta keterbatasan ekspansi lahan, di tengah peningkatan permintaan dari pasar ekspor dan domestik.

Dari sisi perdagangan, kinerja ekspor minyak sawit Indonesia sepanjang 2025 tetap menunjukkan tren positif. Berdasarkan data Gabungan Pengusaha Kelapa Sawit Indonesia (GAPKI), hingga Oktober 2025 volume ekspor minyak sawit dan produk turunannya mencapai sekitar 27,69 juta ton, meningkat dibandingkan periode yang sama tahun sebelumnya sebesar 24,84 juta ton. Peningkatan ini terutama ditopang oleh harga minyak sawit yang lebih kompetitif dibandingkan minyak nabati lainnya sejak April 2025. Seiring dengan itu, konsumsi domestik juga terus meningkat, didorong oleh kebutuhan industri pangan, oleokimia, dan program biodiesel, yang berperan menjaga stabilitas pasar dan harga CPO, namun sekaligus mempersempit ruang pasokan ekspor dalam kondisi produksi yang terbatas.

Industry Review

Throughout 2025, the global palm oil industry demonstrated relatively solid performance amid global economic dynamics, geopolitical uncertainty, and increasing demands for sustainable practices. Global demand for palm oil remained strong, particularly from the food, oleochemical, and renewable energy sectors, in line with rising global demand for vegetable oils. On the other hand, global production tended to be constrained, especially from the two main producing countries, Indonesia and Malaysia, resulting in relatively tight market conditions due to an imbalance between supply and demand.

In Indonesia, the national palm oil industry recorded positive performance despite continuing to face structural challenges. As of September 2025, national crude palm oil (CPO) production had exceeded 43 million tons, or grew by approximately 11% compared to the same period of the previous year, reflecting a recovery in production and improved effectiveness in plantation management. Nevertheless, production growth remained relatively limited due to factors such as the age profile of plantations, weather conditions, and constraints on land expansion, amid increasing demand from both export and domestic markets.

From a trade perspective, Indonesia's palm oil export performance throughout 2025 continued to show a positive trend. Based on data from the Indonesian Palm Oil Association (GAPKI), as of October 2025, exports of palm oil and its derivative products reached approximately 27.69 million tons, increasing from 24.84 million tons in the same period of the previous year. This increase was primarily supported by more competitive palm oil prices compared to other vegetable oils since April 2025. At the same time, domestic consumption also continued to rise, driven by demand from the food, oleochemical, and biodiesel programs, which helped maintain market and CPO price stability, while at the same time narrowing the availability of export supply amid constrained production.

Tinjauan Operasional
Operational Review

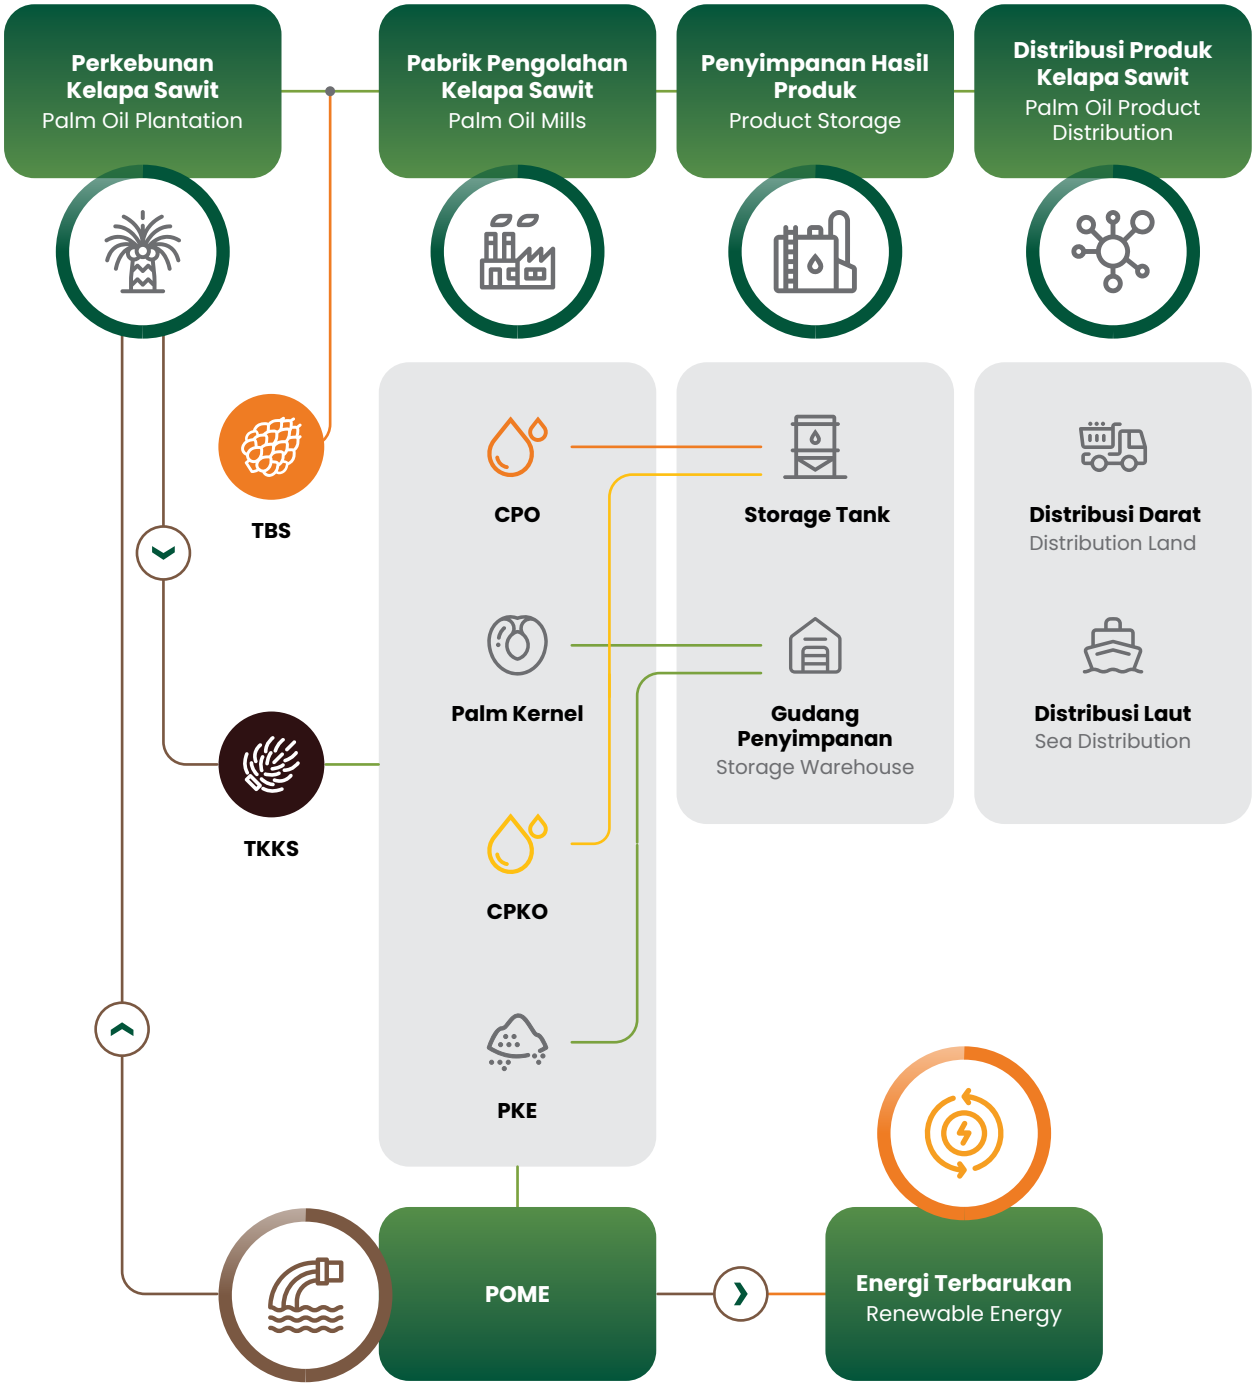

Perseroan mengelola 3 lini bisnis utama, yakni perkebunan kelapa sawit, pengolahan hasil perkebunan, serta energi terbarukan. Ketiga sektor tersebut terintegrasi dalam suatu sistem yang saling mendukung. Fokus utama Perseroan berada pada produksi *crude palm oil* (CPO), yang diperkuat oleh keberadaan fasilitas *kernel crushing plant* (KCP) untuk mengolah inti sawit (*palm kernel*) menjadi produk bernilai tambah. Di samping itu, limbah cair dari proses produksi dimanfaatkan melalui *biogas power plant* (BPP) sebagai sumber energi bersih. Model usaha yang terintegrasi ini mencerminkan komitmen Perseroan terhadap efisiensi operasional dan keberlanjutan lingkungan.

The Company's core focus is crude palm oil (CPO) production, strengthened with existing kernel crushing plant (KCP) facility to process palm kernel into value-added products. In addition, liquid waste from the production process is utilized through the biogas power plant (BPP) as a source of clean energy. This integrated business model reflects Company's commitment toward operational efficiency and environmental sustainability.

Seiring dengan pengembangan produk dan komitmen Perseroan terhadap keberlanjutan, pada tahun 2025 Perseroan mulai menambah lini produk turunan kelapa sawit melalui pembangunan *Kernel Crushing Plant* (KCP) yang berlokasi di Kutai Timur, pada salah satu area kebun milik Entitas Anak. KCP ini memiliki kapasitas pengolahan sebesar 100 ton PK per hari, yang diolah menjadi *crude palm kernel oil* (CPKO) dan *palm kernel expeller* (PKE). Pada tahun 2025, KCP memproduksi 11,99 ribu ton CPKO dan 15,80 ribu ton PKE.

Energi Terbarukan

Pengelolaan energi terbarukan Perseroan dijalankan melalui PT Daya Lestari (DL), salah satu Entitas Anak, yang sejak 5 November 2024 telah mengoperasikan *biogas power plant* (BPP) di area operasional perusahaan. Fasilitas ini mengonversi limbah cair pabrik kelapa sawit (*palm oil mill effluent*/POME) menjadi gas metana yang kemudian digunakan untuk menghasilkan listrik ramah lingkungan.

Listrik yang dihasilkan dimanfaatkan untuk mendukung kegiatan operasional KCP serta pabrik kelapa sawit lainnya di bawah naungan Entitas Anak. Inisiatif ini menjadi langkah nyata dalam mengurangi ketergantungan terhadap energi berbasis fosil, serta memperluas pemanfaatan sumber energi terbarukan.

Lebih dari sekadar efisiensi energi, pemanfaatan limbah juga sebagai sumber daya baru yang mencerminkan komitmen Perseroan terhadap pengurangan emisi gas rumah kaca, keberlanjutan lingkungan, dan praktik ekonomi sirkular. Melalui integrasi antara operasional KCP dan BPP, Perseroan berhasil meningkatkan efisiensi, memaksimalkan pemanfaatan sumber daya, serta memperkuat daya saing di sektor industri kelapa sawit.

Entitas Anak ini juga secara berkelanjutan menjual kelebihan listrik (*excess power*) kepada PT PLN (Persero). Pasokan energi ini berasal dari pembangkit berbasis limbah kelapa sawit yang berada di 2 lokasi utama, yaitu Pabrik PT Tanjung Buyu Perkasa Plantation (TBP) di Kecamatan Talisayan, Kabupaten Berau, serta Pabrik PT Telen (TLN) di Kecamatan Karangan, Kabupaten Kutai Timur. Kedua unit masing-masing memiliki kapasitas produksi sebesar 200 kW.

the average price of crude palm kernel oil (CPKO) was recorded at Rp24.70 million per ton in 2025, an increase compared to 2024, which was recorded at Rp19.46 million per ton.

In line with the product development and the Company's commitment toward sustainability, in 2025 the the Company began expanding its palm oil derivative product line by initiating the construction of Kernel Crushing Plant (KCP) located in East Kutai, within one of its Subsidiaries plantations. The KCP has a processing capacity of 100 tons of PK per day, processed into crude palm kernel oil (CPKO) and palm kernel expeller (PKE). In 2025, KCP produced 11.99 thousand tons of CPKO and 15.80 thousand tons of PKE.

Renewable Energy

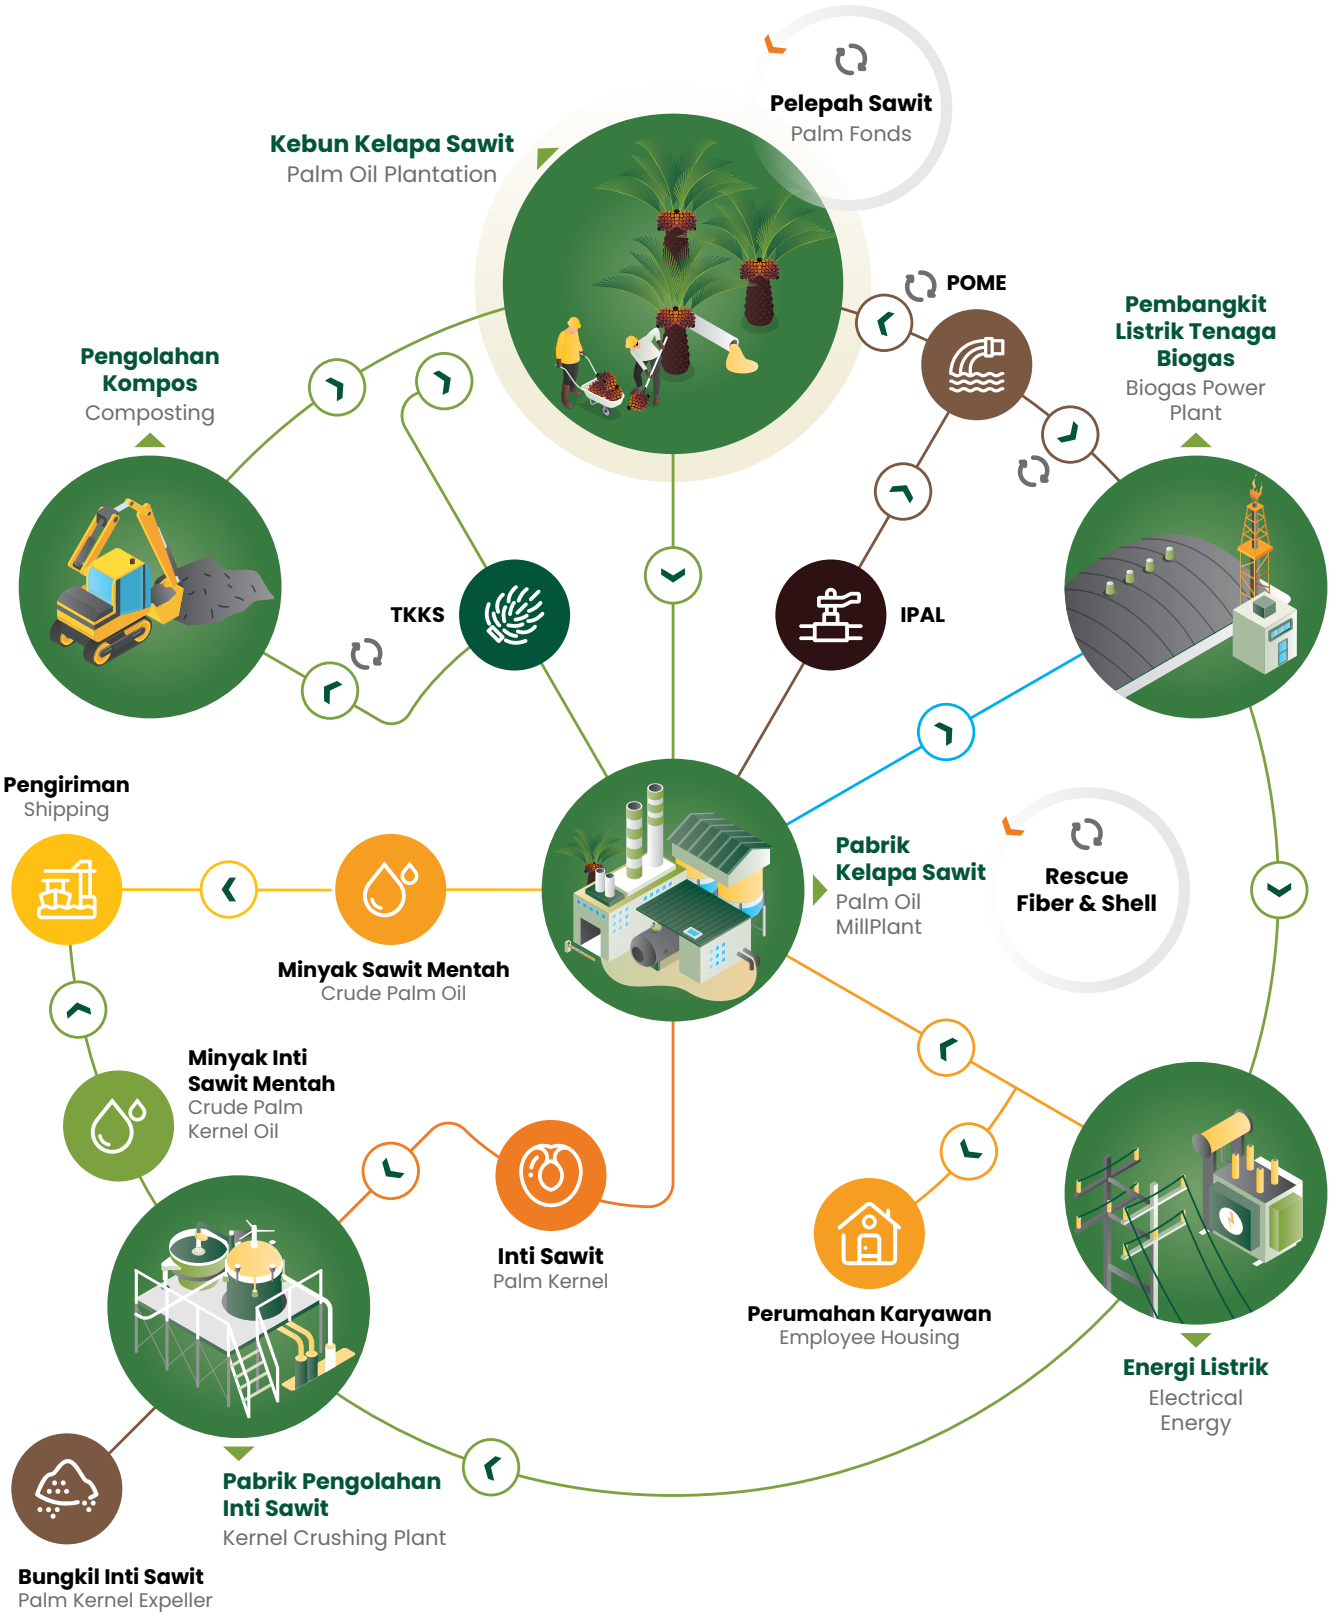

The Company manages its renewable energy via PT Daya Lestari (DL), as one of its Subsidiaries, which have been operating the biogas power plant (BPP) within its operational areas since 5 November 2024. This facility converts palm oil mill effluent (POME) into methane gas that is later used to generate environmentally-friendly electricity.

The electricity generated is used to support KCP operational activities, as well as other palm oil mills under the Subsidiary. This initiative is an actual measure to reduce the dependency of fossil-based energy, while also expanding the utilization of renewable energy source.

Beyond energy efficiency, waste utilization as new source of energy also showcases the Company's commitment toward greenhouse gases reduction, environmental sustainability, and the circular economy practice. With the integration of KCP and BPP operations, the Company managed to improve its efficiency, maximizing the utilization of resources, as well as strengthen its competitiveness in the palm oil industry.

This Subsidiary also continuously selling its excess power to PT PLN (Persero). This energy supply is produced by power plants feed by palm oil waste, located in 2 main locations, namely PT Tanjung Buyu Perkasa Plantation (TBP) Mill at Talisayan District, Berau Regency, and PT Telen (TLN) Mill at Karangan District, East Kutai Regency. Both units has a respective production capacity of 200 kW.

Implementasi Ekonomi Sirkular pada Kegiatan Operasional

Perseroan secara konsisten memperkuat penerapan ekonomi sirkular sebagai bagian dari strategi keberlanjutan jangka panjang. Pada 5 November 2024, KCP dan BPP di Kecamatan Muara Bengkal, Kutai Timur, telah mulai dioperasikan dan mulai mendukung efisiensi energi dan pengelolaan limbah secara terintegrasi.

Komitmen terhadap ekonomi sirkular tersebut diwujudkan melalui konsep *closing the loop* (menutup siklus) dengan memastikan limbah dari proses pengolahan TBS dimanfaatkan secara optimal. Limbah cair kelapa sawit (*palm oil mill effluent*/POME) diolah di BPP untuk menghasilkan gas metana, yang kemudian dimanfaatkan sebagai *prime mover* turbin gas dalam pembangkit listrik. Sementara itu, tandan kosong digunakan kembali sebagai pupuk organik untuk menjaga dan meningkatkan kesuburan tanah di area perkebunan.

Pendekatan ini bertujuan untuk menghasilkan energi terbarukan dan mengurangi ketergantungan terhadap energi fosil yang berkontribusi pada emisi gas rumah kaca (GRK). Inti kelapa sawit (*palm kernel*/PK) juga dimanfaatkan untuk menghasilkan produk bernilai komersial, seperti CPKO dan PKE, sebagai bagian dari penerapan prinsip *zero waste* (tanpa limbah).

Selain mengurangi dampak lingkungan, pendekatan ini turut menciptakan nilai ekonomi baru melalui diversifikasi produk. Integrasi antara KCP dan BPP mencerminkan upaya Perseroan dalam mengoptimalkan sumber daya, meningkatkan efisiensi operasional, serta memperkuat daya saing secara berkelanjutan.

Implementation of Circular Economy in Operational Activities

The Company consistently strengthening the implementation of circular economy as part of its long-term sustainability strategy. On 5 November 2024, the KCP and BPP in Muara Bengkal District, East Kutai, has commenced the operations and started supporting the integrated energy efficiency and waste management efforts.

The commitment toward circular economy is realized with closing the loop concept, by ensuring that waste generated from FFB processing in fully optimized. The Palm Oil Mill Effluent (POME) is processed in the BPP to produce methane gas later used as prime mover of gas turbine to generate electricity. Meanwhile, empty fruit bunches are reused as organic fertilizer to maintain and enhancing soil fertility in plantation areas.

This approach aims to generate renewable energy and reduce dependency to fossil-energy that contributes to greenhouse gases (GHG) emissions. palm kernel (PK) is also utilized to generate commercial valued products, such as CPKO and PKE, as a part of implementation of zero waste principle.

Other than reducing the environmental impact, this approach also creating new economic value via product diversification. The integration of KCP and BPP shows Company's efforts in optimizing the resources, improving operational efficiency, as well as enhancing competitiveness in a sustainable manner.

Prospek Usaha di Tahun 2026
Business Prospects in 2026

Memasuki tahun 2026, industri kelapa sawit Indonesia diproyeksikan menghadapi dinamika usaha yang semakin kompleks seiring dengan pertumbuhan permintaan yang lebih cepat dibandingkan peningkatan pasokan. Berdasarkan publikasi *Outlook* Industri Sawit Indonesia 2026 oleh Indonesia Palm Oil Strategic Studies (IPOSS), produksi CPO global diperkirakan mencapai sekitar 84,1 juta ton pada 2026, meningkat sekitar 2,6% dibandingkan tahun 2025, dengan kontribusi Indonesia dan Malaysia mencapai sekitar 83% dari total pasokan dunia. Di sisi lain, pertumbuhan produksi cenderung bersifat moderat karena keterbatasan ekspansi lahan, tingginya proporsi tanaman tua, serta pengaruh variabilitas iklim. Kondisi tersebut terjadi di tengah tren peningkatan permintaan CPO global yang terus didorong oleh sektor pangan, oleokimia, dan energi terbarukan, sehingga berpotensi menjaga harga CPO pada level yang relatif kuat namun sensitif terhadap perubahan kebijakan dan keseimbangan pasokan dan permintaan.

Entering 2026, Indonesia's palm oil industry is projected to face increasingly complex business dynamics, as demand growth is faster than supply expansion. Based on the publication Indonesian Palm Oil Industry Outlook 2026 by Indonesia Palm Oil Strategic Studies (IPOSS), global CPO production is estimated to reach approximately 84.1 million tons in 2026, increasing by around 2.6% compared to 2025, with contributions from Indonesia and Malaysia accounting for approximately 83% of total global supply. On the other hand, production growth is expected to remain moderate due to limited land expansion, a high proportion of aging plantations, and the impact of climate variability. These conditions occur amid a continued upward trend in global CPO demand driven by the food, oleochemical, and renewable energy sectors, which is expected to keep CPO prices at relatively strong levels, albeit sensitive to policy changes and supply and demand dynamics.

Dari sisi permintaan, IPOSS mencatat bahwa konsumsi minyak sawit global pada tahun 2026 diproyeksikan meningkat sejalan dengan penguatan sektor non-pangan, khususnya bioenergi. Konsumsi CPO untuk kebutuhan non-pangan diperkirakan meningkat dari sekitar 37,3% pada 2025 menjadi 38,5% pada 2026, seiring dengan ekspansi program biodiesel di berbagai negara. Secara domestik, Gabungan Pengusaha Kelapa Sawit Indonesia (GAPKI) dan IPOSS memperkirakan bahwa rencana penerapan mandatori biodiesel B50 berpotensi meningkatkan konsumsi biodiesel sekitar 2,2 juta ton pada 2026 dibandingkan tahun sebelumnya, yang akan mendorong penyerapan CPO di dalam negeri

From the demand perspective, IPOSS notes that global palm oil consumption in 2026 is projected to increase in line with the strengthening of the non-food sector, particularly bioenergy. CPO consumption for non-food purposes is estimated to rise from approximately 37.3% in 2025 to 38.5% in 2026, along with the expansion of biodiesel programs in various countries. Domestically, the Indonesian Palm Oil Association (GAPKI) and IPOSS project that the planned implementation of the B50 biodiesel mandate could increase biodiesel consumption by approximately 2.2 million tons in 2026 compared to the previous year, which would significantly increase domestic CPO absorption. This increase in domestic

secara signifikan. Peningkatan konsumsi domestik tersebut diperkirakan akan membatasi volume ekspor CPO, meskipun secara nilai tetap didukung oleh harga yang relatif terjaga.

consumption is expected to limit CPO export volumes, although export values are likely to remain supported by relatively stable prices.

Di sisi perdagangan, IPOSS memproyeksikan bahwa neraca perdagangan CPO dan produk turunannya pada 2026 berpotensi mengalami penurunan tipis, seiring dengan berkurangnya volume ekspor akibat peningkatan konsumsi domestik. Meskipun demikian, sektor kelapa sawit tetap menjadi salah satu kontributor utama neraca perdagangan nasional, dengan nilai neraca perdagangan CPO dan turunannya tercatat mencapai sekitar USD25,6 miliar pada 2023, dan diproyeksikan tetap berada pada level yang signifikan pada periode 2025-2026. Kondisi ini menegaskan peran strategis industri sawit dalam menopang perekonomian nasional, sekaligus menunjukkan meningkatnya kebutuhan pengelolaan pasokan dan ekspor secara lebih terukur.

From a trade perspective, IPOSS projects that the trade balance of CPO and its derivative products in 2026 may experience a slight decline, in line with reduced export volumes due to higher domestic consumption. Nevertheless, the palm oil sector is expected to remain one of the main contributors to the national trade balance, with the trade balance value of CPO and its derivatives recorded at approximately USD25.6 billion in 2023 and projected to remain at a significant level during the 2025–2026 period. This gives emphasis to the strategic role of the palm oil industry in supporting the national economy, while also highlighting the growing need for more measured supply and export management.

Proyeksi Usaha di Tahun 2026
2026 Business Projection

Dengan mempertimbangkan kondisi ekonomi global dan domestik, serta dinamika industri dan prospek usaha pada tahun 2026, Perseroan memproyeksikan terjadinya peningkatan pendapatan sebesar 10% pada tahun 2026 dibandingkan tahun sebelumnya. Peningkatan tersebut diharapkan berasal dari kontribusi arus kas baru, khususnya dari produksi CPKO dan PKE, seiring dengan optimalisasi kapasitas produksi serta penguatan permintaan terhadap produk turunan kelapa sawit. Berdasarkan asumsi harga acuan rata-rata komoditas minyak kelapa sawit, inti kelapa sawit, dan produk turunannya sepanjang tahun 2026, Perseroan memperkirakan adanya penyesuaian harga bahan baku yang berpotensi mengalami kenaikan/penyesuaian dibandingkan tahun sebelumnya. Dengan mempertimbangkan proyeksi pendapatan dan beban usaha, Perseroan memproyeksikan pertumbuhan laba setelah pajak sebesar 10% pada tahun 2026.

Taking into account global and domestic economic conditions, as well as industry dynamics and business prospects in 2026, the Company projects a 10% increase in revenue in 2026 compared to the previous year. This increase is expected to be driven by contributions from new cash flow streams, particularly from CPKO and PKE production, in line with production capacity optimization and strengthening demand for palm oil derivative products. Based on assumptions regarding average benchmark prices of palm oil, palm kernel, and their derivative products throughout 2026, the Company anticipates adjustments in raw material prices, which may increase compared to the previous year. By considering projected revenue and operating expenses, the Company projects profit after tax growth of 10% in 2026.

Dalam rangka mendukung pencapaian target pertumbuhan usaha tersebut, Perseroan akan terus menjaga struktur permodalan yang sehat dan seimbang. Untuk periode satu tahun ke depan, Perseroan menargetkan struktur modal yang dikelola secara *prudent*, dengan menjaga rasio

In order to support the achievement of these business growth targets, the Company will continue to maintain a healthy and balanced capital structure. For the next one-year period, the Company targets a prudently managed capital structure by maintaining a maximum total liabilities to equity ratio

total liabilitas terhadap ekuitas maksimal 1 kali, serta rasio utang bank terhadap ekuitas pada tingkat yang tetap terkendali. Pengelolaan struktur modal ini ditujukan untuk menjaga fleksibilitas pendanaan, mengoptimalkan biaya modal, serta memastikan tingkat pengembalian yang optimal bagi Pemegang Saham, sejalan dengan keberlanjutan kinerja keuangan Perseroan.

Kebijakan dividen Perseroan mencerminkan komitmen untuk memberikan nilai tambah dan pengembalian yang optimal bagi Pemegang Saham. Pada 15 Mei 2025, Perseroan telah membagikan Dividen Final kepada seluruh Pemegang Saham atas laba tahun buku 2024. Selain itu, Perseroan juga membagikan Dividen Interim pada 23 Oktober 2025 atas laba tahun buku 2025. Ke depan, Perseroan berupaya untuk tetap mendistribusikan dividen dengan rasio minimal sebesar 30% dari laba tahun berjalan setelah penyisihan cadangan wajib untuk tahun buku 2026. Kebijakan tersebut akan dilaksanakan dengan tetap mengacu pada ketentuan Undang-Undang Perseroan Terbatas, memperhatikan kondisi dan kesehatan keuangan Perseroan, serta tanpa mengurangi kewenangan RUPS dalam menetapkan keputusan lain sesuai ketentuan yang berlaku.

Keselamatan dan Kesehatan Kerja

Sebagai perusahaan yang bergerak di bidang perkebunan, Perseroan menempatkan keselamatan dan kesehatan kerja (K3) sebagai prioritas utama bagi seluruh pekerja. Program K3 senantiasa ditingkatkan setiap tahun dengan menetapkan target nol kecelakaan kerja (*zero-accident*) di lingkungan Perseroan dan Entitas Anak. Komitmen ini diwujudkan melalui identifikasi bahaya dan risiko kerja, analisis keselamatan serta kejadian hampir celaka (*near-miss*), kampanye keselamatan, pelatihan K3 rutin, hingga pemberian sanksi atas perilaku tidak aman serta perbaikan aspek yang belum sesuai standar.

Sepanjang tahun 2025, Perseroan berhasil mencapai target *zero-accident* dan menerima penghargaan atas konsistensinya menjaga keselamatan kerja. Beberapa Entitas Anak juga meraih Penghargaan Kecelakaan Nihil dari Pemerintah Provinsi Kalimantan Timur. Untuk mempertahankan pencapaian tersebut, Perseroan secara berkelanjutan menyelenggarakan pelatihan K3 dan program kesehatan kerja di seluruh wilayah operasional, sehingga penerapan K3 tetap optimal bagi seluruh karyawan.

Occupational Health and Safety

As a company engaged in the plantation industry, the Company places occupational health and safety (OHS) as a top priority for all workers. The OHS program is continuously enhanced each year by setting a zero-accident target within the Company and its Subsidiaries. This commitment is implemented through hazard and risk identification, safety and near-miss analysis, safety campaigns, regular OHS training, the imposition of sanctions for unsafe behavior, and the improvement of areas that do not yet meet established standards.

Throughout 2025, the Company successfully achieved its zero-accident target and received recognition for its consistent efforts in maintaining workplace safety. Several Subsidiaries also received the Zero Accident Award from the Provincial Government of East Kalimantan. Teknologi Informasi
Information Technology

Dalam menghadapi tantangan bisnis yang dinamis, Perseroan menjadikan teknologi informasi (TI) sebagai fondasi utama untuk berinovasi dan beradaptasi. Pemanfaatan sistem TI yang terintegrasi memungkinkan akses data secara efisien, mendukung kelancaran operasional, serta memperkuat proses pengambilan keputusan.

In responding to dynamic business challenges, the Company positions information technology (IT) as a key foundation for innovation and adaptation. The utilization of an integrated IT system enables efficient data access, supports smooth operational processes, and strengthens decision-making.

Perseroan terus memperkuat penerapan teknologi digital berbasis *internet of things* (IoT) melalui 2 sistem utama, *Teladan Productivity Technology Science* (TPTS) dan *Teladan Green Metrics* (TGM), guna mendukung efisiensi operasional dan penerapan prinsip keberlanjutan di seluruh lini bisnis. Upaya ini penting untuk dilakukan mengingat anomali iklim yang terjadi saat ini dapat memengaruhi produktivitas perusahaan serta keberlanjutan.

The Company continues to strengthen the implementation of digital technology based on the internet of things (IoT) through 2 main systems, Teladan Productivity Technology Science (TPTS) and Teladan Green Metrics (TGM), to support operational efficiency and the application of sustainability principles across all business lines. These efforts are essential given current climate anomalies that may affect the Company's productivity and long-term sustainability.

Pada pertengahan tahun lalu, Badan Meteorologi, Klimatologi, dan Geofisika (BMKG) mengingatkan akan terjadi La Niña pada akhir tahun 2025. Untuk memitigasi dampak La Niña Perseroan telah mengoptimalkan pemanfaatan TPTS melalui pendekatan *artificial intelligence* (AI) dan *machine learning/deep learning* yang memperkuat kemampuan analisis terhadap periodisitas El Niño-Southern Oscillation (ENSO), pola curah hujan, cadangan air tanah, dan indeks kesehatan tanaman. Dalam hal ini, TPTS mengintegrasikan berbagai data melalui *remote sensing/satellite, unmanned aerial vehicle* (UAV), *automatic weather station* (AWS), serta *automatic rainfall system* (ARS). Sistem ini mencakup seluruh area perkebunan kelapa sawit seluas 64.430 Ha di Kalimantan Timur dan terhubung langsung dengan *control room* di Kantor Pusat Jakarta, sehingga strategi mitigasi dan adaptasi dapat segera diterapkan di lapangan secara akurat.

In mid-2024, the Meteorology, Climatology, and Geophysics Agency (BMKG) issued an early warning that La Niña is expected to occur at the end of 2025. To mitigate the potential impacts of La Niña, the Company has optimized the use of TPTS through artificial intelligence (AI) and machine learning/ deep learning approaches, which strengthen analytical capabilities related to El Niño–Southern Oscillation (ENSO) periodicity, rainfall patterns, groundwater reserves, and crop health indices. In this regard, TPTS integrates various data sources, including remote sensing/satellite, unmanned aerial vehicles (UAVs), automatic weather stations (AWS), and automatic rainfall systems (ARS). The system covers the entire 64,430 Ha of oil palm plantation area in East Kalimantan and is directly connected to the control room at the Head Office in Jakarta, enabling mitigation and adaptation strategies to be accurately and promptly implemented in the field.

Dalam praktiknya melalui TPTS, Perseroan membangun basis *data block profile management* (BPM) yang mencakup areal dan tanaman per blok hingga level individual titik tanam yang terintegrasi dengan sistem *Tree ID Geo-tagging* untuk setiap pokok sawit yang terpantau setiap waktu. Pengembangan BPM ini mengakomodir prinsip *site-specific* dan variabilitas blok yang mampu membedakan secara detil mengenai kondisi lingkungan (biotik/abiotik), indeks kesehatan tanaman, serta potensi produksi di setiap individu tanaman.

In practice, through TPTS, the Company has developed a block profile management (BPM) database that covers land and crop conditions at the block level down to individual planting points, integrated with the Tree ID Geo-tagging system for each monitored oil palm tree. The development of BPM incorporates site-specific principles and block variability, enabling detailed differentiation of environmental conditions (biotic/abiotic), crop health indices, and production potential for each individual plant.

Dari data BPM tersebut, Perseroan menjalankan sistem deteksi klasifikasi pokok sehat/normal dan pokok sakit/butuh perhatian dan perawatan lebih lanjut hingga level titik tanam di setiap blok. Dengan demikian, manajemen dapat memastikan setiap pokok dapat tumbuh sehat dan memberikan kontribusi terhadap produksi yang optimal secara berkelanjutan di tengah tantangan perubahan iklim.

Di sisi lain, pada tahun lalu penerapan IoT dalam TPTS telah dikembangkan oleh Perseroan untuk meningkatkan efektivitas kegiatan sensus produksi di kebun. Pemanfaatan analisis *big data* serta algoritma model prediksi hibrida berbasis *machine learning* dan *deep learning* memungkinkan sistem TPTS menghasilkan estimasi jumlah janjang per pokok dan berat janjang rata-rata TBS dengan tingkat akurasi yang lebih tinggi dan proses yang lebih efisien.

Transformasi digital ini menggantikan pendekatan sensus produksi manual yang sebelumnya dilakukan 3 kali per tahun, dan terbukti mampu memberikan penghematan biaya hingga 55,6% dibandingkan realisasi biaya rata-rata sensus produksi manual (metode konvensional) pada tahun lalu. Selain efisiensi, sistem prediksi TPTS menunjukkan *confidence level* nilai prediksi dengan aktual total rata-rata di atas 95%.

Ke depan, Perseroan berkomitmen untuk terus meningkatkan performa sistem TPTS melalui proses data *ground-truthing* untuk validasi algoritma dan model AI dengan nilai *error* yang semakin rendah dan presisi. Dengan peningkatan akurasi yang konsisten, sistem ini diharapkan dapat menggantikan sepenuhnya sensus manual hingga 100%, sekaligus memperkuat langkah Perseroan dalam transformasi digital dan efisiensi operasional di seluruh lini usaha.

Sementara itu, TGM terus diperkuat dengan penambahan jumlah *dataset* yang relevan dengan aspek operasional maupun keberlanjutan. Hingga akhir tahun 2025, TGM telah mengelola 51 *dataset* ESG yang meliputi aspek operasional, finansial, penggunaan bahan kimia, emisi gas rumah kaca, keanekaragaman hayati, dan lainnya. Peningkatan ini mencerminkan komitmen Perseroan dalam menghadirkan sistem pengelolaan berbasis data yang semakin komprehensif.

Sepanjang tahun 2025, Perseroan juga memperluas pemanfaatan teknologi digital melalui sejumlah *pilot project*, antara lain uji coba pengukuran *go green* di pabrik, digitalisasi sistem pengukuran tangki

From the BPM data, the Company operates a detection system that classifies trees as healthy/normal or unhealthy/requiring further attention and treatment down to the individual planting point in each block. This ensures that management can confirm each tree's ability to grow properly and contribute to sustained optimal production amid climate change challenges.

On the other hand, last year the Company further advanced the implementation of IoT within TPTS to enhance the effectiveness of production census activities in the plantation. The use of big data analytics and hybrid prediction models based on machine learning and deep learning enables TPTS to generate more accurate estimates of the number of fruit bunches per tree and the average FFB bunch weight, delivered with higher accuracy and greater efficiency.

This digital transformation replaces the manual production census approach that was previously conducted 3 times per year, and has proven to deliver cost savings of up to 55.6% compared to the average actual cost of last year's manual (conventional methods) production census. Beyond efficiency, the TPTS prediction system demonstrated a confidence level of more than 95% when comparing predicted values with actual outcomes.

Going forward, the Company remains committed to further enhancing the performance of TPTS through data ground-truthing processes to validate AI algorithms and models with increasingly lower error rates and higher precision. With consistently improving accuracy, the system is expected to fully replace manual censuses by up to 100%, while strengthening the Company's progress in digital transformation and operational efficiency across all business lines.

Meanwhile, TGM continues to be strengthened through the addition of datasets relevant to both operational and sustainability aspects. As of the end of 2025, TGM has managed 51 ESG datasets covering operational and financial aspects, chemical usage, greenhouse gas emissions, biodiversity, and others. This enhancement reflects the Company's commitment to building an increasingly comprehensive data-driven management system.

Throughout 2025, the Company also expanded the use of digital technology through several pilot projects, including trials of go green measurement systems at mills, digitalization of the CPO tank

CPO untuk memantau kedalaman dan kapasitas di Talisayan, serta penerapan sistem absensi digital di kebun. Melalui integrasi inisiatif digital tersebut, Perseroan tidak hanya meningkatkan efisiensi operasional dan menjaga keberlanjutan produktivitas, tetapi juga memperkuat ketahanan usaha dalam menghadapi tantangan perubahan iklim dan dinamika industri di masa depan.

monitoring system to measure depth and capacity in Talisayan, and the implementation of a digital attendance system at plantations. Through the integration of these digital initiatives, the Company not only enhances operational efficiency and maintains sustainable productivity, but also strengthens business resilience in addressing the challenges of climate change and future industry dynamics.

Tata Kelola Teknologi Informasi

Perkembangan teknologi informasi Perseroan berkontribusi signifikan dalam memperkuat penerapan tata kelola yang baik (*good corporate governance*/GCG) serta mendorong praktik keberlanjutan melalui digitalisasi proses bisnis. Sepanjang tahun 2025, Perseroan memperbarui *blueprint* dan *roadmap* transformasi digital yang berorientasi pada peningkatan transparansi, efisiensi, serta integrasi data lintas fungsi operasional. Penerapan tata kelola TI dilakukan dengan metode *agile delivery process* untuk memastikan kecepatan adaptasi terhadap kebutuhan bisnis, disertai pembaruan *standard operating procedure* (SOP) dan dokumen *governance* terkait keamanan TI.

Dalam mengelola aspek TI, Perseroan menerapkan tata kelola TI yang terintegrasi dengan kerangka manajemen risiko perusahaan. Pendekatan ini memastikan seluruh risiko utama, termasuk potensi *disruption*, ancaman keamanan siber (*cyber security*), serta skenario pemulihan bencana (*disaster recovery*), dapat diidentifikasi, dikelola, dan dilaporkan secara tepat kepada Direksi dan Manajemen Kunci. Secara berkala, Perseroan melakukan identifikasi dan penilaian risiko TI untuk menentukan prioritas mitigasi serta penguatan infrastruktur yang mendukung keberlangsungan operasional kebun dan pabrik.

Dalam konteks tata kelola data, keamanan siber menjadi fokus utama. Perseroan menerapkan sistem perlindungan berlapis melalui instalasi *anti-virus* dan *malware protection* di seluruh perangkat, pembatasan akses data berbasis otorisasi berjenjang, serta konfigurasi sistem jaringan yang otomatis tertutup di luar jam operasional guna meminimalkan potensi ancaman eksternal. Selain itu, dilakukan edukasi keamanan siber kepada seluruh karyawan melalui kampanye *awareness* dan pembentukan tim keamanan internal TI (*internal IT security team*).

Information Technology Governance

The Company's information technology advancements have made a significant contribution to strengthening the implementation of good corporate governance (GCG) and promoting sustainable practices through the digitalization of business processes. Throughout 2025, the Company updated its digital transformation blueprint and roadmap, focusing on enhancing transparency, efficiency, and cross-functional data integration. IT governance is implemented using an agile delivery process approach to ensure adaptability to business needs, accompanied by the renewal of standard operating procedures (SOPs) and governance documents related to IT security.

In managing IT aspects, the Company applies IT governance integrated with the corporate risk management framework. This approach ensures that all key risks, including potential disruptions, cybersecurity threats, and disaster recovery scenarios, are properly identified, managed, and reported to the Board of Directors and Key Management. The Company periodically conducts IT risk identification and assessment to determine mitigation priorities and strengthen infrastructure that supports the continuity of plantation and mill operations.

In the context of data governance, cybersecurity remains a primary focus. The Company implements multi-layered protection systems through the installation of antivirus and malware protection on all devices, tiered authorization-based data access restrictions, and network configurations that automatically shut down outside operating hours to minimize potential external threats. In addition, cybersecurity education is provided to all employees through awareness campaigns and the establishment of an internal IT security team.

Kebijakan keamanan data diperkuat dengan penerapan aplikasi siber keamanan, pengendalian akses, pemantauan aktivitas jaringan, penggunaan perangkat lunak legal, serta proses *backup* data secara berkala dan *redundancy* penyimpanan di lokasi berbeda sebagai langkah mitigasi bencana. Untuk menjamin keberlanjutan layanan, Perseroan mengoperasikan *disaster recovery center* (DRC) di Jakarta dan Samarinda, yang menjadi bagian dari implementasi *disaster recovery plan* (DRP) dan *business continuity plan* (BCP). Efektivitas sistem diuji secara berkala melalui simulasi pemulihan dan audit internal terhadap kepatuhan kebijakan keamanan data.

Setiap insiden keamanan ditangani melalui protokol *incident response* yang memastikan tindak lanjut cepat dan tepat. Dalam pemilihan vendor dan mitra TI, Perseroan menerapkan penilaian berbasis kapabilitas, keamanan, dan keberlanjutan. Vendor utama, seperti penyedia jaringan dan layanan *cloud* dievaluasi melalui *assessment checklist*, sementara pengembangan aplikasi sebagian besar dikelola secara *in-house* untuk menjaga kendali atas kode sumber dan kerahasiaan sistem.

Data security policies are reinforced through the implementation of cybersecurity applications, access controls, network activity monitoring, use of licensed software, as well as regular data backup processes and redundant storage across different locations as part of disaster mitigation measures. To ensure service continuity, the Company operates disaster recovery centers (DRC) in Jakarta and Samarinda, as part of the implementation of its disaster recovery plan (DRP) and business continuity plan (BCP). System effectiveness is tested periodically through recovery simulations and internal audits on data security policy compliance.

Each security incident is handled through a structured incident response protocol that ensures prompt and appropriate follow-up actions. In selecting IT vendors and partners, the Company applies assessments based on capability, security, and sustainability. Major vendors, such as network and cloud service providers, are evaluated using an assessment checklist, while most application development is managed in-house to maintain control over source codes and system confidentiality.

Pengembangan Operasional Perkebunan
Plantation Operational Development

Perseroan berkomitmen untuk mengembangkan operasional perkebunan secara berkelanjutan, efisien, dan inovatif, termasuk melalui mekanisasi dan penerapan teknologi agrikultur modern di perkebunan kelapa sawit. Sebagai bagian dari implementasi Rencana Jangka Panjang 2025-2030, Perseroan memfokuskan tahun 2025 sebagai tahap pembangunan fondasi yang kuat untuk mendukung pertumbuhan jangka panjang. Fokus utama tahun ini mencakup penyesuaian standar agronomi, optimalisasi manajemen SDM, serta pengembangan program berbasis *environmental, social, and governance* (ESG). Untuk mencapai tujuan tersebut, Perseroan melaksanakan berbagai inisiatif strategis sebagai berikut:

1. Peningkatan produksi lahan potensial: mengoptimalkan produktivitas lahan yang telah tertanam melalui penerapan standar agronomi yang lebih presisi dan pemanfaatan teknologi perkebunan modern;

The Company is committed to developing its plantation operations in a sustainable, efficient, and innovative manner, including through mechanization and the application of modern agricultural technology in oil palm plantations. As part of the implementation of the 2025–2030 Long-Term Plan, the Company has designated 2025 as the foundation-building phase to support long-term growth. The main focuses for the year include the alignment of agronomic standards, optimization of HR management, and the development of environmental, social, and governance (ESG)-based programs. To achieve these objectives, the Company implemented the following strategic initiatives:

1. Enhancing the productivity of potential land: optimizing the yield of planted areas through the implementation of more precise agronomic standards and the use of modern plantation technologies;

2. Akuisisi lahan produktif secara tepat dan optimal: melanjutkan strategi pertumbuhan berkelanjutan melalui akuisisi CDM, yang memperkuat kapasitas produksi tanpa perlu membuka lahan baru;

3. Peningkatan dan perbaikan perumahan staf dan karyawan: meningkatkan kualitas fasilitas hunian melalui pembangunan dan renovasi perumahan;
4. Peningkatan akses air bersih, sanitasi, dan kesehatan: menyediakan infrastruktur pendukung yang memadai untuk memastikan kesejahteraan karyawan dan masyarakat sekitar perkebunan, sekaligus mendukung produktivitas dan kualitas hidup; serta
5. Peningkatan dan perbaikan kualitas jalan: melakukan perbaikan dan pemeliharaan jalan kebun serta akses utama untuk mendukung efisiensi logistik, distribusi hasil produksi, dan mobilitas operasional di seluruh wilayah kerja.

Seluruh inisiatif tersebut dijalankan secara terintegrasi guna memperkuat daya saing Perseroan, meningkatkan efisiensi operasional, dan memastikan keberlanjutan usaha di tengah tantangan industri dan perubahan iklim global.

2. Strategic and optimal acquisition of productive land: continuing the sustainable growth strategy through CDM acquisitions, which strengthen production capacity wihout the need for new land clearing;
3. Improving and upgrading staff and employee housing: enhancing the quality of living facilities through construction and renovation works;
4. Improving access to clean water, sanitation, and healthcare: providing adequate supporting infrastructure to ensure the well-being of employees and surrounding communities while enhancing productivity and quality of life; and

5. Improving and upgrading road quality: conducting maintenance and repair of plantation roads and main access routes to support logistics efficiency, product distribution, and operational mobility across all working areas.

All these initiatives are implemented in an integrated manner to strengthen the Company's competitiveness, enhance operational efficiency, and ensure business sustainability amid industry challenges and global climate change.

Pada tahun 2025, Perseroan juga mengambil peran strategis dalam konsorsium *elaeidobius* bersama Gabungan Pengusaha Kelapa Sawit Indonesia (GAPKI), Kementerian Pertanian, Badan Pengelola Dana Perkebunan Kelapa Sawit (BPDPKS), dan lembaga riset lainnya. Melalui konsorsium ini, Perseroan ditunjuk sebagai salah satu lokasi uji multilokasi dan perbanyakan serangga penyerbuk baru asal Tanzania, mencakup 3 spesies unggulan, yakni *elaeidobius kamerunicus*, *elaeidobius subvittatus*, dan *elaeidobius plagiatus*. Dari inisiatif tersebut, sebanyak 6.000 indukan telah didatangkan ke Indonesia untuk dikembangbiakkan menjadi sekitar 800 ribu hingga 1 juta serangga penyerbuk, yang selanjutnya akan didistribusikan ke berbagai sentra perkebunan sawit nasional. Langkah ini menjadi bagian penting dari upaya pengembangan operasional perkebunan, karena secara langsung mendukung peningkatan produktivitas sawit secara berkelanjutan sekaligus memperkuat peran Perseroan dalam pencapaian target produksi sawit nasional di masa mendatang.

Perseroan juga terus mengembangkan operasional perkebunan secara berkelanjutan melalui praktik agronomi cerdas dan penerapan teknologi modern. Upaya menjaga kesuburan tanah dilakukan melalui pemupukan berimbang berbasis hasil analisis daun, dikombinasikan dengan bahan organik, seperti *land application*, janjang kosong, dan kompos dari POME serta tandan kosong kelapa sawit (TKKS) tanpa tambahan bahan kimia. Pemanfaatan *sludge* kering juga mulai diterapkan sebagai pupuk alternatif. Di sisi lain, pengendalian hama dan penyakit difokuskan pada pendekatan preventif, termasuk penggunaan bahan tanaman moderat terhadap *ganoderma sp.,* agen hayati pelindung tanaman, serta pengendalian gulma secara selektif.

Sebagai antisipasi terhadap risiko iklim dan potensi *water stress* di Kalimantan Timur, Perseroan memperkuat sistem pemantauan cuaca melalui AWS dan optimalisasi platform digital berbasis IoT, seperti TGM dan TPTS. Sistem ini mendukung efisiensi operasional, perencanaan kebun, dan sensus produksi secara otomatis. Pengembangan program *sustainable agricultural partnership initiative* (SAPI), penerapan *enterprise resource planning* (ERP), serta aplikasi *mobile* turut mendorong integrasi data dan efektivitas kerja, sehingga produktivitas perkebunan tetap optimal meskipun menghadapi tantangan iklim dan dinamika industri.

In 2025, the Company also assumed a strategic role in the *elaeidobius* consortium alongside the Indonesian Palm Oil Association (GAPKI), the Ministry of Agriculture, the Palm Oil Plantation Fund Management Agency (BPDPKS), and other research institutions. Through this consortium, the Company was designated as one of the sites for multi-location testing and propagation of new pollinating beetle species originating from Tanzania, comprising 3 superior species: *elaeidobius kamerunicus*, *elaeidobius subvittatus*, and *elaeidobius plagiatus*. Under this initiative, a total of 6,000 parent beetles have been brought to Indonesia to be bred into approximately 800 thousand to 1 million pollinating insects, which will subsequently be distributed to various national oil palm plantation centers. This initiative represents an important part of the Company's plantation operational development efforts, as it directly supports the sustainable enhancement of oil palm productivity while strengthening the Company's role in achieving future national palm oil production targets.

The Company continues to develop its plantation operations sustainably through smart agronomic practices and the application of modern technology. Efforts to maintain soil fertility are carried out through balanced fertilization based on leaf analysis results, combined with organic materials, such as land application, empty fruit bunches, and compost derived from POME and empty oil palm fruit bunches (EFB) without additional chemicals. The use of dried sludge has also been introduced as an alternative fertilizer. On the other hand, pest and disease control is focused on preventive approaches, including the use of plant materials with moderate resistance to *ganoderma sp.*, biological plant protection agents, and selective weed control.

To anticipate climate risks and potential water stress in East Kalimantan, the Company has strengthened its weather monitoring system through AWS and optimized IoT-based digital platforms such as TGM and TPTS. These systems support operational efficiency, plantation planning, and automated production census. The development of the sustainable agricultural partnership initiative (SAPI), implementation of enterprise resource planning (ERP), and mobile applications also contribute to data integration and work effectiveness, ensuring that plantation productivity remains optimal despite climate challenges and industry dynamics.

2. Audit berbasis bukti dan risiko;
3. Kompetensi dan profesionalisme tim audit; serta
4. Pendekatan perbaikan berkelanjutan (*continual improvement*).

Integrasi kedua kerangka ini menjadikan SPI Perseroan semakin kuat secara desain (COSO) dan efektif dalam implementasi (ISO 19011:2018).

The audit approach under the ISO 19011:2018 framework strengthens the implementation of COSO through the following principles:

1. Auditor integrity and objectivity;
2. Evidence- and risk-based auditing;
3. Auditor team competence and professionalism; and
4. A continual improvement approach.

The integration of these two frameworks makes the Company's ICS stronger in design (COSO) and more effective in implementation (ISO 19011:2018).

Evaluasi Efektivitas Sistem Pengendalian Internal

Perseroan secara rutin mengevaluasi efektivitas SPI untuk memastikan sistem tersebut mampu mengantisipasi risiko dan mendukung perbaikan secara berkelanjutan. Evaluasi dilakukan oleh Unit Audit Internal, dan hasilnya dilaporkan kepada Direktur Utama serta Komisaris Utama untuk ditelaah lebih lanjut.

Evaluation of the Effectiveness of the Internal Control System

The Company periodically evaluates the effectiveness of ICS to ensure that it is capable of anticipating risks and supporting continuous improvement. The evaluation is conducted by the Internal Audit Unit, and the results are submitted for further review to the President Director and President Commissioner.

Pernyataan Dewan Komisaris dan Direksi atas Kecukupan Sistem Pengendalian Internal

Dewan Komisaris dan Direksi menilai bahwa penerapan SPI pada tahun 2025 telah berjalan dengan baik, efektif, dan memadai untuk mengelola risiko serta mendukung pencapaian tujuan Perseroan. Penilaian ini didasarkan pada kinerja operasional dan keuangan, penguatan GCG, serta kepatuhan terhadap peraturan yang berlaku. Selain itu, Dewan Komisaris dan Direksi terus memberikan dukungan kepada Unit Audit Internal dan unit terkait untuk memperkuat SPI dalam rangka mendukung keberlanjutan usaha di masa mendatang.

The Board of Commissioners and the Board of Directors also continue to support the Internal Audit Unit and relevant unit to improve the ICS to support future business sustainability.

Manajemen Risiko
Risk Management

Perseroan memandang manajemen risiko tidak hanya sebagai mekanisme pengendalian, tetapi juga sebagai elemen strategis untuk menjaga ketahanan usaha dan mendukung pertumbuhan jangka panjang. Dengan merujuk pada ISO 31000:2018, penerapan manajemen risiko dilakukan secara terstruktur melalui prinsip, kerangka kerja, dan proses yang mendukung terciptanya nilai, peningkatan kinerja, serta kemampuan adaptasi terhadap dinamika industri.

Seluruh unit di Perseroan, mulai dari divisi, departemen, *estate*, *mill*, hingga pemilik proyek, berperan aktif dalam proses identifikasi, analisis, mitigasi, dan penyusunan profil risiko. Direksi bertanggung jawab atas risiko strategis sebagai *risk owner* utama, sementara Departemen *Corporate Risk & Compliance* berperan sebagai *risk officer* yang melakukan analisis dan pendampingan menyeluruh. Pada tingkat unit bisnis, masing-masing manajer bertindak sebagai *risk owner* dengan koordinasi bersama Departemen *Corporate Risk & Compliance* untuk menetapkan mitigasi dan *risk appetite* sesuai arahan Direksi.

Perseroan juga terus meningkatkan efektivitas manajemen risiko melalui penerapan pendekatan 3 lini pertahanan (*three lines of defense*/3D), yang terdiri dari:

1. Pertahanan lapis pertama dilaksanakan oleh unit atau fungsi bisnis yang melakukan aktivitas operasional perusahaan sehari-hari, yaitu dengan lingkungan pengendalian (*control environment*) kondusif, menerapkan kebijakan manajemen risiko, mempertimbangkan faktor risiko di setiap keputusan, serta memiliki pengendalian internal yang efektif;
2. Pertahanan lapis kedua dilaksanakan oleh Departemen *Corporate Risk* & *Compliance*, yang bertanggung jawab untuk mengembangkan dan memantau implementasi manajemen risiko Perseroan, melakukan pengawasan pelaksanaan fungsi bisnis dalam koridor kebijakan manajemen risiko, memantau dan melaporkan risiko-risiko Perseroan kepada pemegang akuntabilitas tertinggi di Perseroan; dan
3. Pertahanan lapis ketiga dilaksanakan oleh auditor, di mana peran auditor internal maupun auditor eksternal. Peran auditor internal jauh lebih intens dalam model 3LD ini. Perannya

The Company views risk management as more than a control mechanism, but also a strategic element to maintain business resilience and support long-term growth. By referring to ISO 31000:2018, the implementation of risk management is conducted structurally through principles, framework, and process to facilitate the creation of values, enhanced performance, and capability to adapt with the industry dynamics.

All units within the Company, from divisions, departments, estates, mills, and project owners are playing active roles in the processes of identification, analysis, mitigation, and risk profiling. The Board of Directors is responsible for strategic risks as primary risk owner, while the Corporate Risk & Compliance Department acts as the risk officer, conducting the overall analysis and assistance. In the business units, each respective manager will act as a risk owner under the common coordination of Risk & Compliance Department to determine the mitigation and risk appetite in accordance with the Board of Directors' directives.

The Company continues improving the effectiveness of its risk management by applying the 3 lines of defense (3LD) model, consisting of:

1. The first line of defense is carried out by business units or functions that carry out the company's daily operational activities, namely with a conducive control environment, implementing risk management policies, considering risk factors in every decision, and having effective internal controls;

2. The second line of defense is carried out by Corporate Risk & Compliance Department, responsible for developing and monitoring the implementation of the Company's risk management, overseeing the implementation of business functions within the risk management policies corridor, monitoring and reporting the Company's risks to the highest accountability holder in the Company; and
3. The third line of defense is carried out by auditors, both internal auditors and external auditors. The role of internal auditors is more intense in this 3LD model. This role includes assessing

meliputi melakukan kajian dan evaluasi terhadap rancang bangun, implementasi manajemen risiko, dan memastikan bahwa pertahanan lapis pertama dan lapis kedua berjalan sesuai dengan yang diharapkan.

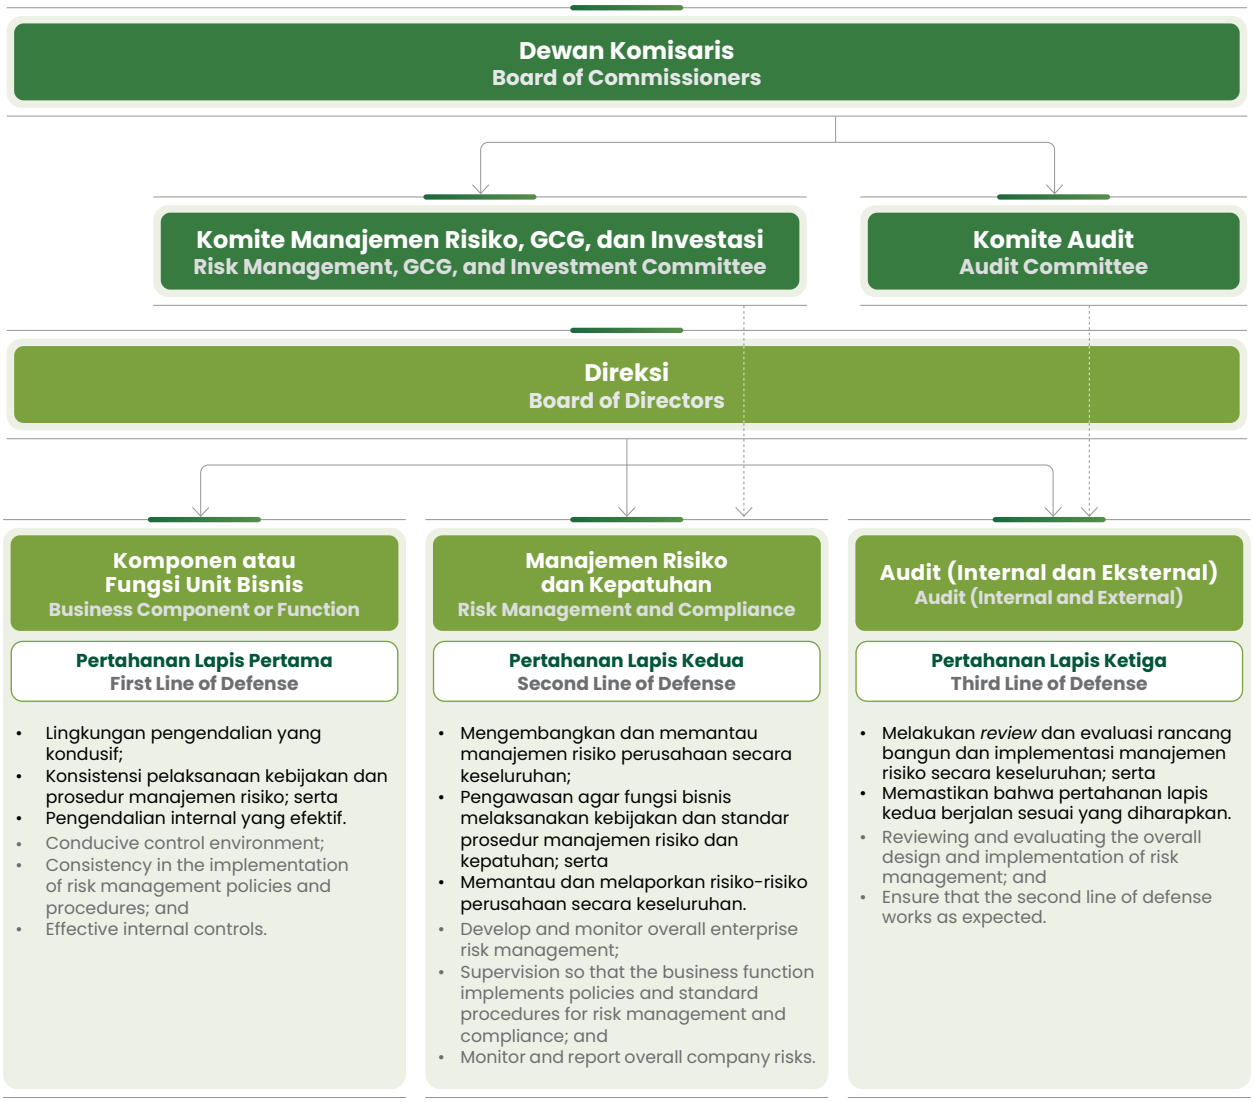

Pendekatan 3LD ini memastikan pengelolaan risiko berjalan efektif sekaligus mencerminkan tingkat kematangan *enterprise risk management* (ERM).

Dalam penerapannya, Direksi memainkan peran kunci sebagai pengelola utama risiko, sedangkan Dewan Komisaris melalui Komite Audit dan Komite Manajemen Risiko, GCG, dan Investasi, menjalankan fungsi pengawasan terutama pada lapis kedua dan ketiga. Dengan pendekatan ini, Perseroan berharap dapat meningkatkan resiliensi dan efektivitas pengelolaan risiko untuk mendukung keberlanjutan usaha.

and evaluating the design, implementing risk management, and ensuring that the first and second line of defense work as expected.

This 3LD approach ensures that risk management is running effectively while reflecting the maturity of the enterprise risk management (ERM).

In the implementation, the Board of Directors has a key role as the main risk manager, while the Board of Commissioners through the Audit Committee and Risk Management Committee, GCG, and Investment is conducting the supervisory function, mainly on the second and third lines. Utilizing this approach, the Company is hoping to improve resilience and effectiveness of risk management to support business sustainability.

Profil Risiko

Perseroan bersama Entitas Anak telah mengidentifikasi sejumlah risiko yang berpotensi memengaruhi kegiatan usaha, sekaligus menetapkan langkah mitigasinya yang dijelaskan sebagai berikut:

Risk Profile

The Company and its Subsidiaries have identified several risks that potentially affecting the business activities, as well as preparing the mitigation measures, as explained in the below table:

Jenis Risiko Risk Type	Mitigasi Mitigation
Risiko Utama yang Berpengaruh Signifikan terhadap Kelangsungan Usaha Perseroan **Main Risks that Have a Significant Influence on the Continuity of the Company's Business**	
Risiko ketergantungan pada kegiatan serta pendapatan dari Entitas Anak. **Risk of dependence on the activities and income of Subsidiaries.**	Kinerja setiap Entitas Anak memiliki pengaruh langsung terhadap kinerja konsolidasian Perseroan. Oleh karena itu, Perseroan senantiasa menjaga keseimbangan kinerja dengan memastikan bahwa penurunan pada 1 Entitas Anak dapat diimbangi oleh peningkatan kinerja di Entitas Anak lainnya. Pengelolaan keuangan dan operasional dilakukan secara menyeluruh dan terpadu, sehingga kinerja Perseroan, baik operasional maupun keuangan dapat terus dimonitor dan dijaga dalam kondisi yang optimal. The performance of each Subsidiary has a direct impact on the Company's consolidated performance. Accordingly, the Company consistently maintains a balanced performance by ensuring that any decline in one Subsidiary can be offset by improved performance in others. Financial and operational management is carried out comprehensively and in an integrated manner, enabling the Company's operational and financial performance to be continuously monitored and maintained in optimal condition.
Risiko Perseroan sebagai Induk Perusahaan **Risk of the Company as the Parent Company**	
Risiko terkait kebijakan strategis dan rencana ekspansi yang dilakukan Perseroan dan Entitas Anak. **Risks related to strategic policies and expansion plans carried out by the Company and Subsidiaries.**	Dalam menghadapi perkembangan pesat industri kelapa sawit dan ketatnya persaingan, Perseroan menempatkan pengelolaan risiko sebagai bagian penting dalam setiap kebijakan strategis, termasuk akuisisi, ekspansi usaha pinjaman bank, dan keputusan korporasi lainnya. Setiap langkah strategis dijalankan berdasarkan analisis komprehensif dan pertimbangan yang matang. Departemen *Corporate Risk & Compliance* juga secara berkesinambungan melakukan *risk assessment* untuk memastikan seluruh kebijakan dapat diimplementasikan secara efektif dan memberikan hasil terbaik bagi kemajuan Perseroan. In facing the rapid development of the palm oil industry and increasing competition, the Company regards risk management as an integral part of every strategic policy, including acquisitions, expansion of bank lending business, and other corporate decisions. Each strategic move is undertaken based on comprehensive analysis and prudent consideration. The Corporate Risk & Compliance Department also conducts ongoing risk assessments to ensure that all policies are implemented effectively and deliver the best outcomes for the Company's progress.
Risiko kesalahan dalam pengelolaan Entitas Anak. **Risk of errors in the management of Subsidiaries.**	Perseroan memandang pengelolaan Entitas Anak sebagai bagian strategis dalam menjaga keberlangsungan usaha. Pengelolaan dilakukan berdasarkan prinsip-prinsip *Best Management Practice* industri perkebunan kelapa sawit, menerapkan manajemen risiko dalam setiap kebijakannya, konsisten menerapkan prinsip GCG, dan pelaksanaan operasional didasarkan pada sistem, kebijakan, dan prosedur yang berlaku. Pendekatan ini diharapkan memperkuat kinerja kolektif serta mendukung pertumbuhan berkelanjutan Perseroan. The Company views the management of its Subsidiaries as a strategic component in ensuring business continuity. Management is carried out based on the Best Management Practices principles in the palm oil plantation industry, applying risk management to every policy, consistently implementing GCG principles, and ensuring that all operational activities comply with established systems, policies, and procedures. This approach is expected to strengthen collective performance and support the Company's sustainable growth.

Jenis Risiko Risk Type	Mitigasi Mitigation
Risiko terhadap Kelangsungan Usaha Entitas Anak Perseroan **Risks to the Business Continuity of the Company's Subsidiaries**	
Risiko fluktuasi harga pasar produk kelapa sawit. **Risk of fluctuations in the market price of palm oil products.**	Perseroan bersama Entitas Anak secara konsisten melakukan berbagai langkah mitigasi terhadap fluktuasi harga pasar produk kelapa sawit. Upaya ini dilakukan melalui analisis komprehensif atas perkembangan harga *crude palm oil* (CPO), *crude palm kernel oil* (CPKO), *palm kernel* (PK), tandan buah segar (TBS), pergerakan kurs USD, serta dinamika ekonomi global dan kebijakan negara importir yang menjadi pertimbangan utama dalam penyusunan strategi pemasaran. Selain itu, Perseroan aktif mengikuti berbagai kegiatan dan forum dalam lingkup asosiasi maupun nasional untuk memperoleh informasi terkini mengenai proyeksi harga CPO, sekaligus turut berkontribusi dalam kampanye sawit lestari guna memperkuat citra positif produk sawit Indonesia. Dari sisi pengelolaan penjualan, Perseroan dan Entitas Anak menerapkan strategi alokasi yang seimbang antara penjualan dengan harga *spot* (*current*) dan harga *forward* (jangka panjang), sebagai langkah antisipatif terhadap potensi kenaikan maupun penurunan harga di masa mendatang. Dalam kondisi harga pasar yang menguntungkan, Perseroan juga menjaga prinsip kehati-hatian dengan melakukan pembelanjaan secara wajar dan menyiapkan *buffer* keuangan yang memadai untuk menghadapi kemungkinan penurunan harga, sehingga kegiatan operasional tetap berjalan stabil dan berkelanjutan. The Company and its Subsidiaries consistently implement various mitigation measures against fluctuations in the market prices of palm oil products. These efforts are carried out through comprehensive analyses of developments in crude palm oil (CPO), crude palm kernel oil (CPKO), palm kernel (PK), and fresh fruit bunch (FFB) prices, USD exchange rate movements, as well as global economic dynamics and policies of importing countries, which serve as key considerations in formulating marketing strategies. In addition, the Company actively participates in various industry and national forums to obtain up-to-date information on CPO price projections, while also contributing to sustainable palm oil campaigns to strengthen the positive image of Indonesian palm oil products. In terms of sales management, the Company and its Subsidiaries apply a balanced allocation strategy between spot (current) price sales and forward (long-term) price sales, as a precautionary measure against potential future price increases or declines. In favorable market conditions, the Company also upholds prudence by maintaining reasonable spending and preparing adequate financial buffers to anticipate possible price decreases, thereby ensuring stable and sustainable operational activities.
Risiko perubahan kebijakan pajak ekspor *crude palm oil* (CPO) dan kebijakan impor. **Risk of changes in crude palm oil (CPO) export tax policies and import policies.**	Kebijakan pemerintah terkait ekspor CPO saat ini, yaitu Peraturan Menteri Keuangan (PMK) No. 68 Tahun 2025 tentang Perubahan atas PMK No. 38 tahun 2024 tentang Penetapan Barang Ekspor yang dikenakan Bea Keluar dan Tarif Bea Keluar, dan Peraturan Menteri Keuangan (PMK) No. 69 tahun 2025 tentang Tarif Layanan Badan Layanan Umum (BLU) Badan Pengelola Dana Perkebunan (BPDP). Meskipun pengenaan bea keluar dan pungutan BPDP dapat memengaruhi pendapatan, namun tarifnya disesuaikan dengan pergerakan harga CPO, sehingga dampaknya terhadap kondisi keuangan Perseroan dapat diminimalkan. Namun demikian, perubahan kebijakan yang mungkin dikeluarkan pemerintah di masa mendatang tetap menjadi perhatian utama Perseroan. Selain itu, pengenaan pajak impor atas kebutuhan industri perkebunan kelapa sawit seperti kendaraan, alat berat, suku cadang, serta pupuk berpotensi meningkatkan beban usaha. Untuk mengantisipasi hal tersebut, Perseroan secara konsisten menerapkan langkah-langkah efisiensi serta tata kelola yang baik agar profitabilitas tetap terjaga secara optimal. Government policies related to CPO exports at present, namely Minister of Finance Regulation (PMK) No. 68 of 2025 concerning the Amendment to PMK No. 38 of 2024 on the Determination of Export Goods Subject to Export Duty and Export Duty Tariffs, and Minister of Finance Regulation (PMK) No. 69 of 2025 on Service Tariffs of the Public Service Agency (BLU) of the Oil Palm Plantation Fund Management Agency (BPDP). Although the imposition of export duty and BPDP levies may affect revenue, the tariffs are adjusted in line with CPO price movements, thereby minimizing their impact on the Company's financial condition. Nevertheless, any future policy changes that may be issued by the government continue to be a primary concern for the Company. In addition, the imposition of import taxes on the palm oil plantation industry's essential needs, such as vehicles, heavy equipment, spare parts, and fertilizers, may potentially increase operating expenses. To anticipate this, the Company consistently implements efficiency measures and sound governance practices to ensure optimal profitability is maintained.

Jenis Risiko Risk Type	Mitigasi Mitigation
Risiko kelalaian dan kegagalan dalam mendapatkan persetujuan, lisensi, registrasi, dan izin bisnis Entitas Anak.	Dalam menjalankan kegiatan operasionalnya, Entitas Anak berpotensi menghadapi hambatan dalam memperoleh maupun memperpanjang berbagai perizinan usaha, sertifikasi, izin lingkungan, dan Hak Guna Usaha (HGU) akibat perubahan kebijakan dan regulasi pemerintah. Perseroan memandang perubahan ketentuan tersebut sebagai bentuk penyesuaian terhadap perkembangan regulasi dan tuntutan tata kelola yang semakin dinamis. Sebagai respons, Perseroan dan Entitas Anak senantiasa mengambil langkah proaktif untuk menyesuaikan diri dengan ketentuan terbaru serta memastikan seluruh proses perizinan berjalan sesuai peraturan yang berlaku. Upaya ini juga menjadi bagian dari komitmen Perseroan dalam membangun hubungan yang konstruktif dan harmonis dengan seluruh pemangku kepentingan, termasuk koperasi petani plasma dan masyarakat sekitar, guna memastikan keberlangsungan pertumbuhan usaha yang berkesinambungan.
Risk of negligence and failure to obtain approvals, licenses, registrations, and business permits for Subsidiaries.	In carrying out their operational activities, the Subsidiaries may encounter challenges in obtaining or extending various business licenses, certifications, environmental permits, and Right to Cultivate (HGU) titles due to changes in government policies and regulations. The Company views such regulatory changes as a form of adjustment to evolving governance requirements and the increasingly dynamic regulatory landscape. In response, the Company and its Subsidiaries consistently take proactive measures to adapt to the latest regulations and ensure that all licensing processes comply with the applicable laws. These efforts also form part of the Company's commitment to fostering constructive and harmonious relationships with all stakeholders, including plasma farmer cooperatives and surrounding communities, to ensure the continuity of sustainable business growth.
Risiko terkait kewajiban pembangunan kebun plasma.	Perseroan dan Entitas Anak memandang pembangunan kebun plasma bukan sekadar kewajiban regulasi, melainkan bentuk kemitraan strategis dengan masyarakat untuk menciptakan nilai ekonomi dan sosial yang berkelanjutan. Dengan luas kebun inti mencapai 64.430 Ha, Perseroan bersama Entitas Anak telah membangun kebun plasma seluas 12.471 Ha atau sekitar 19,4% dari total areal yang dikelola. Dalam pelaksanaannya, berbagai tantangan dan hambatan kerap muncul, baik dari aspek teknis maupun sosial. Namun, Perseroan dan Entitas Anak senantiasa mengedepankan pendekatan kolaboratif dengan masyarakat serta menjunjung tinggi kepatuhan terhadap hukum dan peraturan yang berlaku. Langkah ini memastikan hubungan kemitraan yang harmonis dan produktif, sekaligus mendukung keberlanjutan operasional dan pertumbuhan perusahaan di masa mendatang.
Risks related to the obligation to develop plasma plantations.	The Company and its Subsidiaries regard the development of plasma plantations not merely as a regulatory obligation, but as a form of strategic partnership with local communities to create sustainable economic and social value. With a total nucleus plantation area of 64,430 Ha, the Company and its Subsidiaries have developed plasma plantations covering 12,471 Ha, or approximately 19.4% of the total managed area. In practice, various challenges and obstacles often arise, both from technical and social aspects. Nevertheless, the Company and its Subsidiaries consistently prioritize a collaborative approach with local communities while upholding full compliance with applicable laws and regulations. This approach ensures a harmonious and productive partnership, while also supporting the sustainability of operations and the Company's long-term growth.
Risiko perubahan kebijakan/peraturan pemerintah terkait lingkungan hidup.	Seiring dengan perkembangan ilmu pengetahuan serta dinamika kebijakan global mengenai emisi gas rumah kaca, perubahan iklim, dan deforestasi, Pemerintah terus memperbarui peraturan dan kebijakan terkait pengelolaan lingkungan hidup. Menyikapi hal tersebut, Perseroan dan Entitas Anak senantiasa bersikap proaktif dengan memastikan seluruh aktivitas operasional dijalankan sesuai ketentuan yang berlaku. Langkah ini sejalan dengan misi Perseroan untuk berkomitmen terhadap keberlanjutan lingkungan dan pemenuhan tanggung jawab kepada seluruh pemangku kepentingan.
Risk of changes in government policies/regulations related to the environment.	In line with the advancement of scientific knowledge and the evolving global policies on greenhouse gas emissions, climate change, and deforestation, the Government continues to update regulations and policies related to environmental management. In response, the Company and its Subsidiaries consistently take a proactive stance by ensuring that all operational activities are carried out in accordance with the prevailing regulations. This approach aligns with the Company's mission to remain committed to environmental sustainability and the fulfillment of responsibilities to all stakeholders.
Risiko terkait moratorium izin pembukaan lahan baru.	Perubahan kebijakan Pemerintah, termasuk potensi diberlakukannya kembali moratorium izin perkebunan kelapa sawit pasca berakhirnya pada tahun 2021, merupakan bagian dari respons global terhadap isu deforestasi dan keberlanjutan lingkungan. Meski kebijakan tersebut dapat memengaruhi rencana ekspansi Perseroan, di sisi lain hal ini berpotensi memperbaiki keseimbangan antara pasokan dan permintaan serta memperkuat posisi nilai tawar CPO di pasar minyak nabati dunia. Perseroan menanggapinya secara positif dengan memperkuat efisiensi operasional dan menerapkan prinsip kehati-hatian dalam setiap rencana akuisisi lahan, sehingga pertumbuhan tetap terjaga secara terukur dan berkelanjutan.

Jenis Risiko Risk Type	Mitigasi Mitigation
Risks related to the moratorium on new land clearing permits.	Changes in government policy, including the potential reinstatement of the palm oil plantation permit moratorium after its expiration in 2021, form part of the global response to deforestation and environmental sustainability issues. While such policies may affect the Company's expansion plans, they may also help restore balance between supply and demand and strengthen the bargaining position of CPO in the global vegetable oil market. The Company views this positively by enhancing operational efficiency and applying prudence in every land acquisition plan to ensure measured and sustainable growth.
Risiko tumpang tindih lahan. **Risk of overlapping land.**	Ketidaksinkronan peraturan di sektor pertanahan dan kehutanan antara Pemerintah Pusat dan Daerah berpotensi menimbulkan risiko tumpang tindih lahan. Dalam menghadapinya, Perseroan dan Entitas Anak berkomitmen menjalankan tata kelola yang baik melalui kepatuhan terhadap seluruh ketentuan perundangan yang berlaku. Perseroan juga secara aktif menjalin komunikasi dengan instansi terkait, seperti Dinas Perkebunan dan Badan Pertanahan Nasional (BPN) di Provinsi Kalimantan Timur, guna meminimalkan potensi sengketa dan memastikan operasional berjalan sesuai ketentuan hukum. Regulatory inconsistencies between the Central and Regional Governments in the land and forestry sectors may pose risks of overlapping land claims. To address this, the Company and its Subsidiaries are committed to implementing good governance through full compliance with all applicable laws and regulations. The Company also actively engages in communication with relevant authorities, such as the Plantation Office and the National Land Agency (BPN) in East Kalimantan Province, to minimize potential disputes and ensure that operations proceed in accordance with legal provisions.
Risiko terkait pembatasan luas kepemilikan lahan. **Risks related to restriction of land ownership.**	Pengaturan penggunaan lahan perkebunan kelapa sawit, dilakukan melalui Peraturan Pemerintah (PP) No. 26 tahun 2021 tentang Penyelenggaraan Bidang Pertanian, dan kemudian direvisi dengan PP No. 52 tahun 2023 tentang Perubahan atas PP No. 26 Tahun 2021 yang menetapkan batas maksimum kepemilikan lahan sebesar 100.000 Ha untuk 1 perusahaan perkebunan secara nasional. Namun ketentuan tersebut tidak berlaku untuk BUMN dan atau anak perusahaan BUMN. Saat ini, luas lahan yang dikelola Perseroan masih berada di bawah batas maksimum yang ditetapkan. Kendati demikian, Perseroan tetap mencermati setiap perkembangan regulasi dan secara terbuka mempersiapkan langkah strategis apabila terjadi perubahan kebijakan. Regulations governing the use of oil palm plantation land are stipulated in Government Regulation (PP) No. 26 of 2021 on the Implementation of the Agriculture Sector, later amended by PP No. 52 of 2023 concerning the Amendment to PP No. 26 of 2021, which sets a maximum land ownership limit of 100,000 Ha, for a single plantation company at the national level. However, this provision does not apply to state-owned enterprises (BUMN) or their subsidiaries. Currently, the plantation area managed by the Company remains below the established maximum limit. Nevertheless, the Company continues to monitor regulatory developments and stands ready to prepare strategic measures should any policy changes arise.
Risiko terkait kebijakan pengupahan. **Risks related to wage policy.**	Dalam menjalankan kegiatan operasionalnya, Perseroan dan Entitas Anak sangat bergantung pada efektivitas pengendalian biaya, termasuk di dalamnya biaya tenaga kerja. Perubahan atau kenaikan upah minimum berpotensi meningkatkan biaya operasional dan menekan margin keuntungan Perseroan serta Entitas Anak. Namun demikian, melalui peningkatan sarana, prasarana, dan program pelatihan karyawan, produktivitas tenaga kerja dapat terus ditingkatkan sehingga dampak kenaikan upah dapat diminimalkan. Hingga saat ini, penyesuaian upah minimum masih berada dalam batas yang dapat dikelola dengan baik oleh Perseroan dan Entitas Anak. In carrying out its operational activities, the Company and its Subsidiaries rely heavily on effective cost control, including labor costs. Changes or increases in the minimum wage may raise operational expenses and put pressure on profit margins. Nevertheless, by improving facilities, infrastructure, and employee training programs, labor productivity can be continuously enhanced, thereby minimizing the impact of wage increases. To date, minimum wage adjustments remain within manageable limits for the Company and its Subsidiaries.
Risiko atas adanya *negative campaign*. **Risk of negative campaign.**	Dalam dinamika perdagangan global, industri kelapa sawit kerap menghadapi kampanye negatif, khususnya di Amerika Serikat dan Uni Eropa, yang menyoroti isu deforestasi, lingkungan, dan kesehatan. Selain faktor tersebut, persaingan dagang antara CPO dan minyak nabati lain turut memperkuat isu yang berkembang. Perseroan memandang kondisi ini secara objektif dan terus menjalankan operasional dengan memperhatikan prinsip keberlanjutan serta kelestarian lingkungan. Within the dynamics of global trade, the palm oil industry often faces negative campaigns, particularly in the United States of America and the European Union, highlighting issues related to deforestation, the environment, and health. In addition to these factors, trade competition between CPO and other vegetable oils further amplifies such issues. The Company views these conditions objectively and continues to operate in accordance with sustainability and environmental conservation principles.

Jenis Risiko Risk Type	Mitigasi Mitigation
Risiko atas persaingan usaha. **Risk on business competition.**	Meskipun persaingan domestik antar perusahaan kelapa sawit relatif terbatas, Perseroan lebih dihadapkan pada persaingan di pasar global dari produsen minyak nabati lain seperti *rapeseed*, *sunflower seed*, *soybean*, dan *peanut*. Keunggulan kelapa sawit terletak pada tingginya produktivitas serta kondisi geografis Indonesia sebagai negara tropis dengan paparan sinar matahari sepanjang tahun, yang mendukung kontinuitas produksi dan efisiensi biaya. Although domestic competition among palm oil companies is relatively limited, the Company primarily faces competition in the global market from other vegetable oil producers such as rapeseed, sunflower seed, soybean, and peanut. The competitive advantage of palm oil lies in its high productivity and Indonesia's geographic condition as a tropical country with year-round sunlight exposure, supporting production continuity and cost efficiency.
Risiko perubahan harga dan pasokan bahan baku. **Risk of changes in price and supply of raw materials.**	Dalam operasional perkebunan kelapa sawit, perubahan harga dan pasokan bahan baku merupakan salah satu faktor risiko yang signifikan. Ketersediaan pupuk, bahan bakar, kendaraan, alat berat, peralatan, dan suku cadang dengan harga terjangkau menjadi modal utama untuk menjaga kelancaran produksi. Kenaikan harga bahan baku maupun fluktuasi harga jual produk kelapa sawit, termasuk dampak konflik perang dagang dan perlambatan ekonomi global pada tahun 2025 dapat memengaruhi arus kas Perseroan dan Entitas Anak. Namun, melalui penerapan langkah efisiensi, peningkatan produktivitas, dan manajemen kas yang konservatif, Perseroan mampu menjaga stabilitas operasional dan kinerja keuangan, sehingga fluktuasi harga tidak mengganggu keberlanjutan usaha. In palm oil plantation operations, changes in the prices and availability of raw materials represent a significant risk factor. The availability of fertilizers, fuel, vehicles, heavy equipment, tools, and spare parts at affordable prices is essential to maintaining smooth production. Increases in raw material prices as well as fluctuations in the selling prices of palm-oil products, including the impact of trade-war conflicts and the global economic slowdown in 2025, may affect the cash flows of the Company and its Subsidiaries. However, through efficiency measures, productivity improvements, and conservative cash management, the Company has been able to maintain operational and financial stability, ensuring that price fluctuations do not disrupt business sustainability.
Risiko perubahan iklim. **Climate change risks.**	Perubahan iklim ekstrem, seperti *El Niño* dan *La Niña*, menjadi risiko yang diantisipasi Perseroan dan Entitas Anak melalui pengelolaan air dan tanah yang cermat. Pada musim kemarau panjang (*El Niño*), langkah mitigasinya meliputi pengurangan evaporasi dengan aplikasi janjang kosong dan kompos serta pembuatan rorak untuk menampung air hujan. Pada musim hujan panjang (*La Niña*), risiko ditangani dengan perbaikan drainase dan manajemen air yang terstruktur, menjaga keseimbangan lahan dan kelancaran operasional. Extreme climate changes, such as El Niño and La Niña, pose risks anticipated by the Company and its Subsidiaries through careful water and soil management. During prolonged dry seasons (El Niño), mitigation measures include reducing evaporation by applying empty fruit bunches and compost, as well as constructing roraks (water infiltration pits) to collect rainwater. During extended rainy seasons (La Niña), risks are managed through improved drainage systems and structured water management to maintain land balance and ensure smooth operations.
Risiko serangan hama dan penyakit pada tanaman perkebunan milik Perseroan dan Entitas Anak. **Risks of pest and disease attacks on plantation crops owned by the Company and its Subsidiaries.**	Dalam rangka menjalankan Kebijakan Sawit Lestari, Perseroan dan Entitas Anak menekankan pendekatan ekologis dalam pengendalian hama yang berpotensi merusak tanaman kelapa sawit. Program pengendalian hama terpadu diterapkan dengan memanfaatkan musuh atau predator alami dari hama tertentu, sehingga penggunaan pestisida kimia dapat diminimalkan. Perseroan dan Entitas Anak terus mengeksplorasi potensi musuh alami baru untuk mengendalikan organisme pengganggu tanaman, menempatkan teknik biologis sebagai prioritas, sementara pestisida hanya digunakan sebagai langkah terakhir. In implementing the Sustainable Palm Oil Policy, the Company and its Subsidiaries emphasize an ecological approach to pest control that may threaten palm oil crops. An integrated pest management program is applied by utilizing natural enemies or predators of specific pests, thereby minimizing the use of chemical pesticides. The Company and its Subsidiaries continue to explore the potential of new natural predators to control plant pests, prioritizing biological techniques while reserving pesticide use as a last resort.
Risiko kompetensi dan kemampuan karyawan. **Risk of employee competence and capability.**	Dalam menghadapi persaingan yang semakin ketat untuk memperoleh tenaga kerja yang kompeten, Perseroan dan Entitas Anak mengelola risiko ini dengan memperbaiki iklim kerja serta meningkatkan program pelatihan di seluruh lini manajemen, termasuk karyawan, staf, dan manajer. In facing increasing competition to acquire competent labor, the Company and its Subsidiaries manage this risk by improving the work environment and enhancing training programs across all management levels, including employees, staff, and managers.

Jenis Risiko Risk Type	Mitigasi Mitigation
Risiko perselisihan perburuhan atau perubahan undang-undang ketenagakerjaan, konflik sosial, dan gangguan keamanan. **Risk of labor disputes or changes to labor laws, social conflicts and security disturbances.**	Seiring meningkatnya aspirasi, keterbukaan, dan tuntutan hidup, Perseroan dan Entitas Anak menghadapi potensi risiko berupa perselisihan buruh, konflik sosial, tuntutan hukum, dan gangguan keamanan. Untuk mengelola risiko tersebut, Perseroan dan Entitas Anak senantiasa menjalin hubungan harmonis dengan seluruh pemangku kepentingan, termasuk buruh dan masyarakat sekitar, mematuhi seluruh ketentuan dan peraturan yang berlaku, serta menerapkan prinsip tata kelola perusahaan yang baik. As aspirations, transparency, and living standards rise, the Company and its Subsidiaries face potential risks such as labor disputes, social conflicts, legal claims, and security disturbances. To manage these risks, the Company and its Subsidiaries consistently maintain harmonious relationships with all stakeholders, including workers and surrounding communities, comply with all applicable laws and regulations, and uphold the principles of good corporate governance.
Risiko perubahan teknologi. **Technology change risks.**	Dalam rangka meningkatkan efisiensi dan efektivitas operasional, Perseroan dan Entitas Anak terus mengikuti perkembangan teknologi, baik pada sistem pelaporan dan administrasi maupun pada inovasi teknologi di bidang perkebunan secara umum. To enhance operational efficiency and effectiveness, the Company and its Subsidiaries continuously keep pace with technological developments, both in reporting and administrative systems as well as in plantation technology innovations in general.
Risiko ketidakcukupan asuransi yang dimiliki Perseroan dan Entitas Anak. **Risk of insufficiency of insurance owned by the Company and its Subsidiaries.**	Sejalan dengan praktik industri perkebunan dan asuransi, Perseroan dan Entitas Anak berupaya melakukan penutupan asuransi. Meski demikian, risiko kerugian akibat kekurangan cakupan asuransi, termasuk yang timbul dari *force majeure*, dimitigasi melalui *self-insurance* dan perluasan pertanggungan asuransi. In line with plantation and insurance industry practices, the Company and its Subsidiaries seek to obtain adequate insurance coverage. Nevertheless, the risk of losses arising from insufficient insurance coverage, including those resulting from force majeure events, is mitigated through self-insurance and expanded insurance protection.
Risiko Umum **General Risks**	
Risiko atas kondisi perekonomian makro dan global. **Risks on macroeconomic and global conditions.**	Sebagai komoditas yang diperdagangkan secara global, harga CPO dan produk kelapa sawit dipengaruhi oleh kondisi ekonomi dunia, termasuk konflik Rusia-Ukraina, perlambatan pertumbuhan ekonomi, inflasi, dan resesi. Kelapa sawit memiliki keunggulan kompetitif dan komparatif dibandingkan minyak nabati lainnya, sehingga melalui peningkatan efisiensi operasional dan manajemen keuangan yang konservatif, Perseroan diharapkan mampu menghadapi fluktuasi pasar dengan baik. As a globally traded commodity, CPO and palm oil product prices are influenced by global economic conditions, including the Russia–Ukraine conflict, economic slowdown, inflation, and recession. Palm oil possesses both competitive and comparative advantages over other vegetable oils; therefore, through improved operational efficiency and conservative financial management, the Company is expected to effectively navigate market fluctuations.
Risiko kepatuhan terhadap peraturan perundang-undangan yang berlaku terkait dengan bidang usaha. **Risk of compliance with applicable laws and regulations related to the business sector.**	Perseroan dan Entitas Anak senantiasa mematuhi seluruh peraturan yang berlaku serta mengkaji setiap peraturan baru yang berpotensi berdampak negatif terhadap operasional. Melalui Departemen Legal dan Hubungan Pemangku Kepentingan, Perseroan dan Entitas Anak melakukan komunikasi aktif dengan konsultan hukum dan instansi pemerintah untuk memastikan penerapan langkah-langkah yang tepat, sehingga kepatuhan terhadap peraturan perundang-undangan di bidang perkebunan dan pengolahan kelapa sawit selalu terjaga. The Company and its Subsidiaries consistently comply with all applicable regulations and review any new regulations that may have a potential adverse impact on operations. Through the Legal and Stakeholder Relations Department, the Company and its Subsidiaries maintain active communication with legal consultants and government authorities to ensure the implementation of appropriate measures, thereby maintaining full compliance with laws and regulations in the plantation and palm oil processing sectors.
Risiko perubahan nilai tukar mata uang asing. **Risk of changes in foreign currency exchange rates.**	Fluktuasi nilai tukar valuta asing berpotensi memengaruhi pendapatan dan beban Perseroan serta Entitas Anak. Namun, karena Perseroan dan Entitas Anak tidak memiliki eksposur pinjaman dalam valuta asing, risiko ini dapat dikelola secara efektif oleh Perseroan. Fluctuations in foreign exchange rates may affect the revenues and expenses of the Company and its Subsidiaries. However, since the Company and its Subsidiaries do not have exposure to foreign currency-denominated loans, this risk can be effectively managed by the Company.

Jenis Risiko Risk Type	Mitigasi Mitigation

Pengakuan pendapatan

Revenue recognition

Penjelasan atas hal audit utama:

Description of the key audit matter:

Pendapatan Grup untuk tahun yang berakhir pada tanggal 31 Desember 2025 sebesar Rp5.421 miliar, merupakan ukuran penting yang digunakan untuk mengevaluasi kinerja Grup dan merupakan faktor utama yang mendorong profitabilitas. Pendapatan ini terutama merupakan penjualan minyak kelapa sawit dan inti kelapa sawit yang dicatat ketika kendali atas barang tersebut dialihkan ke pelanggan pada jumlah yang mencerminkan imbalan yang diharapkan Grup dapat diperoleh sebagai pertukaran atas barang tersebut.

The Group's revenue for the year ended December 31, 2025, amounting to Rp5,421 billion, is an important measure used to evaluate the Group's performance and is the primary driving factor for profitability. It primarily comprises revenue from the sales of crude palm oil and palm kernels, which is recognized when control of the goods is transferred to the customers at an amount that reflects the consideration to which the Group expects to be entitled in exchange for those goods.

Description of the key audit matter: (continued)

Pendapatan mungkin diakui secara tidak tepat untuk meningkatkan hasil usaha dan mencapai pertumbuhan pendapatan sejalan dengan tujuan Grup, sehingga meningkatkan risiko salah saji material. Karena signifikansi keuangannya, kesalahan penyajian atas pendapatan dapat memiliki dampak substansial pada laporan keuangan konsolidasian secara keseluruhan dan keputusan yang dibuat oleh para pemangku kepentingan. Oleh karena itu, pengakuan pendapatan merupakan hal audit utama bagi kami. Catatan 2 dan 15 pada laporan keuangan konsolidasian terlampir menyajikan pengungkapan atas pendapatan Grup.

Revenues may be inappropriately recognized to enhance business results and achieve revenue growth in line with the objectives of the Group, thereby increasing the risk of material misstatement. Due to its financial significance, misstatement in revenue can have a substantial impact on the overall consolidated financial statements and the decisions made by stakeholders. Accordingly, revenue recognition is a key audit matter to us. Notes 2 and 15 to the accompanying consolidated financial statements provide the relevant disclosures on the Group's revenue.

Respons audit:

Audit response

Kami mengevaluasi dan menguji rancangan dan efektivitas kendali utama atas proses pendapatan. Kami melakukan pengujian rinci atas transaksi-transaksi pisah batas untuk memastikan bahwa pendapatan diakui pada periode yang tepat. Kami melakukan pengujian rinci atas transaksi pendapatan dengan melakukan verifikasi ke dokumen pendukungnya untuk memastikan keterjadian atas pendapatan serta telah diakui sesuai dengan standar akuntansi yang berlaku dan dicatat pada periode yang tepat.

We evaluated and assessed the design and operating effectiveness of the key controls over the revenue process. We performed detailed testing on cut-off transactions to ensure that revenues were recognized in the correct period. We performed test of details of the revenue transactions by verifying to the supporting documents to ensure the occurrence of the revenue and whether it has been recognized in accordance with the applicable accounting standards and recorded in the proper period.

Kami juga melakukan pengujian rinci dengan menentukan akun buku besar yang digunakan untuk mencatat entri antara pendapatan, piutang usaha, dan kas dan bank, serta menggunakan korelasi (pencatatan entri jurnal) antara tiga akun tersebut untuk melakukan kembali (*reperform*) pencatatan entri jurnal. Kami melengkapi prosedur ini dengan pengujian informasi yang dihasilkan oleh Grup atas entri jurnal kas untuk memastikan bahwa kas tersebut adalah kas sebenarnya yang berasal dari pelanggan. Kami juga mengevaluasi kepatutan dan kecukupan penyajian dan pengungkapan yang relevan dalam catatan atas laporan keuangan konsolidasian terlampir.

We also performed test of details by identifying which general ledger accounts are used to post entries between revenue, trade receivables and cash and banks and use the correlation (journal entry postings) between three accounts to reperform the posting of journal entries. We supplemented this procedure with testing of the information produced by the Group over cash journal entries to ensure they are real cash from customers. We also evaluated the appropriateness and adequacy of the presentation and relevant disclosures in the notes to the accompanying consolidated financial statements.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting, unless management either intends to liquidate the Group or to cease its operations or has no realistic alternative but to do so.

Pihak yang bertanggung jawab atas tata kelola bertanggung jawab untuk mengawasi proses pelaporan keuangan Grup.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

Tanggung jawab auditor terhadap audit atas laporan keuangan konsolidasian

Auditor's responsibilities for the audit of the consolidated financial statements

Tujuan kami adalah untuk memeroleh keyakinan memadai tentang apakah laporan keuangan konsolidasian secara keseluruhan bebas dari kesalahan penyajian material, baik yang disebabkan oleh kecurangan maupun kesalahan, dan untuk menerbitkan laporan auditor independen yang mencakup opini kami. Keyakinan memadai merupakan suatu tingkat keyakinan tinggi, namun bukan merupakan suatu jaminan bahwa audit yang dilaksanakan berdasarkan Standar Audit yang ditetapkan oleh IAPI akan selalu mendeteksi kesalahan penyajian material ketika hal tersebut ada. Kesalahan penyajian dapat disebabkan oleh kecurangan maupun kesalahan dan dianggap material jika, baik secara individual maupun agregat, dapat diekspektasikan secara wajar akan memengaruhi keputusan ekonomi yang diambil oleh pengguna berdasarkan laporan keuangan konsolidasian tersebut.

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements taken as a whole are free from material misstatement, whether due to fraud or error, and to issue an independent auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Standards on Auditing established by the IICPA will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

Auditor's responsibilities for the audit of the consolidated financial statements (continued)

Sebagai bagian dari suatu audit berdasarkan Standar Audit yang ditetapkan oleh IAPI, kami menerapkan pertimbangan profesional dan mempertahankan skeptisisme profesional selama audit. Kami juga:

As part of an audit in accordance with Standards on Auditing established by the IICPA, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Mengidentifikasi dan menilai risiko kesalahan penyajian material dalam laporan keuangan konsolidasian, baik yang disebabkan oleh kecurangan maupun kesalahan, mendesain dan melaksanakan prosedur audit yang responsif terhadap risiko tersebut, serta memeroleh bukti audit yang cukup dan tepat untuk menyediakan basis bagi opini kami. Risiko tidak terdeteksinya suatu kesalahan penyajian material yang disebabkan oleh kecurangan lebih tinggi dari yang disebabkan oleh kesalahan, karena kecurangan dapat melibatkan kolusi, pemalsuan, penghilangan secara sengaja, pernyataan salah, atau pengabaian atas pengendalian internal.

- *Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to such risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or override of internal control.*

- Memeroleh suatu pemahaman tentang pengendalian internal yang relevan dengan audit untuk mendesain prosedur audit yang tepat sesuai dengan kondisinya, tetapi bukan untuk tujuan menyatakan opini atas keefektivitasan pengendalian internal Grup.

- *Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.*

- Mengevaluasi ketepatan kebijakan akuntansi yang digunakan serta kewajaran estimasi akuntansi dan pengungkapan terkait yang dibuat oleh manajemen.

- *Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.*

Sebagai bagian dari suatu audit berdasarkan Standar Audit yang ditetapkan oleh IAPI, kami menerapkan pertimbangan profesional dan mempertahankan skeptisisme profesional selama audit. Kami juga: (lanjutan)

- Menyimpulkan ketepatan penggunaan basis akuntansi kelangsungan usaha oleh manajemen dan, berdasarkan bukti audit yang diperoleh, apakah terdapat suatu ketidakpastian material yang terkait dengan peristiwa atau kondisi yang dapat menyebabkan keraguan signifikan atas kemampuan Grup untuk mempertahankan kelangsungan usahanya. Ketika kami menyimpulkan bahwa terdapat suatu ketidakpastian material, kami diharuskan untuk menarik perhatian dalam laporan auditor independen kami ke pengungkapan terkait dalam laporan keuangan konsolidasian atau, jika pengungkapan tersebut tidak memadai, memodifikasi opini kami. Kesimpulan kami didasarkan pada bukti audit yang diperoleh hingga tanggal laporan auditor independen kami. Namun, peristiwa atau kondisi masa depan dapat menyebabkan Grup tidak dapat mempertahankan kelangsungan usahanya.

- Mengevaluasi penyajian, struktur, dan isi laporan keuangan konsolidasian secara keseluruhan, termasuk pengungkapannya, dan apakah laporan keuangan konsolidasian mencerminkan transaksi dan peristiwa yang mendasarinya dengan suatu cara yang mencapai penyajian wajar.

- Memeroleh bukti audit yang cukup dan tepat terkait informasi keuangan entitas atau aktivitas bisnis dalam Grup untuk menyatakan opini atas laporan keuangan konsolidasian. Kami bertanggung jawab atas arahan, supervisi, dan pelaksanaan audit grup. Kami tetap bertanggung jawab sepenuhnya atas opini kami.

As part of an audit in accordance with Standards on Auditing established by the IICPA, we exercise professional judgment and maintain professional skepticism throughout the audit. We also: (continued)

- *Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our independent auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusion is based on the audit evidence obtained up to the date of our independent auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.*

- *Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.*

- *Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. Kami mengomunikasikan kepada pihak yang bertanggung jawab atas tata kelola mengenai, antara lain, ruang lingkup dan saat yang direncanakan atas audit serta temuan audit signifikan, termasuk setiap defisiensi signifikan dalam pengendalian internal yang kami teridentifikasi oleh kami selama audit.

Kami juga memberikan suatu pernyataan kepada pihak yang bertanggung jawab atas tata kelola bahwa kami telah mematuhi ketentuan etika yang relevan mengenai independensi, dan mengomunikasikan kepada pihak tersebut seluruh hubungan, serta hal-hal lain yang dianggap secara wajar berpengaruh terhadap independensi kami, dan, jika relevan, pengamanan terkait.

Dari hal-hal yang dikomunikasikan kepada pihak yang bertanggung jawab atas tata kelola, kami menentukan hal-hal tersebut yang paling signifikan dalam audit atas laporan keuangan konsolidasian periode kini dan oleh karenanya menjadi hal audit utama. Kami menguraikan hal audit utama tersebut dalam laporan auditor independen kami kecuali peraturan perundang-undangan melarang pengungkapan publik tentang hal audit utama tersebut atau ketika, dalam kondisi yang sangat jarang terjadi, kami menentukan bahwa suatu hal audit utama tidak boleh dikomunikasikan dalam laporan auditor independen kami karena konsekuensi yang merugikan dari mengomunikasikan hal tersebut akan diekspektasikan secara wajar melebihi manfaat kepentingan publik atas komunikasi tersebut.

Auditor's responsibilities for the audit of the consolidated financial statements (continued)

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe such key audit matters in our independent auditor's report unless laws or regulations preclude public disclosure about such key audit matters or when, in extremely rare circumstances, we determine that a key audit matter should not be communicated in our independent auditor's report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Dasar Penyajian Laporan Keuangan Konsolidasian

Laporan keuangan konsolidasian telah disusun sesuai dengan Standar Akuntansi Keuangan di Indonesia, yang mencakup Pernyataan dan Interpretasi yang dikeluarkan oleh Dewan Standar Akuntansi Keuangan Ikatan Akuntan Indonesia (DSAK IAI), dan Peraturan-Peraturan serta Pedoman Penyajian dan Pengungkapan Laporan Keuangan yang diterbitkan oleh Otoritas Jasa Keuangan ("OJK").

Laporan keuangan konsolidasian disusun berdasarkan konsep akrual, kecuali laporan arus kas konsolidasian, dengan menggunakan konsep biaya historis, kecuali seperti yang disebutkan dalam Catatan atas laporan keuangan konsolidasian yang relevan.

Laporan arus kas konsolidasian yang disajikan dengan menggunakan metode langsung, menyajikan penerimaan dan pengeluaran kas dan setara kas yang diklasifikasikan ke dalam aktivitas operasi, investasi dan pendanaan.

Kebijakan akuntansi yang diterapkan oleh Perusahaan dan entitas anak (secara kolektif dirujuk sebagai "Grup") adalah selaras bagi tahun yang dicakup oleh laporan keuangan konsolidasian, kecuali untuk standar akuntansi revisi seperti diungkapkan pada bagian berikut Catatan ini.

Grup telah menyusun laporan keuangan konsolidasian dengan dasar bahwa Grup akan mempertahankan kelangsungan usaha.

Perubahan Kebijakan Akuntansi

Grup menerapkan untuk pertama kalinya beberapa standar dan amandemen tertentu yang efektif untuk periode tahunan yang dimulai pada atau setelah 1 Januari 2025 (kecuali dinyatakan lain). Grup tidak melakukan penerapan dini atas standar, interpretasi, atau amandemen lain yang telah diterbitkan namun belum efektif.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES INFORMATION

Basis of Presentation of Consolidated Financial Statements

*The consolidated financial statements have been prepared in accordance with Indonesian Financial Accounting Standards, which comprise the Statements and Interpretations issued by the Financial Accounting Standards Board of the Indonesian Institute of Chartered Accountants (*Dewan Standar Akuntansi Keuangan Ikatan Akuntan Indonesia *or* DSAK IAI*) and the Regulations and Guidelines on Financial Statement Presentation and Disclosures issued by Financial Services Authority* (Otoritas Jasa Keuangan *or "OJK").*

The consolidated financial statements have been prepared on the accrual basis, except for the consolidated statement of cash flows, using the historical cost concept of accounting, except as disclosed in the relevant Notes to the consolidated financial statements herein.

The consolidated statements of cash flows which have been presented using the direct method, present receipts and disbursements of cash and cash equivalents classified into operating, investing and financing activities.

The accounting policies adopted by the Company and its subsidiaries (collectively referred to as the "Group") are consistently applied for the years covered by the consolidated financial statements, except for the revised accounting standards as disclosed in the following paragraphs of this Note.

The Group has prepared the consolidated financial statements on the basis that it will continue as a going concern.

Changes in Accounting Principles

The Group applied for the first-time certain standards and amendments, which are effective for annual periods beginning on or after 1 January 2025 (unless otherwise stated). The Group has not early adopted any other standard, interpretation or amendment that has been issued but is not yet effective.

Perubahan Kebijakan Akuntansi (lanjutan)

Amandemen PSAK 221: *Kekurangan Ketertukaran*

Amandemen tersebut menetapkan bagaimana entitas harus menilai apakah suatu mata uang dapat dipertukarkan serta bagaimana entitas harus menentukan kurs spot ketika ketertukaran (e*xchangeability*) tidak tersedia. Amandemen tersebut juga mensyaratkan pengungkapan informasi yang memungkinkan pengguna laporan keuangan untuk memahami bagaimana ketidakmampuan mata uang tersebut untuk dipertukarkan dengan mata uang lainnya memengaruhi, atau diharapkan akan memengaruhi, kinerja keuangan, posisi keuangan, dan arus kas entitas.

Amandemen ini tidak berdampak terhadap laporan keuangan konsolidasian Grup.

PSAK 117: *Kontrak Asuransi*

PSAK 117 merupakan standar akuntansi baru yang komprehensif mencakup pengakuan dan pengukuran, penyajian, serta pengungkapan untuk kontrak asuransi. PSAK 117 menggantikan PSAK 104: *Kontrak Asuransi*. PSAK 117 berlaku untuk seluruh jenis kontrak asuransi (yaitu, jiwa, non-jiwa, asuransi langsung, dan reasuransi), tanpa memandang jenis entitas yang menerbitkannya, serta berlaku pula untuk jenis garansi tertentu dan instrumen keuangan dengan fitur partisipasi diskresioner.

Tujuan utama PSAK 117 adalah menyediakan model akuntansi yang komprehensif untuk kontrak asuransi yang lebih berguna dan konsisten bagi entitas asuransi, mencakup seluruh aspek akuntansi yang relevan. PSAK 117 didasarkan pada model umum yang dilengkapi dengan:

- Penyesuaian khusus untuk kontrak dengan fitur partisipasi langsung (*variable fee approach*)
- Pendekatan yang disederhanakan (*premium allocation approach*) yang terutama berlaku untuk kontrak berdurasi pendek

Standar baru tersebut tidak memiliki dampak terhadap laporan keuangan konsolidasian Grup.

Changes in Accounting Principles (continued)

Amendment of PSAK 221: Lack of Exchangeability

The amendments specifies how an entity should assess whether a currency is exchangeable and how it should determine a spot exchange rate when exchangeability is lacking. The amendments also require disclosure of information that enables users of its financial statements to understand how the currency not being exchangeable into the other currency affects, or is expected to affect, the entity's financial performance, financial position and cash flows.

This amendment did not have any impact on the Group's consolidated financial statements.

PSAK 117: Insurance Contracts

PSAK 117 is a comprehensive new accounting standard for insurance contracts covering recognition and measurement, presentation and disclosure. PSAK 117 replaces PSAK 104 Insurance Contracts*. PSAK 117 applies to all types of insurance contracts (i.e., life, non-life, direct insurance and re-insurance), regardless of the type of entities that issue them as well as to certain guarantees and financial instruments with discretionary participation features.*

The overall objective of PSAK 117 is to provide a comprehensive accounting model for insurance contracts that is more useful and consistent for insurers, covering all relevant accounting aspects. PSAK 117 is based on a general model, supplemented by:

- *A specific adaptation for contracts with direct participation features (the variable fee approach)*
- *A simplified approach (the premium allocation approach) mainly for short-duration contracts*

The new standard had no impact on the Group's consolidated financial statements.

Dasar Penyajian Laporan Keuangan Konsolidasian

Laporan keuangan konsolidasian meliputi laporan keuangan Perusahaan dan entitas-entitas anak. Kendali diperoleh bila Grup terekspos atau memiliki hak atas imbal hasil variabel dari keterlibatannya dengan *investee* dan memiliki kemampuan untuk mempengaruhi imbal hasil tersebut melalui kekuasaannya atas *investee*.

Dengan demikian, investor mengendalikan *investee* jika dan hanya jika investor memiliki seluruh hal berikut ini:

i) Kekuasaan atas *investee*, yaitu hak yang ada saat ini yang memberi investor kemampuan kini untuk mengarahkan aktivitas relevan dari *investee*,
ii) Eksposur atau hak atas imbal hasil variabel dari keterlibatannya dengan *investee*, dan
iii) Kemampuan untuk menggunakan kekuasaannya atas *investee* untuk mempengaruhi jumlah imbal hasil.

Bila Grup tidak memiliki hak suara atau hak serupa secara mayoritas atas suatu *investee*, Grup mempertimbangkan semua fakta dan keadaan yang relevan dalam mengevaluasi apakah mereka memiliki kekuasaan atas *investee*, termasuk:

i) pengaturan kontraktual dengan pemegang hak suara lainnya pada *investee*;
ii) hak-hak yang timbul dari pengaturan kontraktual lain; dan
iii) hak suara yang dimiliki Grup dan hak suara potensial.

Grup menilai kembali apakah mereka mengendalikan *investee* bila fakta dan keadaan mengindikasikan adanya perubahan terhadap satu atau lebih dari ketiga elemen dari pengendalian. Konsolidasi atas entitas-entitas anak dimulai sejak Grup memperoleh pengendalian atas entitas anak dan berakhir pada saat Grup kehilangan pengendalian atas entitas anak. Aset, liabilitas, penghasilan dan beban dari entitas anak yang diakuisisi pada tahun tertentu disertakan dalam laporan keuangan konsolidasian sejak tanggal Grup memperoleh kendali sampai tanggal Grup tidak lagi mengendalikan entitas anak tersebut.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES INFORMATION (continued)

Basis of Presentation of Consolidated Financial Statements

The consolidated financial statements comprise the financial statements of the Company and its subsidiaries. Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee.

Thus, investor controls an investee if and only if investor has all of the following:

i) Power over the investee, that is existing rights that give investor current ability to direct the relevant activities of the investee,

ii) Exposure, or rights, to variable returns from its involvement with the investee, and
iii) The ability to use its power over the investee to affect its returns.

When the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

i) the contractual arrangement(s) with the other vote holders of the investee;
ii) rights arising from other contractual arrangements; and
iii) the Group's voting rights and potential voting rights.

The Group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired during the year are included in the consolidated financial statements from the date the Group gains control until the date the Group ceases to control the subsidiary.

2. IKHTISAR INFORMASI KEBIJAKAN AKUNTANSI MATERIAL (lanjutan)

Dasar Penyajian Laporan Keuangan Konsolidasian (lanjutan)

Seluruh laba rugi dan setiap komponen penghasilan komprehensif lain ("PKL") diatribusikan pada pemilik entitas induk dan pada kepentingan nonpengendali ("KNP"), walaupun hal ini akan menyebabkan saldo KNP yang defisit. Bila dipandang perlu, penyesuaian dilakukan terhadap laporan keuangan entitas anak untuk diselaraskan dengan kebijakan akuntansi Grup.

Seluruh saldo akun, transaksi, penghasilan dan beban antar perusahaan yang signifikan, dan laba atau rugi hasil transaksi dari intra Grup yang belum direalisasi dan dividen telah dieliminasi.

Perubahan dalam bagian kepemilikan entitas induk pada entitas anak yang tidak mengakibatkan hilangnya pengendalian, dicatat sebagai transaksi ekuitas. Bila kehilangan pengendalian atas suatu entitas anak, maka Grup menghentikan pengakuan atas aset (termasuk *goodwill*), liabilitas dan komponen lain dari ekuitas terkait, dan selisihnya diakui pada laba rugi. Bagian dari investasi yang tersisa diakui pada nilai wajar.

Pengukuran Nilai Wajar

Grup mengukur aset biologis, termasuk produk (agrikultur) dari tanaman produktif, pada nilai wajar setiap tanggal pelaporan. Grup juga mengukur pada pengakuan aset dan liabilitas yang diperoleh melalui kombinasi bisnis pada nilai wajar.

Nilai wajar adalah harga yang akan diterima dari menjual suatu aset atau harga yang akan dibayar untuk mengalihkan suatu liabilitas dalam transaksi teratur antara pelaku pasar pada tanggal pengukuran. Pengukuran nilai wajar mengasumsikan bahwa transaksi untuk menjual aset atau mengalihkan liabilitas terjadi:

i. Di pasar utama untuk aset atau liabilitas tersebut, atau
ii. Jika tidak terdapat pasar utama, di pasar yang paling menguntungkan untuk aset atau liabilitas tersebut.

Pasar utama atau pasar yang paling menguntungkan tersebut harus dapat diakses oleh Grup.

Nilai wajar dari aset atau liabilitas diukur dengan menggunakan asumsi yang akan digunakan pelaku pasar ketika menentukan harga aset atau liabilitas tersebut, dengan asumsi bahwa pelaku pasar bertindak dalam kepentingan ekonomi terbaiknya.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES INFORMATION (continued)

Basis of Presentation of Consolidated Financial Statements (continued)

Profit or loss and each component of other comprehensive income ("OCI") are attributed to the equity holders of the parent of the Group and to the non-controlling interests ("NCI"), even if this results in the NCI having a deficit balance. When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the Group's accounting policies

All significant intra and inter-group balances, transactions, income and expenses, and unrealized profits and losses resulting from intra-group transactions and dividends have been eliminated.

A change in the parent's ownership interest in a subsidiary, without a loss of control, is accounted for as an equity transaction. If the Group loses control over a subsidiary, it derecognizes the related assets (including goodwill), liabilities, NCI and other component of equity, while the difference is recognized in the profit or loss. Any investment retained is recognized at fair value.

Fair Value Measurement

The Group measures biological assets, including (agriculture) produce of bearer plants, at fair value at each reporting date. The Group also initially measures assets and liabilities of the acquirees upon business combinations at fair value.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

i. In the principal market for the asset or liability, or
ii. In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible to by the Group.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

2. IKHTISAR INFORMASI KEBIJAKAN AKUNTANSI MATERIAL (lanjutan)

Pengukuran Nilai Wajar (lanjutan)

Pengukuran nilai wajar dari suatu aset non-keuangan memperhitungkan kemampuan pelaku pasar untuk menghasilkan manfaat ekonomik dengan menggunakan aset dalam penggunaan tertinggi dan terbaiknya atau dengan menjualnya kepada pelaku pasar lain yang akan menggunakan aset tersebut pada penggunaan tertinggi dan terbaiknya.

Grup menggunakan teknik penilaian yang sesuai dengan keadaan dan data yang memadai tersedia untuk mengukur nilai wajar, dengan memaksimalkan masukan (*input*) yang dapat diamati (*observable*) yang relevan dan meminimalkan masukan (*input*) yang tidak dapat diamati (*unobservable*).

Semua aset dan liabilitas yang nilai wajarnya diukur atau diungkapkan dalam laporan keuangan konsolidasian dikategorikan dalam hirarki nilai wajar berdasarkan *level* masukan (*input*) paling rendah yang signifikan terhadap pengukuran nilai wajar secara keseluruhan sebagai berikut:

i. *Level* 1 - Harga kuotasian (tanpa penyesuaian) di pasar aktif untuk aset atau liabilitas yang identik yang dapat diakses entitas pada tanggal pengukuran.
ii. *Level* 2 - Teknik penilaian yang menggunakan tingkat masukan (*input*) yang paling rendah yang signifikan terhadap pengukuran nilai wajar yang dapat diamati (*observable*) baik secara langsung atau tidak langsung.
iii. *Level* 3 - Teknik penilaian yang menggunakan tingkat masukan (*input*) yang paling rendah yang signifikan terhadap pengukuran nilai wajar yang tidak dapat diamati (*unobservable*) baik secara langsung atau tidak langsung.

Untuk aset dan liabilitas yang diakui pada laporan keuangan konsolidasian secara berulang, Grup menentukan apakah terdapat perpindahan antara *level* dalam hirarki dengan melakukan evaluasi ulang atas penetapan kategori (berdasarkan *level* masukan (*input*) paling rendah yang signifikan terhadap pengukuran nilai wajar secara keseluruhan) pada tiap akhir periode pelaporan.

Tim pelaporan keuangan Grup yang bertanggungjawab atas penilaian menentukan kebijakan dan prosedur untuk pengukuran nilai wajar berulang, seperti aset biologis.

Untuk tujuan pengungkapan nilai wajar, Grup menentukan klasifikasi aset dan liabilitas berdasarkan sifat, karakteristik dan risiko atas aset atau liabilitas dan level pada hierarki nilai wajar sebagaimana dijelaskan diatas.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES INFORMATION (continued)

Fair Value Measurement (continued)

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the consolidated financial statements are categorized within the fair value hierarchy, based on the lowest level input that is significant to the fair value measurement as a whole, described as follows:

i. Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities which accessible to the entity at the measurement date
ii. Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.
iii. Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly unobservable.

For assets and liabilities that are recognized in the consolidated financial statements on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

The Group's financial reporting team in charge of valuation determines the policies and procedures for recurring fair value measurement, such as biological assets.

For the purpose of fair value disclosures, the Group has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

Kas dan Setara Kas

Kas dan setara kas terdiri atas kas dan bank serta deposito jangka pendek yang jatuh tempo dalam waktu 3 bulan atau kurang, yang dapat segera dapat dikonversikan menjadi kas dalam jumlah yang ditentukan dan memiliki risiko perubahan nilai yang tidak signifikan.

Instrumen Keuangan

Instrumen keuangan adalah setiap kontrak yang memberikan aset keuangan bagi satu entitas dan liabilitas keuangan atau ekuitas bagi entitas lain.

Aset Keuangan

Pengakuan dan Pengukuran Awal

Pada pengakuan awal, Grup mengukur aset keuangan pada nilai wajarnya ditambah biaya transaksi, dalam hal aset keuangan tidak diukur dalam nilai wajar melalui laba rugi (“NWLR’). Piutang usaha yang tidak mengandung komponen pembiayaan yang signifikan, dimana Grup telah menerapkan cara praktis, diukur pada harga transaksi yang ditentukan sesuai PSAK 115.

Agar aset keuangan diklasifikasikan dan diukur pada biaya perolehan diamortisasi atau nilai wajar melalui penghasilan komprehensif lain (“NWPKL”), aset keuangan harus menghasilkan arus kas yang semata-mata dari pembayaran pokok dan bunga (“SPPB”) dari pokok belum dilunasi. Penilaian ini disebut uji SPPB dan dilakukan pada tingkat instrumen.

Model bisnis Grup untuk mengelola aset keuangan mengacu pada bagaimana mereka mengelola aset keuangannya untuk menghasilkan arus kas. Model bisnis menentukan apakah arus kas akan dihasilkan dari pendapatan arus kas kontraktual, penjualan aset keuangan, atau keduanya.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES INFORMATION (continued)

Cash and Cash Equivalents

Cash and cash equivalents comprise cash on hand and in banks and short-term deposits with maturity of three (3) months or less, that are readily convertible to a known amount of cash and subject to an insignificant risk of changes in value.

Financial Instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial Assets

Initial Recognition and Measurement

At initial recognition, the Group measures a financial asset at its fair value plus transaction costs, in the case of a financial asset not at fair value through profit or loss (“FVTPL”). Trade receivables that do not contain a significant financing component, for which the Group has applied the practical expedient are measured at the transaction price determined under PSAK 115.

In order for a financial asset to be classified and measured at amortized cost or fair value through other comprehensive income (“FVOCI”), it needs to give rise to cash flows that are ‘solely payments of principal and interest (“SPPI”)’ on the principal amount outstanding. This assessment is referred to as SPPI test and is performed at an instrument level.

The Group’s business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both.

Pengukuran Selanjutnya

Untuk tujuan pengukuran selanjutnya, aset keuangan diklasifikasikan dalam empat kategori:
- Aset keuangan pada biaya perolehan diamortisasi (instrumen utang),
- Aset keuangan pada NWPKL dengan daur ulang keuntungan dan kerugian kumulatif (instrumen utang),
- Aset keuangan yang ditetapkan pada NWPKL tanpa daur ulang keuntungan dan kerugian kumulatif setelah penghentian pengakuan (instrumen ekuitas), dan
- Nilai wajar melalui laba rugi (NWLR).

Pengukuran selanjutnya dari aset keuangan tergantung kepada klasifikasi masing-masing aset keuangan seperti berikut ini:

Aset keuangan pada biaya perolehan diamortisasi (instrumen utang)

Grup mengukur aset keuangan yang diukur dengan biaya perolehan diamortisasi jika kedua kondisi berikut terpenuhi:
- Aset keuangan dimiliki dalam model bisnis dengan tujuan untuk memiliki aset keuangan dalam rangka mendapatkan arus kas kontraktual, dan
- Persyaratan kontraktual dari aset keuangan menghasilkan arus kas pada tanggal tertentu yang merupakan SPPB dari jumlah pokok terutang.

Aset keuangan yang diukur pada biaya perolehan diamortisasi selanjutnya diukur dengan menggunakan metode suku bunga efektif ("SBE") dan menjadi subjek penurunan nilai. Keuntungan dan kerugian diakui dalam laba rugi pada saat aset dihentikan pengakuannya, dimodifikasi atau diturunkan nilainya.

Aset keuangan Grup pada biaya perolehan diamortisasi termasuk kas dan setara kas, piutang usaha, piutang lain-lain dan piutang plasma.

Subsequent Measurement

For purposes of subsequent measurement, financial assets are classified in four categories:
- *Financial assets at amortized cost (debt instruments),*
- *Financial assets at FVOCI with recycling of cumulative gains and losses (debt instruments),*
- *Financial assets designated at FVOCI with no recycling of cumulative gains and losses upon derecognition (equity instruments), and*
- *Fair value through profit or loss (FVTPL).*

The subsequent measurement of financial assets depends on their classification as described below:

Financial assets at amortized cost (debt instruments)

The Group measures financial assets at amortised cost if both of the following conditions are met:
- *The financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows, and*
- *The contractual terms of the financial asset give rise on specified dates to cash flows that are SPPI on the principal amount outstanding.*

Financial assets at amortized cost are subsequently measured using the effective interest ("EIR") method and are subject to impairment. Gains and losses are recognized in profit or loss when the asset is derecognized, modified or impaired.

The Group's financial assets at amortized cost includes cash and cash equivalents, trade receivables, other receivables and plasma receivables.

Aset Keuangan (lanjutan)

Penghentian Pengakuan

Aset keuangan (atau, sesuai dengan kondisinya, bagian dari aset keuangan atau bagian dari kelompok aset keuangan serupa) terutama dihentikan pengakuannya (yaitu, dikeluarkan dari laporan posisi keuangan konsolidasian Grup) ketika:

- Hak untuk menerima arus kas dari aset telah berakhir, atau
- Grup telah mengalihkan haknya untuk menerima arus kas dari aset atau menanggung liabilitas untuk membayar arus kas yang diterima tersebut secara penuh tanpa penundaan berarti kepada pihak ketiga berdasarkan kesepakatan pelepasan (*pass-through*), dan salah satu dari (a) Grup telah mengalihkan secara substansial seluruh risiko dan manfaat atas aset, atau (b) Grup tidak mengalihkan maupun tidak memiliki secara substansial seluruh risiko dan manfaat atas aset, tetapi telah mengalihkan kendali atas aset.

Ketika Grup telah mengalihkan haknya untuk menerima arus kas dari suatu aset atau telah menandatangani kesepakatan '*pass-through*', Grup mengevaluasi jika, dan sejauh mana, Grup masih mempertahankan risiko dan manfaat atas kepemilikan aset. Ketika Grup tidak mengalihkan maupun seluruh risiko dan manfaat atas aset dipertahankan secara substansial, maupun tidak mengalihkan kendali atas aset, Grup tetap mengakui aset yang dialihkan sebesar keterlibatan berkelanjutannya. Dalam kasus tersebut, Grup juga mengakui liabilitas terkait. Aset yang dialihkan dan liabilitas terkait diukur dengan basis yang mencerminkan hak dan kewajiban yang masih dipertahankan oleh Grup.

Keterlibatan berkelanjutan dalam bentuk jaminan atas aset yang ditransfer, diukur pada nilai yang lebih rendah antara jumlah tercatat awal aset dan jumlah maksimum imbalan yang dibutuhkan oleh Grup untuk membayar kembali.

Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognized (i.e., removed from the Group's consolidated statement of financial position) when:

- *The rights to receive cash flows from the asset have expired, or*
- *The Group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Group has transferred substantially all the risks and rewards of the asset, or (b) the Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.*

When the Group has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if, and to what extent, it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Group continues to recognize the transferred asset to the extent of its continuing involvement. In that case, the Group also recognizes an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group could be required to repay.

Penurunan Nilai

Grup mengakui penyisihan Kerugian Kredit Ekspektasian ("KKE") untuk semua instrumen utang yang bukan diukur pada NWLR dan kontrak jaminan keuangan. KKE ditentukan atas perbedaan antara arus kas kontraktual menurut kontrak dan semua arus kas yang diharapkan akan diterima oleh Grup, yang didiskontokan dengan perkiraan SBE orisinal. Arus kas yang diharapkan mencakup setiap arus kas dari penjualan agunan yang dimiliki atau perbaikan kredit lainnya yang merupakan bagian yang tidak terpisahkan dalam ketentuan kontrak.

KKE diakui dalam dua tahap. Bila belum terdapat peningkatan risiko kredit signifikan sejak pengakuan awal, KKE diakui untuk kerugian kredit yang dihasilkan dari peristiwa gagal bayar yang mungkin terjadi dalam jangka waktu 12 bulan ke depan (KKE 12 bulan). Namun, bila telah terdapat peningkatan signifikan risiko kredit sejak pengakuan awal, penyisihan kerugian diakui untuk kerugian kredit yang diperkirakan selama sisa umur aset, tanpa mempertimbangkan waktu gagal bayar (KKE sepanjang umurnya).

Karena piutang usaha dan piutang lain-lainnya tidak memiliki komponen pembiayaan signifikan, Grup menerapkan pendekatan yang disederhanakan dalam perhitungan KKE. Oleh karena itu, Grup tidak menelurusi perubahan dalam risiko kredit, namun justru mengakui penyisihan kerugian berdasarkan KKE sepanjang umurnya pada setiap tanggal pelaporan. Grup membentuk matriks provisi berdasarkan pengalaman kerugian kredit masa lampau, disesuaikan dengan perkiraan masa depan (*forward-looking*) atas faktor yang spesifik untuk debitur dan lingkungan ekonomi.

Impairment

The Group recognizes an allowance for Expected Credit Losses ("ECL") for all debt instruments not held at FVTPL and financial guarantee contracts. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Group expects to receive, discounted at an approximation of the original EIR. The expected cash flows include any cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

ECLs are recognized in two stages. When there have been significant increases in credit risks since initial recognition, ECLs are provided for credit losses that result from default events that are possible within the next 12-months (a 12-month ECL). But, when there have been significant increases in credit risks since initial recognition, a loss allowance is recognized for credit losses expected over the remaining life of the asset, irrespective of timing of the default (a lifetime ECL).

Because its trade and other receivables do not contain significant financing component, the Group applies a simplified approach in calculating ECL. Therefore, the Group does not track changes in credit risk, but instead recognizes a loss allowance based on lifetime ECL at each reporting date. The Group established a provision matrix that is based on its historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

Liabilitas Keuangan

Pengakuan dan Pengukuran Awal

Liabilitas keuangan diklasifikasikan, pada pengakuan awal, sebagai liabilitas keuangan yang diukur pada NWLR, utang dan pinjaman atau derivatif ditetapkan sebagai instrumen lindung nilai pada lindung nilai yang efektif, sesuai dengan kondisinya.

Semua liabilitas keuangan diakui pada nilai wajar saat pengakuan awal dan, dalam hal liabilitas keuangan dilklasifikasi sebagai utang dan pinjaman, diakui pada nilai wajar setelah dikurangi biaya transaksi yang dapat diatribusikan secara langsung.

Grup menetapkan liabilitas keuangannya sebagai utang dan pinjaman, seperti utang bank, utang usaha dan lain-lain, beban akrual dan liabilitas imbalan kerja jangka pendek

Pengukuran Selanjutnya

Pengukuran selanjutnya dari liabilitas keuangan ditentukan oleh klasifikasinya sebagai berikut.

Liabilitas keuangan pada biaya perolehan diamortisasi (utang dan pinjaman)

(i) Utang dan Pinjaman Jangka Panjang yang Dikenakan Bunga

Setelah pengakuan awal, utang dan pinjaman jangka panjang yang berbunga diukur pada biaya perolehan yang diamortisasi dengan menggunakan metode SBE. Pada tanggal pelaporan, biaya bunga yang masih harus dibayar dicatat secara terpisah, dari pokok pinjaman terkait, dalam bagian liabilitas jangka pendek. Keuntungan dan kerugian diakui pada laba rugi ketika liabilitas dihentikan pengakuannya maupun melalui proses amortisasi menggunakan metode SBE.

Biaya amortisasi dihitung dengan mempertimbangkan setiap diskonto atau premium atas akusisi dan komisi atau biaya yang merupakan bagian tidak terpisahkan dari SBE. Amortisasi SBE dicatat sebagai beban keuangan pada laba rugi.

Financial Liabilities

Initial Recognition and Measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at FVTPL, loans and borrowings, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Group designates its financial liabilities as loans and borrowings, such as bank loans, trade and other payables, accrued expenses and short-term employee benefits liability.

Subsequent Measurement

The measurement of financial liabilities depends on their classification as described below:

Financial liabilities at amortized cost (loans and borrowings)

(i) Long-term Interest-bearing Loans and Borrowings

Subsequent to initial recognition, long-term interest-bearing loans and borrowings are measured at amortized acquisition costs using EIR method. At the reporting dates, accrued interest is recorded separately from the associated borrowings within the current liabilities section. Gains and losses are recognized in the profit or loss when the liabilities are derecognized as well as through the EIR amortization process.

Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included in finance costs in the profit or loss.

Derecognition

Kombinasi Bisnis

Kombinasi bisnis dicatat dengan menggunakan metode akuisisi. Biaya perolehan dari sebuah akuisisi diukur pada nilai agregat imbalan yang dialihkan, diukur pada nilai wajar pada tanggal akuisisi dan jumlah setiap KNP pada pihak yang diakuisisi. Untuk setiap kombinasi bisnis, Grup memilih apakah mengukur KNP pada entitas yang diakuisisi baik pada nilai wajar ataupun pada proporsi kepemilikan KNP atas aset neto yang teridentifikasi dari entitas yang diakuisisi. Biaya-biaya akuisisi yang timbul dibebankan langsung dan disertakan dalam beban administrasi.

Grup menentukan bahwa mereka telah mengakuisisi bisnis ketika rangkaian aktivitas dan aset yang diakuisisi mencakup input dan proses substantif yang bersama-sama secara signifikan berkontribusi pada kemampuan untuk menghasilkan output. Proses yang diperoleh adalah substantif jika penting bagi kemampuan untuk terus menghasilkan output, dan input yang diperoleh mencakup tenaga kerja yang terorganisir dengan keterampilan, pengetahuan, atau pengalaman yang diperlukan untuk melakukan proses itu atau secara signifikan berkontribusi pada kemampuan untuk terus menghasilkan output dan dianggap unik atau langka atau tidak dapat diganti tanpa biaya, usaha, atau penundaan yang signifikan dalam kemampuan untuk terus menghasilkan output.

Ketika melakukan akuisisi atas sebuah bisnis, Grup mengklasifikasikan dan menentukan aset keuangan yang diperoleh dan liabilitas keuangan yang diambil alih berdasarkan pada persyaratan kontraktual, kondisi ekonomi dan kondisi terkait lain yang ada pada tanggal akuisisi.

Dalam suatu kombinasi bisnis yang dilakukan secara bertahap, Grup mengukur kembali kepentingan ekuitas yang dimiliki sebelumnya pada pihak yang diakuisisi pada nilai wajar tanggal akuisisi dan mengakui keuntungan atau kerugian yang dihasilkan.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES INFORMATION (continued)

Business Combinations

Business combinations are accounted for using the acquisition method. The cost of an acquisition is measured as the aggregate of the consideration transferred, measured at acquisition date fair value, and the amount of any NCI in the acquiree. For each business combination, the Group elects whether it measures the NCI in the acquiree either at fair value or at the proportionate share of the acquiree's identifiable net assets. Acquisition costs incurred are directly expensed and included in administrative expenses.

The Group determines that it has acquired a business when the acquired set of activities and assets include an input and a substantive process that together significantly contribute to the ability to create outputs. The acquired process is considered substantive if it is critical to the ability to continue producing outputs, and the inputs acquired include an organized workforce with the necessary skills, knowledge, or experience to perform that process or it significantly contributes to the ability to continue producing outputs and is considered unique or scarce or cannot be replaced without significant cost, effort, or delay in the ability to continue producing outputs.

When the Group acquires a business, it assesses the financial assets acquired and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date.

If the business combination is achieved in stages, the acquisition date fair value of the Group's previously held equity interest in the acquiree is remeasured to fair value at the acquisition date through profit or loss.

Kombinasi Bisnis (lanjutan)

Setiap imbalan kontinjensi yang akan ditransfer oleh perusahaan pengakuisisi akan diakui pada nilai wajar pada tanggal akuisisi. Imbalan kontinjensi yang diklasifikasikan sebagai ekuitas tidak diukur kembali dan penyelesaian selanjutnya adalah diperhitungkan dalam ekuitas. Imbalan kontinjensi yang diklasifikasikan sebagai aset atau liabilitas yaitu instrumen keuangan dan dalam lingkup PSAK 109, diukur pada nilai wajar dengan perubahan nilai wajar yang diakui dalam laba rugi sesuai dengan PSAK 109. Imbalan kontinjensi lain yang tidak termasuk dalam PSAK 109 diukur sebesar nilai wajar pada setiap tanggal pelaporan dengan perubahan nilai wajar yang diakui pada laba rugi.

Bila pencatatan awal kombinasi bisnis belum dapat diselesaikan pada tanggal pelaporan, Grup melaporkan jumlah sementara bagi *item* yang pencatatannya belum dapat diselesaikan tersebut.

Periode pengukuran adalah periode setelah tanggal akuisisi yang didalamnya Grup dapat melakukan penyesuaian atas jumlah sementara yang diakui dalam kombinasi bisnis tersebut. Selama periode pengukuran, Grup mengakui penambahan aset atau liabilitas bila terdapat informasi terbaru yang diperoleh mengenai fakta dan keadaan pada tanggal akuisisi, yang bila diketahui pada saat itu, akan menyebabkan pengakuan atas aset dan liabilitas pada tanggal tersebut.

Periode pengukuran berakhir pada saat pengakuisisi menerima informasi yang diperlukan mengenai fakta dan keadaan pada tanggal akuisisi atau mengetahui bahwa informasi lainnya tidak dapat diperoleh, namun tidak lebih dari satu tahun dari tanggal akuisisi.

Business Combinations (continued)

Any contingent consideration to be transferred by the acquirer will be recognized at fair value at the acquisition date. Contingent consideration classified as equity is not re-measured and its subsequent settlement is accounted for within equity. Contingent consideration classified as an asset or liability that is a financial instrument and within the scope of PSAK 109, is measured at fair value with the changes in fair value recognized in the statement of profit or loss in accordance with PSAK 109. Other contingent consideration that is not within the scope of PSAK 109 is measured at fair value at each reporting date with changes in fair value recognized in profit or loss.

If the initial accounting for a business combination is incomplete by the end of the reporting, the Group reports provisional amounts for the items for which the accounting is incomplete.

The measurement period is the period after the acquisition date during which the Group may adjust the provisional amounts recognized for a business combination. During the measurement period, the Group recognizes additional assets or liabilities if new information is obtained about facts and circumstances that existed as of the acquisition date and, if known, would have resulted in the recognition of those assets and liabilities as of that date.

The measurement period ends as soon as the acquirer receives the information it was seeking about facts and circumstances that existed as of the acquisition date or learns that more information is not obtainable but shall not exceed one year from the acquisition date.

Kombinasi Bisnis (lanjutan)

Pada tanggal akuisisi, *goodwill* awalnya diukur pada harga perolehan yang merupakan selisih lebih nilai agregat dari imbalan yang dialihkan dan jumlah setiap KNP atas selisih jumlah dari aset teridentifikasi yang diperoleh dan liabilitas yang diambil alih.

Jika imbalan tersebut lebih rendah dari nilai wajar aset neto entitas anak yang diakuisisi, selisih tersebut diakui pada laba rugi sebagai keuntungan dari pembelian dengan diskon setelah sebelumnya manajemen melakukan penilaian atas identifikasi dan nilai wajar dari aset yang diperoleh dan liabilitas yang diambil alih.

Persediaan

Persediaan dinyatakan sebesar nilai yang lebih rendah antara biaya perolehan atau nilai realisasi neto. Biaya perolehan ditentukan dengan menggunakan metode rata-rata tertimbang (*weighted-average method*) untuk persediaan minyak kelapa sawit, inti kelapa sawit dan minyak inti kelapa sawit, sedangkan untuk persediaan pupuk, suku cadang dan persediaan lainnya menggunakan metode rata-rata bergerak (*moving-average method*).

Nilai realisasi neto adalah estimasi harga penjualan dalam kegiatan usaha biasa dikurangi estimasi biaya penyelesaian dan estimasi biaya yang diperlukan untuk membuat penjualan.

Biaya yang dikeluarkan untuk setiap produk agar berada pada lokasi dan kondisi siap untuk dijual dicatat sebagai berikut:

i) Bahan baku, suku cadang dan bahan pembantu: harga pembelian;
ii) Barang jadi dan persediaan dalam proses: biaya bahan baku dan tenaga kerja langsung dan bagian proporsional dari beban overhead berdasarkan kapasitas operasi normal namun tidak termasuk biaya pinjaman.

Grup menetapkan penyisihan untuk nilai realisasi neto persediaan berdasarkan hasil penelaahan berkala atas kondisi fisik dan nilai realisasi neto persediaan.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES INFORMATION (continued)

Business Combinations (continued)

At acquisition date, goodwill is initially measured at cost being the excess of the aggregate of the consideration transferred and the amount recognized for NCI over the net identifiable assets acquired and liabilities assumed.

If this consideration is lower than the fair value of the net assets of the subsidiary acquired, the difference is recognized in profit or loss as gain on bargain purchase after previously assessing the identification and fair value measurement of the acquired assets and the assumed liabilities.

Inventories

Inventories are stated at the lower of cost or net realizable value. Cost is determined using the weighted-average method for crude palm oil, palm kernel and crude palm kernel oil meanwhile for fertilizers, spare parts and other inventories using the moving-average method.

Net realizable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

Costs incurred in bringing each product to its present location and condition are accounted for as follow:

i) Raw materials, spare parts and factory supplies: purchase cost;
ii) Finished goods and work in-process: cost of direct materials and labor and a proportion of manufacturing overheads based on normal operating capacity but excluding borrowing costs.

The Group provides allowance for net realizable value of inventories based on periodic reviews of the physical conditions and net realizable values of the inventories.

Fixed Assets

Bearer plants

Bearer plants are living plants used in the production or supply of agricultural produce; are expected to bear produce for more than one period; and have a remote likelihood of being sold as agricultural produce, except for incidental scrap sales.

Immature bearer plants are recognized at cost, which consist mainly of the accumulated cost of land clearing, planting, fertilizing and up-keeping/maintaining the plantations and allocations of indirect overhead costs up to the time the trees become commercially productive and available for harvest. Costs also include capitalized borrowing costs and other charges incurred in connection with the financing of the development of immature bearer plants.

Such capitalization of borrowing costs ceases when the trees become commercially productive and available for harvest. Immature bearer plants are not amortized.

Tanaman produktif (lanjutan)

Tanaman produktif belum menghasilkan direklasifikasi menjadi tanaman produktif menghasilkan pada saat tanaman dinyatakan menghasilkan dan dapat dipanen. Secara umum, tanaman produktif kelapa sawit memerlukan waktu sekitar 3 sampai dengan 4 tahun sejak penanaman bibit di area perkebunan untuk menjadi tanaman menghasilkan.

Tanaman produktif kelapa sawit telah menghasilkan dinyatakan sebesar biaya perolehan, dan disusutkan dengan menggunakan metode garis lurus dengan perkiraan umur manfaat selama 25 tahun.

Jumlah tercatat tanaman produktif direviu atas penurunan nilai jika terdapat peristiwa atau perubahan keadaan yang mengindikasikan bahwa jumlah tercatat mungkin tidak dapat seluruhnya terealisasi.

Jumlah tercatat komponen dari suatu tanaman produktif dihentikan pengakuannya pada saat dilepaskan atau saat sudah tidak ada lagi manfaat ekonomi masa depan yang diharapkan dari penggunaan maupun pelepasannya. Keuntungan atau kerugian yang timbul dari penghentian pengakuan tersebut (ditentukan sebesar selisih antara jumlah hasil pelepasan neto dan jumlah tercatatnya) dimasukkan ke dalam laba rugi pada tahun penghentian pengakuan tersebut dilakukan.

Umur manfaat aset dan metode penyusutan dievaluasi setiap akhir tahun pelaporan dan disesuaikan secara prospektif jika dipandang perlu.

Beban pemeliharaan tanaman produktif dibebankan pada laba rugi pada saat terjadinya. Beban pemugaran dan penambahan dalam jumlah besar dikapitalisasi kepada jumlah tercatat aset terkait bila besar kemungkinan bagi Grup manfaat ekonomi masa depan menjadi lebih besar dari standar kinerja awal yang ditetapkan sebelumnya dan disusutkan sepanjang sisa masa manfaat aset terkait.

Bearer plants (continued)

Immature bearer plants are reclassified to mature bearer plants when they are commercially productive and available for harvest. In general, an oil palm bearer plant takes about 3 to 4 years to reach maturity from the time of planting the seedlings to the field.

Palm oil bearer plants is stated at cost, and is depreciated using the straight-line method over their estimated useful lives of 25 years.

The carrying amounts of bearer plants are reviewed for impairment when events or changes in circumstances indicate that their carrying values may not be fully recoverable.

The carrying amount of an item of bearer plants is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising from the derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is directly included in the profit or loss of year the item is derecognized.

The asset useful lives and depreciation method are reviewed at the end of each reporting year and adjusted prospectively if necessary.

Upkeep and maintenance costs of bearer plants are taken to the profit or loss when they are incurred. The cost of major renovation and restoration is included in the carrying amount of the related asset when it is probable that future economic benefits in excess of the originally assessed standard of performance of the existing asset will flow to the Group and is depreciated over the remaining useful life of the related asset.

Jumlah tercatat aset ini direviu atas penurunan nilai jika terdapat peristiwa atau perubahan keadaan yang mengindikasikan bahwa jumlah tercatat mungkin tidak dapat seluruhnya terealisasi.

The carrying amounts of these assets are reviewed for impairment when events or changes in circumstances indicate that their carrying values may not be fully recoverable.

Jumlah tercatat komponen dari suatu aset dihentikan pengakuannya pada saat dilepaskan atau saat sudah tidak ada lagi manfaat ekonomi masa depan yang diharapkan dari penggunaan maupun pelepasannya. Other fixed assets (continued)

Constructions in progress are stated at cost, which includes, among others, construction costs, instalation and other costs related to the construction of the assets. The accumulated cost will be reclassified to the appropriate "Fixed Assets" account when the construction is completed and the asset is ready for its intended use. Assets under construction are not depreciated until they fulfill the criteria for asset recognition as fixed assets as disclosed above.

Repairs and maintenance expenses are taken to the profit or loss when they are incurred. The cost of major renovation and restoration is included in the carrying amount of the related asset when it is probable that future economic benefits in excess of the originally assessed standard of performance of the existing asset will flow to the Group and is depreciated over the remaining useful life of the related asset.

Aset Biologis

Aset biologis Grup terdiri dari produk agrikultur dari tanaman produktif, yang terutama terdiri dari tandan buah segar kelapa sawit (”TBS”).

Aset biologis dinyatakan sebesar nilai wajar dikurangi biaya untuk menjual. Keuntungan atau kerugian yang timbul pada pengakuan awal produk agrikultur pada nilai wajar dikurangi biaya untuk menjual dan dari perubahan nilai wajar dikurangi biaya untuk menjual dari aset biologis pada setiap tanggal pelaporan dimasukkan dalam laba rugi pada tahun terjadinya.

Nilai wajar dari produk agrikultur, termasuk produk yang tumbuh dan sudah dipanen dari tanaman produktif kelapa sawit ditentukan pada *Level 2* dengan menerapkan estimasi volume produksi terhadap harga pasar yang berlaku pada tanggal pelaporan. Biaya untuk menjual adalah biaya inkremental yang diatribusikan secara langsung untuk pelepasan aset, tidak termasuk beban pembiayaan dan pajak penghasilan.

Penurunan Nilai Aset Non-keuangan

Pada setiap akhir tahun pelaporan, Grup menilai apakah terdapat indikasi suatu aset mengalami penurunan nilai. Jika terdapat indikasi tersebut atau pada saat pengujian penurunan nilai aset diperlukan, maka Grup membuat estimasi jumlah terpulihkan aset tersebut.

Jumlah terpulihkan yang ditentukan untuk aset individual adalah jumlah yang lebih tinggi antara nilai wajar aset atau unit penghasil kas (“UPK”) dikurangi biaya untuk menjual dengan nilai pakainya, kecuali aset tersebut tidak menghasilkan arus kas masuk yang sebagian besar independen dari aset atau kelompok aset lain.

Jika nilai tercatat aset atau UPK lebih besar daripada jumlah terpulihkannya, maka aset tersebut dipertimbangkan mengalami penurunan nilai dan nilai tercatat aset diturunkan menjadi sebesar jumlah terpulihkannya.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES INFORMATION (continued)

Biological Assets

The Group’s biological assets comprise agriculture produce of the bearer plants, which primarily comprises oil palm’s fresh fruit bunches (“FFB”).

Biological assets are stated at fair value less costs to sell. Gains or losses arising on initial recognition of agricultural produce at fair value less costs to sell and from the change in fair value less costs to sell of the biological assets at each reporting date are included in the profit or loss for the year in which they arise.

The fair value of the agricultural produce, including growing produce and harvested produce, of oil palm bearer plants is determined at Level 2 by applying the estimated volume of the produce to the market price applicable at the reporting date. Costs to sell are the incremental costs directly attributable to the disposal of an asset, excluding finance costs and income taxes.

Impairment of Non-financial Assets

At the end of each reporting year, the Group assesses whether there is an indication that an asset may be impaired. If any such indication exists or when impairment testing for an asset is required, the Group makes an estimate of the asset’s recoverable amount.

An assets’ recoverable amount which is determined for an individual asset is the higher of an asset’s or cash generating unit (“CGU”)’s fair value less costs to sell and its value in use, unless the asset does not generate cash inflows that are largely independent of those from other assets or group of assets.

Where the carrying value of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

Pendapatan dari Kontrak dengan Pelanggan dan Pengakuan Beban

Grup adalah produsen dan penjual minyak kelapa sawit, inti kelapa sawit dan minyak inti kelapa sawit. Pendapatan dari kontrak dengan pelanggan diakui ketika pengendalian atas barang, terutama minyak kelapa sawit, inti kelapa sawit dan minyak inti kelapa sawit dialihkan kepada pelanggan pada suatu jumlah yang mencerminkan imbalan yang diharapkan Grup sebagai imbalan atas barang tersebut. Grup secara umum menyimpulkan bahwa mereka adalah prinsipal dalam pengaturan pendapatannya.

Piutang usaha merupakan hak Grup atas sejumlah imbalan yang tidak bersyarat (yaitu, hanya berlalunya waktu yang diperlukan sebelum pembayaran imbalan jatuh tempo). Lihat kebijakan akuntansi aset keuangan di bagian Instrumen Keuangan mengenai pengakuan awal dan pengukuran selanjutnya.

Jika pelanggan membayar imbalan sebelum Grup mengalihkan barang atau jasa kepada pelanggan, liabilitas kontrak diakui pada saat pembayaran dilakukan atau pembayaran jatuh tempo (mana yang lebih awal). Liabilitas kontrak diakui sebagai pendapatan pada saat Grup memenuhi pelaksanaan kontrak.

Penghasilan/Beban Bunga

Untuk semua instrumen keuangan yang diukur pada biaya perolehan diamortisasi, penghasilan atau beban bunga dicatat dengan menggunakan metode SBE, yaitu suku bunga yang secara tepat mendiskontokan estimasi pembayaran atau penerimaan kas di masa yang akan datang selama perkiraan umur dari instrumen keuangan, atau jika lebih tepat, digunakan periode yang lebih singkat, untuk nilai tercatat neto dari aset keuangan atau liabilitas keuangan.

Beban

Beban diakui pada saat terjadinya (asas akrual).

Revenue from Contracts with Customers and Recognition of Expenses

The Group are producer and seller of crude palm oil, palm kernels and crude palm kernel oil. Revenue from contracts with customers is recognized when control of the goods, primarily crude palm oil, palm kernels and crude palm kernel oil are transferred to the customers at an amount that reflects the consideration to which the Group expects to be entitled in exchange for those goods or services. The Group has generally concluded that it is the principal in its revenue arrangements.

Trade receivables represent the Group's right to an amount of consideration that is unconditional (i.e., only the passage of time is required before payment of the consideration is due). Refer to accounting policies of financial assets in Financial instruments section regarding initial recognition and subsequent measurement.

If a customer pays consideration before the Group transfers goods or services to the customer, a contract liability is recognized when the payment is made or the payment is due (whichever is earlier). Contract liabilities are recognized as revenue when the Group fulfills its obligation under the contract.

Interest Income/Expense

For all financial instruments measured at amortized cost, interest income or expense is recorded using the EIR, which is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the net carrying amount of the financial asset or liability.

Expenses

Expenses are recognized when they are incurred (accrual basis).

Grup sebagai penyewa

Grup menerapkan pendekatan pengakuan dan pengukuran tunggal untuk semua sewa, kecuali untuk sewa jangka-pendek dan sewa yang aset pendasarnya bernilai-rendah. Grup mengakui liabilitas sewa untuk melakukan pembayaran sewa dan aset hak-guna yang mewakili hak untuk menggunakan aset pendasar.

Foreign Currency Transactions and Balances

The reporting currency used in the consolidated financial statements is Indonesian Rupiah, which is also the Group's functional currency.

Each entity in the Group determines its own functional currency and measures its transactions and financial statement balances in their respective functional currency.

Transactions involving foreign currencies are recorded in Rupiah at the rates of exchange prevailing at the time the transactions are made. At the reporting date, monetary assets and liabilities denominated in foreign currencies are adjusted to reflect the average of the selling and buying rates of exchange prevailing at the last banking transaction date of the year, as published by Bank Indonesia, and any resulting gains or losses are credited or charged to operations of the current year, except for exchange differences arising from foreign currency borrowing to the extent that they are regarded as an adjustment to interest cost obtained to finance the development of the immature plantations and land clearing which are capitalized to the cost of the said assets.

As of December 31, 2025, the rate of exchange used for United States Dollar (US Dollar) was Rp16,782 (2024: Rp16,162).

Transactions in foreign currencies other than US Dollar are not significant.

Leases

The Group assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Group as a lessee

The Group applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Group recognizes lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

Aset hak-guna

Grup mengakui aset hak-guna pada tanggal permulaan sewa (yaitu tanggal aset pendasar tersedia untuk digunakan). Aset hak-guna diukur pada harga perolehan, dikurangi akumulasi penyusutan dan penurunan nilai, serta disesuaikan dengan pengukuran kembali liabilitas sewa. Biaya perolehan aset hak-guna mencakup jumlah liabilitas sewa yang diakui, biaya langsung awal yang terjadi, dan pembayaran sewa yang dilakukan pada atau sebelum tanggal permulaan dikurangi setiap insentif sewa yang diterima. Aset hak-guna disusutkan dengan metode garis lurus selama periode yang lebih pendek antara sewa dan estimasi masa manfaat aset, sebagai berikut:

Right-of-use assets

The Group recognizes right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognized, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets, as follows:

	Tahun/*Years*	
Bangunan	2 – 10	*Buildings*
Alat berat dan kendaraan	2 – 5	*Heavy equipment and vehicles*
Mesin dan peralatan	2 – 5	*Machinery and equipment*

Jika kepemilikan aset pendasar sewa beralih ke Grup pada akhir masa sewa atau biaya perolehan aset hak-guna merefleksikan Grup akan mengeksekusi opsi beli, maka penyusutan aset hak-guna dihitung menggunakan estimasi masa manfaat aset. Aset hak-guna juga dievaluasi untuk penurunan nilai.

If ownership of the leased asset transfers to the Group at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset.The right-of-use assets are also assessed for impairment.

Liabilitas Sewa

Lease Liabilities

Pada tanggal permulaan sewa, Grup mengakui liabilitas sewa yang diukur pada nilai kini pembayaran sewa yang harus dilakukan selama masa sewa.

At the commencement date of the lease, the Group recognizes lease liabilities measured at the present value of lease payments to be made over the lease term.

Pembayaran sewa juga mencakup harga pelaksanaan dari opsi beli yang secara wajar pasti dilaksanakan oleh Grup dan pembayaran pinalti untuk mengakhiri sewa, jika masa sewa merefleksikan adanya opsi dapat mengakhiri sewa. Pembayaran sewa variabel yang tidak bergantung pada indeks atau tarif diakui sebagai beban pada periode terjadinya peristiwa atau kondisi yang memicu terjadinya pembayaran tersebut.

The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Group and payments of penalties for terminating the lease, if the lease term reflects exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognized as expenses in the period in which the event or condition that triggers the payment occurs.

Liabilitas Sewa (lanjutan)

Dalam menghitung nilai kini pembayaran sewa, Grup menggunakan Suku Bunga Pinjaman Inkremental ("SBPI") pada tanggal permulaan sewa karena suku bunga implisit dalam sewa tidak dapat langsung ditentukan. Setelah tanggal permulaan, jumlah kewajiban sewa ditingkatkan untuk mencerminkan akresi bunga (atas efek diskonto) dan dikurangi untuk pembayaran sewa yang dilakukan. Selain itu, nilai tercatat liabilitas sewa diukur kembali jika terdapat modifikasi, perubahan masa sewa, perubahan pembayaran sewa, atau perubahan penilaian atas opsi untuk membeli aset pendasar.

Sewa Jangka Pendek dan Sewa atas Aset Bernilai Rendah

Grup menerapkan pengecualian pengakuan sewa jangka pendek untuk sewa yang jangka waktu sewanya pendek (yaitu, sewa yang memiliki jangka waktu sewa 12 bulan atau kurang dari tanggal permulaan dan tidak memiliki opsi beli). Grup juga menerapkan pengecualian pengakuan sewa dengan aset bernilai rendah untuk sewa yang aset pendasarnya dianggap bernilai rendah. Pembayaran sewa untuk sewa jangka pendek dan sewa dari aset bernilai rendah diakui sebagai beban dengan metode garis lurus selama masa sewa.

Perpajakan

Pajak Kini

Aset dan liabilitas pajak kini diukur sebesar jumlah yang diharapkan dapat direstitusi dari atau dibayarkan kepada otoritas perpajakan. Tarif pajak dan peraturan pajak yang digunakan untuk menghitung jumlah tersebut adalah yang telah berlaku atau secara substantif telah berlaku pada tanggal pelaporan di negara tempat Grup beroperasi dan menghasilkan pendapatan kena pajak.

Bunga dan denda disajikan sebagai bagian dari penghasilan atau beban operasi lain karena tidak dianggap sebagai bagian dari beban pajak penghasilan.

Leases (continued)

Group as a lessee (continued)

Lease Liabilities (continued)

In calculating the present value of lease payments, the Group uses its Incremental Borrowing Rate ("IBR") at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments or a change in the assessment of an option to purchase the underlying asset.

Short-term Leases and Leases of Low-value Assets

The Group applies the short-term lease recognition exemption to its short-term leases (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). The Group also applies the lease of low-value assets recognition exemption to leases that are considered to be low value. Lease payments on short-term leases and leases of low-value underlying assets are recognized as expense on a straight-line basis over the lease term.

Taxation

Current Tax

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authority. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted at the reporting date in the countries where the Group operates and generates taxable income.

Interests and penalties are presented as part of other operating income or expenses since they are not considered as part of the income tax expense.

3. PERTIMBANGAN, ESTIMASI DAN ASUMSI AKUNTANSI YANG SIGNIFIKAN

Penyusunan laporan keuangan konsolidasian Grup mengharuskan manajemen untuk membuat pertimbangan, estimasi dan asumsi yang mempengaruhi jumlah yang dilaporkan dari pendapatan, beban, aset dan liabilitas, pada akhir periode pelaporan. Ketidakpastian mengenai asumsi dan estimasi tersebut dapat mengakibatkan penyesuaian material terhadap nilai tercatat aset dan liabilitas dalam periode pelaporan berikutnya.

Pertimbangan

Pertimbangan berikut ini dibuat oleh manajemen dalam rangka penerapan kebijakan akuntansi Grup yang memiliki pengaruh paling signifikan atas jumlah yang diakui dalam laporan keuangan konsolidasian:

Perpajakan

Ketidakpastian atas interpretasi dari peraturan pajak yang kompleks, perubahan peraturan pajak dan jumlah dan timbulnya penghasilan kena pajak di masa depan, dapat menyebabkan penyesuaian di masa depan atas penghasilan dan beban pajak yang telah dicatat. Pertimbangan juga dilakukan dalam menentukan penyisihan atas pajak penghasilan badan. Terdapat transaksi dan perhitungan tertentu yang penentuan pajak akhirnya adalah tidak pasti sepanjang kegiatan usaha normal. Penjelasan lebih rinci mengenai perpajakan diungkapkan dalam Catatan 11.

Tagihan dan Keberatan atas Hasil Pemeriksaan Pajak

Berdasarkan peraturan perpajakan yang berlaku saat ini, manajemen mempertimbangkan apakah jumlah yang tercatat dalam akun di atas dapat dipulihkan dan direstitusi oleh Kantor Pajak. Penjelasan lebih lanjut atas akun ini akan diungkapkan pada Catatan 11.

Estimasi dan Asumsi

Asumsi utama masa depan dan sumber utama estimasi ketidakpastian lain pada tanggal pelaporan yang memiliki risiko signifikan bagi penyesuaian yang material terhadap nilai tercatat aset dan liabilitas untuk tahun berikutnya diungkapkan di bawah ini. Grup mendasarkan asumsi dan estimasi pada parameter yang tersedia pada saat laporan keuangan konsolidasian disusun. Asumsi dan situasi mengenai perkembangan masa depan mungkin berubah akibat perubahan pasar atau situasi di luar kendali Grup. Perubahan tersebut dicerminkan dalam asumsi terkait pada saat terjadinya.

3. SIGNIFICANT ACCOUNTING JUDGMENTS, ESTIMATES AND ASSUMPTIONS

The preparation of the Group's consolidated financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, at the end of the reporting period. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of the asset and liability affected in future periods.

Judgments

The following judgments are made by management in the process of applying the Group's accounting policies that have the most significant effects on the amounts recognized in the consolidated financial statements:

Taxes

Uncertainties exist with respect to the interpretation of complex tax regulations, changes in tax laws, and the amount and timing of future taxable income, could necessitate future adjustments to tax income and expense already recorded. Judgment is also involved in determining the provision for corporate income tax. There are certain transactions and computation for which the ultimate tax determination is uncertain during the ordinary course of business. Further details regarding taxation are disclosed in Note 11.

Claims for Tax Refund and Tax Assessment Under Appeal

Based on the tax regulations currently enacted, the management judged if the amounts recorded under the above account are recoverable and refundable by the Tax Office. Further explanations regarding this account are disclosed in Note 11.

Estimates and Assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are disclosed below. The Group based its assumptions and estimates on parameters available when the consolidated financial statements were prepared. Existing circumstances and assumptions about future developments may change due to market changes or circumstances arising beyond the control of the Group. Such changes are reflected in the assumptions when they occur.

Estimasi dan Asumsi (lanjutan)

Penyisihan atas Penurunan Nilai Piutang Plasma

Seperti diungkapkan dalam Catatan 2, piutang plasma merupakan biaya-biaya yang dikeluarkan untuk pengembangan perkebunan plasma. Grup menetapkan estimasi penyisihan penurunan nilai piutang plasma dengan menggunakan pendekatan umum KKE karena piutang ini mengandung komponen pembiayaan yang signifikan.

Jika belum ada peningkatan risiko kredit yang signifikan sejak awal kontrak, penyisihan didasarkan pada KKE 12 bulan. Grup menetapkan piutang dari masing-masing proyek plasma mengalami peningkatan risiko kredit yang signifikan ketika biaya pengembangan aktual per hektar melebihi biaya pengembangan per hektar yang disepakati dalam perjanjian kredit antara koperasi dan kreditur. Pada titik ini, Grup menetapkan estimasi kerugian penurunan nilai menggunakan KKE sepanjang umurnya.

Grup menghitung KKE sepanjang umurnya berdasarkan perkiraan kekurangan kas, didiskontokan dengan perkiraan SBE awal. Kekurangan kas adalah selisih antara arus kas yang menjadi hak Grup sesuai kontrak dan arus kas yang diharapkan akan diterima Grup, yang diestimasi berdasarkan pendapatan dari perkebunan plasma dikurangi biaya penjualan dan pembayaran pokok dan bunga ke bank.

Input utama yang digunakan untuk estimasi ini adalah harga jual TBS, hasil produksi perkebunan plasma, biaya produksi dan tingkat inflasi. Penyisihan ini dievaluasi ulang dan disesuaikan dengan tambahan informasi yang diterima pada setiap tanggal pelaporan.

Nilai tercatat atas piutang plasma Grup sebelum penyisihan penurunan nilai pada tanggal 31 Desember 2025 adalah sebesar Rp265.939.693 (2024: Rp233.148.233). Penjelasan lebih rinci atas piutang plasma diungkapkan dalam Catatan 7.

3. SIGNIFICANT ACCOUNTING JUDGMENTS, ESTIMATES AND ASSUMPTIONS (continued)

Estimates and Assumptions (continued)

Allowance for Impairment of Plasma Receivables

As discussed in Note 2, plasma receivables represents disbursements made for the costs to develop plasma plantations. The Group estimates allowance for impairment of plasma receivables using general approach of ECL as these receivables contain significant financing component.

When there has not been significant increase in credit risk since origination, the allowance is based on the 12-months' ECL. The Group primarily determined a receivable from individual plasma project has significant increase in credit risk when the actual development cost per hectare is exceeding the agreed development cost per hectare as stated in the credit agreement between the cooperatives and the creditor. At this point, the Group estimates the impairment loss using lifetime ECLs.

The Group calculates lifetime ECL based on the expected cash shortfalls, discounted at an approximation of the original EIR. A cash shortfall is the difference between the cash flows that are due to the Group in accordance with the contract and the cash flows that the Group expects to receive, which is estimated based on the revenues from the plasma plantations deducted with the costs of sales and principal and interest payments to the bank.

The key inputs applied for this estimation are the selling price of FFB, production yield of the plasma plantations, production costs and inflation rate. These provisions are re-evaluated and adjusted as additional information is received at each reporting date.

The carrying amount of the Group's plasma receivables before allowance for impairment as of December 31, 2025 was Rp265,939,693 (2024: Rp233,148,233). Further details on plasma receivables are disclosed in Note 7.

Sehubungan dengan kebijakan tersebut, TBPP, TLN, SPN, IEK, TPS, MJA, GSA dan CDM bertindak selaku ”Perusahaan Inti” memiliki komitmen dengan beberapa koperasi yang mewadahi petani plasma untuk mengembangkan perkebunan plasma.

22. TUJUAN DAN KEBIJAKAN MANAJEMEN RISIKO KEUANGAN

Risiko utama dari instrumen keuangan Grup adalah risiko suku bunga atas nilai wajar dan arus kas, risiko harga komoditas, risiko kredit, dan risiko likuiditas. Direksi menelaah dan menyetujui kebijakan untuk mengelola masing-masing risiko tersebut yang dijelaskan dengan lebih rinci sebagai berikut:

Risiko suku bunga atas nilai wajar dan arus kas

Risiko tingkat bunga adalah risiko bahwa nilai wajar atau arus kas masa depan suatu instrumen keuangan akan berfluktuasi karena perubahan tingkat suku bunga pasar.

Risiko suku bunga Grup terutama timbul dari pinjaman untuk modal kerja dan investasi. Pinjaman pada berbagai suku bunga menimbulkan risiko suku bunga atas nilai wajar kepada Grup. Grup tidak memiliki pinjaman yang dikenakan suku bunga tetap.

Saat ini, Grup tidak mempunyai kebijakan formal lindung nilai atas risiko suku bunga.

Untuk tahun yang berakhir pada tanggal-tanggal 31 Desember 2025 dan 2024, berdasarkan simulasi yang rasional, jika tingkat suku bunga mengambang pinjaman jangka panjang lebih tinggi/lebih rendah 100 basis poin, dengan seluruh variabel-variabel lain tidak berubah, maka efek pada laba sebelum pajak penghasilan akan menjadi sebagai berikut:

22. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES

The main risks arising from the Group's financial instruments are interest rate risk on fair value and cash flow, commodity price risk, credit risk and liquidity risk. The Directors review and agree policies for managing each of these risks, which is described in more details as follows:

Interest rate risk on fair value and cash flow

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

The Group's interest rate risk mainly arises from loans for working capital and investment purposes. Loans at variable rates expose the Group to fair value interest rate risk. The Group has no loan that bears fixed interest rate.

Currently, the Group does not have a formal hedging policy for interest rate exposures.

For the years ended December 31, 2025 and 2024, based on a sensible simulation, had the floating interest rates of long-term loans been 100 basis points higher/lower, with all other variables held constant, profit before income tax would have been affected as follows:

	2025	2024	
Lebih rendah/tinggi	8.415.970	10.208.142	*Lower/higher*

Risiko harga komoditas

Grup terkena dampak risiko harga komoditas akibat beberapa faktor, antara lain cuaca, kebijakan pemerintah, tingkat permintaan dan penawaran pasar dan lingkungan ekonomi global. Dampak tersebut terutama timbul dari penjualan tanda buah segar, minyak dan inti kelapa sawit, dimana marjin laba atas penjualan tersebut terpengaruh fluktuasi harga pasar.

Pada saat ini, Grup tidak mempunyai kebijakan formal lindung nilai atas risiko harga komoditas.

Commodity price risk

The Group is exposed to commodity price risk due to certain factors, such as weather, government policies, level of demand and supply in the market and the global economic environment. Such exposure mainly arises from its sales of fresh fruit bunch, palm oil and palm kernel where the profit margin on those sale may be affected by market prices fluctuations.

Currently, the Group does not have a formal hedging policy for commodity price exposures.

22. TUJUAN DAN KEBIJAKAN MANAJEMEN RISIKO KEUANGAN (lanjutan)

Risiko kredit

Risiko kredit yang dihadapi oleh Grup berasal dari kredit yang diberikan kepada pelanggan dan petani plasma serta penempatan rekening koran dan deposito pada bank dan lembaga keuangan.

Selain dari pengungkapan di bawah ini, Grup tidak memiliki konsentrasi risiko kredit.

Kas dan Setara Kas

Risiko kredit dari penempatan pada bank atau lembaga keuangan dikelola oleh manajemen Grup sesuai dengan kebijakan Grup. Investasi kelebihan dana dilakukan hanya dengan pihak yang disetujui dan dalam batas kredit yang ditetapkan untuk masing-masing pihak. Batas kredit masing-masing pihak ditinjau oleh Direksi dan dapat diperbarui sepanjang tahun. Batasan tersebut ditetapkan untuk meminimalkan konsentrasi risiko dan oleh karena itu mengurangi kerugian finansial melalui potensi kegagalan bank untuk melakukan pembayaran.

Piutang Usaha

Terdapat kebijakan untuk memastikan penjualan produk hanya dilakukan kepada pelanggan yang dapat dipercaya dengan rekam jejak atau sejarah kredit yang baik. Merupakan kebijakan Grup bahwa semua pelanggan yang akan melakukan pembelian secara kredit harus melalui prosedur verifikasi kredit. Untuk penjualan, Grup memberikan jangka waktu kredit antara 5 (lima) sampai dengan 15 (lima belas) hari dari tanggal penerbitan faktur. Grup memiliki kebijakan yang membatasi total kredit untuk tiap-tiap pelanggan. Selain itu, saldo piutang usaha dipantau secara terus menerus untuk mengurangi risiko piutang tak tertagih.

Ketika pelanggan gagal melakukan pelunasan sesuai dengan syarat pembayaran, Grup akan menghubungi pelanggan untuk menindaklanjuti piutang yang telah lewat jatuh tempo. Jika pelanggan tidak melunasi piutang yang telah jatuh tempo dalam jangka waktu yang telah ditentukan, Grup akan menempuh jalur hukum. Sesuai dengan evaluasi oleh Grup, penyisihan spesifik dapat dibuat jika utang dianggap tidak tertagih. Untuk menekan risiko kredit, Grup akan menghentikan penyaluran semua produk kepada pelanggan yang terlambat atau gagal bayar.

22. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES (continued)

Credit risk

The Group has credit risk arising from the credits granted to the customers and plasma farmers and placement of current accounts and deposits in the banks and financial institutions.

Other than as disclosed below, the Group has no concentration of credit risk.

Cash and Cash Equivalents

Credit risk from balances with banks or financial institutions is managed by the Group's management in accordance with the Group's policy. Investments of surplus funds are made only with approved counterparties and within credit limits assigned to each counterparty. Counterparty credit limits are reviewed by the Board of Directors and may be updated throughout the year. The limits are set to minimize the concentration of risks and therefore mitigate financial loss through the bank's potential failure to make payments.

Trade Receivables

The Group has policies in place to ensure that whole sales of products are made only to creditworthy customers with proven track records or good credit history. It is the Group's policy that all customers who wish to trade on credit terms are subject to credit verification procedures. For sales, the Group may grant its customers credit terms from 5 (five) to 15 (fifteen) days from the issuance of invoice. The Group has policies that limit the amount of credit to every customer. In addition, trade receivables balances are monitored on an ongoing basis to reduce the risk of bad debts.

When a customer fails to make a payment within the granted credit term, the Group will contact the customer to act on overdue receivable. If the customer does not settle the overdue receivable within a reasonable time, the Group will proceed with a legal action. Depending on the Group's assessment, specific provisions may be made if the debt is deemed uncollectible. To mitigate its credit risk, the Group will cease the supply of all products to customers in the event of late payments or defaults.

Piutang Plasma

Seperti diungkapkan pada Catatan 2 dan 7, piutang plasma merupakan biaya-biaya yang dikeluarkan untuk pengembangan perkebunan plasma yang meliputi pengeluaran yang dibiayai oleh bank dan yang dibiayai sendiri oleh Grup sementara menunggu pendanaan dari bank.

Piutang plasma juga termasuk pinjaman talangan kredit beserta bunga pada bank, pinjaman pupuk serta sarana produksi pertanian lainnya kepada petani plasma. Biaya-biaya ini akan ditagihkan kembali ke petani plasma, dan jaminan terkait berupa bukti kepemilikan tanah perkebunan plasma akan dikembalikan kepada petani plasma setelah piutang plasma dilunasi sepenuhnya.

Grup melalui pola kemitraan juga memberikan bantuan teknis kepada petani plasma untuk mempertahankan produktivitas perkebunan plasma yang merupakan bagian dari strategi Grup untuk mempererat hubungan dengan petani plasma yang diharapkan akan dapat memperlancar pelunasan piutang plasma.

Pada tanggal pelaporan, eksposur maksimum Grup terhadap risiko kredit adalah sebesar nilai tercatat masing-masing kategori dari aset keuangan yang disajikan pada laporan posisi keuangan konsolidasian.

Risiko likuiditas

Grup mengelola profil likuiditasnya untuk membiayai belanja modal dan melunasi utang yang jatuh tempo dengan menyediakan kas dan setara kas yang cukup, dan ketersediaan pendanaan melalui kecukupan jumlah fasilitas kredit yang diterima.

Grup secara teratur mengevaluasi arus kas proyeksi dan aktual dan terus-menerus memantau kondisi pasar keuangan untuk mengidentifikasikan kesempatan melakukan penggalangan dana yang terutama mencakup utang bank.

Manajemen menetapkan bahwa nilai tercatat (berdasarkan jumlah nosional) kas dan setara kas, piutang usaha dan lain-lain, utang usaha dan lain-lain, beban akrual dan liabilitas imbalan kerja jangka pendek kurang lebih sebesar nilai wajarnya karena instrumen keuangan tersebut berjangka pendek.

Nilai tercatat dari utang bank jangka panjang dan piutang plasma dengan suku bunga mengambang kurang lebih sebesar nilai wajarnya karena dinilai ulang secara berkala.

Aset non-keuangan

Tabel berikut menunjukkan hirarki pengukuran nilai wajar berulang dari aset Grup:

23. FAIR VALUE MEASUREMENT

Financial Instruments

The carrying values of financial instruments presented in the consolidated statement of financial position approximate their fair values.

Management has determined that the carrying amounts (based on notional amounts) of cash and cash equivalents, trade and other receivables, trade and other payables, accrued expenses and short-term employee benefits liability, reasonably approximate their fair values because they are short-term in nature.

The carrying amounts of long-term bank loans and plasma receivables with floating interest rates are approximately at their fair values as they are re-priced frequently.

Non-financial Assets

The following table provides the recurring fair value measurement hierarchy of the Group's assets:

	Total/*Total*	Harga kuotasian dalam pasar aktif untuk aset yang identik (*Level 1*)/ *Quoted prices in active markets (Level 1)*	Input yang dapat diobservasi lain yang signifikan (*Level 2*)/ *Significant observable inputs (Level 2)*	Input yang tidak dapat diobservasi yang signifikan (*Level* 3)/ *Significant unobservable inputs (Level 3)*
